CLARINDA, IOWA

BERRY SEED CO.

TWO TOP RATERS

BERRY'S 813

U.S.-13

**About 120 Day Type
Contains Extra Inbreds**

If you could only hear the enthusiastic reports from farmers who have grown this great Hybrid we wouldn't have to say a word about it. The big long ears, the deep golden kernels, the large strong stalks, the fine feeding qualities and the tremendous yields are the things they talk about. Many of these farmers grew more than one Hybrid and to date we have found none who reported he had anything that outyielded or yielded as much as our 813.

We wish you could have seen one of our seed fields at Clarinda this year. Great big ears and yielding over 150 bushel per acre at early harvest time at 80 lb. per bu.

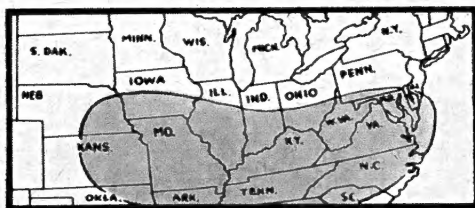

In test plantings we have the following reports on "witnessed" yields. 190.36 bu. per acre at 15% moisture, Andrew K. Hovden, Decorah, Iowa, 169.05 bu., U. S. Newcomber, Auburn, Indiana; 146.57 bu. from Green City, Iowa; 137.28 bu., Calmar, Iowa; 131.64 bu. Lakewood, Illinois. These records of yields indicate the wide adaptability of Berry's 813 and show the enormous capacity of this variety to yield. It is far above the average.

This corn is U. S. 13 complete. Nothing has been taken from it but something has been added. Extra later pollinating Inbreds have been incorporated. Our purpose is to provide additional pollen to assure fertilization of the ears in event the main pollen crop shall be burned by excessively high temperatures.

Thus there is provided an extra assurance of better filled ears. This also has a tendency to lengthen the ears and it appears to reduce ear droppage. Thus you get U. S. 13—Plus these added factors. It is truly a great Hybrid.

Characteristics

One large ear per stalk. Easy to husk by hand or machine. Deep grains of high feeding value. Enough soft starch so live stock will eat it readily but not a real starchy kernel. Dark green foliage. Husks dry before stalk matures. Strong stalks. A vigorous grower. An exceptional drought resister. Resistant to chinch bugs and disease. High shelling percentage. A fine feeding corn. A longer pollinating period assuring better filled ears under adverse conditions. Adapted to a wide range of soils and suitable wherever U. S. 13 can be grown. Be sure to grow some this year.

**Big Single Ear
Deep Soft Grain
Extra Heavy Yields
About 120 Day Type**

This great variety has made a wonderful record in yield from Nebraska to Connecticut and Delaware and south into Kentucky and other states. It is a strong stalked hybrid bearing a large well shaped ear. Its rich golden kernels are large, deep and soft enough to be readily eaten by all live stock. Grain looks like the old open pollinated corn but far excels and outyields it. It stands up well, is resistant to drought, chinch bugs and disease. Has fine dark green foliage. It is a vigorous grower and is one of the most profitable and productive of hybrid varieties.

Yield Records

These are some recorded yields of official state tests: Iowa 108.4 bu. per acre, Ohio 123.0 bu., Nebraska 106 bu., Pennsylvania 97.7, Indiana 103.2, Missouri 121 bu., Illinois 112.6, in Maryland 134% over check variety. In Kentucky only a fraction of a bushel under first place and first in Connecticut in the late series test. This also shows the wide area to which this Hybrid is adapted. While ears shorten somewhat on thin soil it still will outyield almost any other variety thus indicating its adaptability to a wide range of soils.

Character of Berry's U.S. 13

All U. S. 13 seed is not equal in yielding ability. The quality of the foundation stock, the care used in crossing and processing may cause yields to vary from 10 to 15 bu. per acre. That is to say U. S. 13 seed produced by one grower may outyield U. S. 13 from another grower by that many bushel. We do not know where to obtain finer seed than we used in producing our seed stock and in crossing and processing we use great care so as to make Berry's U. S. 13 the best.

Most Seed Corn Companies sell U. S. 13 under a different name at much higher prices. A change of name does not change character; higher price will not improve the quality. We will supply you with high quality U. S. 13 at a genuine saving in cost. Please order early and get just what you want.

All varieties are made into six grades. Medium, Medium Large and Large in both Flat and Round grains. Specify which you prefer. Each lot graded for accurate planting. Round grades often do best. See page 5.

Be sure to read Page 23 of this catalog for detailed information on the extra yields of New Strain Brome Grass and the greater ease of getting stands.

Berry's

Hi-Yield

HYBRID BLENDS

\$3⁷⁵ BU.
ROUND GRAIN
\$4²⁵ BU.
THICK FLAT GRAIN

When we speak of a blend we mean a combination of different varieties of Hybrids. There is a very definite reason for making these blends. Most Hybrids have a short pollinating period. If hot, dry weather happens to strike at that time considerable pollen will be killed and this will result in poorly filled ears and thus lower yields. By using two or three varieties mixed, which mature at about the same time and yet have slightly different pollinating dates, this danger is reduced. It gives greater assurance of well filled ears and bigger yields.

Big Savings

Berry's Hi-Yield Blends are made up of the varieties listed in this catalog. We realize that farmers generally are not accustomed to blends but we have so much confidence in the merits of these blends that we are making these up special and selling them at a very low price to get you started using them. Think of it only \$3.75 per bu. for the Round Grain which frequently produces the best yields. That is less than the price of open pollinated corn and far superior to it in performance. Thick Flat at only \$4.25 per bu. which is way below the general price range for Hybrid Seed Corn. All of the varieties rank high in yield and quality. We take a back seat for no one on production.

Guaranteed Quality

We guarantee that you will be completely satisfied with the shipment you will receive. The corn has been tested and will germinate 90% or better. The seed is treated to give you added assurance of good stands even under unfavorable conditions after planting. The seed both Round and Flat is graded for accurate planting. After you receive your shipment you can take up to 30 days to test it for germination and do anything you wish to satisfy yourself that you have a great value. If, for any reason whatsoever, you are not thoroughly pleased, drop us a line. We will give you shipping instructions and promptly refund the money you paid—plus freight charges.

THICK FLAT GRADE

\$4.25 Per Bu.

The Thick Flat is a grade in which the kernels are too thick to make the regular flat grades, although they have about the same length or depth. This in our opinion is the sturdiest and most vigorous kind of seed available. It is graded to plant accurately when proper plates are used. We believe you will prefer this to any other grade once you find out what it can do for you.

Better Filled Ears

Improved Yields

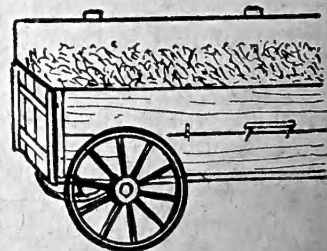

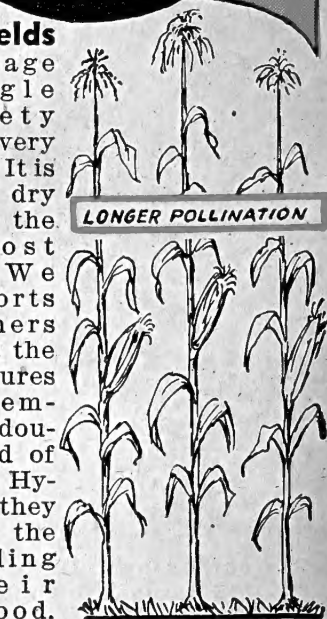

In the average year any single Hybrid variety will pollinate very satisfactorily. It is during hot, dry spells that the blends are most outstanding. We have had reports from customers telling us that the blends or mixtures they made themselves almost doubled the yield of other single Hybrids and that they had by far the heaviest yielding fields in their neighborhood.

Berry's Blends, therefore, are based on actual practical farm experience.

In making these blends we select varieties that are relatively close together in maturity as too wide a variation would result in mature and immature ears mixed in the field. Thus you can secure proper blends and secure this added assurance of big, well filled ears and bigger yields.

Medium and Later Maturity

We put up our Blends in two general maturity classes. The **Medium** which will average around 110 days and the **Later** around 120 days. Be sure to specify which you want when you order Hybrid Blend. The Medium Blend should be found suitable to sections having conditions similar to North and South central Iowa and the Later to South Central and Southern Iowa and on south of this. Either should prove suitable for ensilage purposes further north. Under favorable conditions Medium should mature in northern Iowa.

Larger Yields

ROUND GRAIN

\$3.75 Per Bu.

Because of more plant food in the kernels Round Grains will often produce stronger, more vigorous plants and therefore better yields. Under cold conditions after planting, it usually shows better germination. Graded for accurate planting. If your planter does not have plates for round corn the cost of a set is more than paid for by the saving in cost. Make big savings and get fine heavy producing seed.

SAVE MONEY ON BERRY'S HYBRIDS

IOWA 939

A hybrid with a wonderful record. Won the Banner Trophy two years in succession as the corn with the highest performance score in the official Iowa State Yield Contest. Adapted to a very wide range of soils and climate. Widely grown from Nebraska on east to the coast and from northern Iowa south to the Ohio river. Especially adapted as a main crop corn to sections similar to the northern half of Iowa and to sections where less fertile soil types and dry spells require a corn that will mature in about 105 to 110 days.

It is a single ear hybrid. Medium rough type Kernels thicker than the average and soft so they can be readily eaten. Color deep yellow with reddish tinge on sides of kernels. In Nebraska it was the best yielder for a 6 year period. Colorado official yield averaged 132.1 bu. per acre for 3 years. Tops in central Penn. Illinois yield 107.8 bu. Top early hybrid in Ohio. Fine in West Va. and New York. Shortly before going to press Claude Nash of Stevensville, Michigan, writes, "I have been growing your hybrid corn for 3 years and your 939 is excellent." He sends a photo of himself and a write-up by his local paper showing a yield of 149 bu. per acre as found by his County Agent. You can't go wrong with this time tested hybrid.

FLAT
\$7.00 BU.
ROUND
\$5.50 BU.

The earlier hybrids as a rule do best in the south when planted late

BERRY'S U.S. 35

About 110 Day Type

This hybrid has three of the same Inbreds used in making U. S. 13. Change of the 4th inbred makes a definitely different variety. The kernels are just as soft or perhaps a bit softer. The grain is just as deep. Maturity a little earlier. It has a high shelling percentage. Ears are slightly more tapered than U. S. 13. Ear droppage is less. Color of grain a little lighter. Ears somewhat lower on the stalk.

We consider it superior for machine husking but it is not difficult to shuck by hand. The stalks are strong. It stands up well and resists heat and drought. You will find it an excellent variety for its yields are exceptionally heavy and will give you both quality and quantity production.

We consider this variety adapted to all sections having conditions similar to eastern Nebraska, Kansas, South Central and Southern Iowa and Northern Missouri. It is widely grown throughout these sections and on east to the Atlantic coast. Makes a fine corn further north for ensilage and further south where early maturity is desired. It is a time tested Hybrid that has proven itself one of the best.

FLAT
\$7.00 BU.
ROUND
\$5.50 BU.

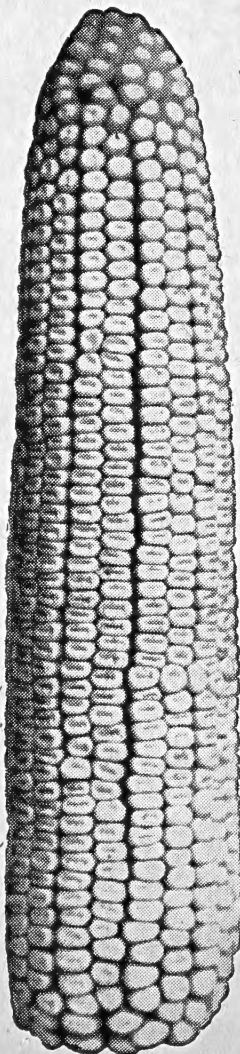

HYBRIDS for Ensilage

\$4.25
PER BU.

Farmers from many sections and especially from Wisconsin, Minnesota, Michigan and other states where a lot of corn is planted for ensilage have said, "we would like to put in hybrids for ensilage but the seed is so expensive." They recognize the extra grain yield and the stronger stalks as a big factor in ensilage corn as well as for mature grain. Some have used hybrid seed in spite of materially higher seed costs.

Now you can plant hybrid as cheap or cheaper than open pollinated corn. We have some special grades of hybrids in the round grain that are admirably suited for ensilage planting. They will grow just as well and produce just as much as flat grain corn. In fact we consider it is better for early planting and that it will withstand more unfavorable weather in the spring. You might have to get plates for planting but you get the corn at a big discount.

You can select from any of the varieties on pages 3, 4 or 5. Just state variety wanted and that you want **ENSILAGE GRADE ROUND**. Figure it at only \$4.25 per bu. Seed is graded for accurate planting and is of guaranteed high germination.

BERRY'S GRADES and GUARANTEE

Our Hybrids Are Chemically Treated

This seed is first hand sorted, then dried and shelled. Then it passes through six machines. First the extra large and extra small is removed. Then the kernels are graded for thickness, for width and for length. Next another special machine takes kernels of the same size and grades, then for weight to remove light or chaffy grains. The next step is the application of a chemical dust. This kills diseases that might be prevalent especially in a cold wet spring. We guarantee our seed to germinate 90% or better. It is generally 94 to 96%. You can have 30 days to make any test desired. Write for shipping instructions if you are not completely satisfied. We will promptly refund the purchase price plus freight.

Round Grades for Best Yields

Our tests show that medium and large round kernels make the strongest stalks and tend to be superior to average flat grades in yield per acre. This apparently is due to the greater supply of plant food in the kernel. This helps give the plant a better start. This seems particularly true with unfavorable conditions at planting time. Our tests also indicate that all round grains seem to germinate better when cool weather follows planting. If your planter does not have proper plates they can be secured at reasonable cost. The saving on one bushel will more than pay for the plates. Get started planting round grains. You'll like it—Save Money—Get Big Yields.

J. F. SINN

President
Berry Seed Company

A farmer by birth and early training. A man who has had 40 years of experience in the seed business. Recognized as one of the foremost men in the farm seed trade. He strives to give our customers better seed values.

He is always at your service and glad to help you with your seed problems.

He has something special for you on Hybrid Corn and low prices on all seeds.

SAVE MONEY on QUALITY SEEDS EVERY POUND GUARANTEED TO PLEASE

Dear Friends:

January 10, 1945

We are now entering the fourth year of war and we are all looking forward to peace, but before we can realize our wishes many hard battles will have to be fought. Part of the seed business is under OPA and while this may prevent runaway prices it also prevents the Seed Trade in obtaining sufficient supplies of the short crops such as Alfalfa, Alsike and Sweet Clover, and again we may find ourselves short of Red Clover although the crop was very satisfactory. I do want to emphasize the shortage prevailing, especially in Alfalfa, as no seedsman is able to obtain a sufficient quantity to take care of anything like a normal trade.

It is with pleasure we report one of the best crops of Hybrid Corn that we have ever raised and the quality is extra fine owing to not having any severe weather until after it was all in the dryers. We have a fine selection of the best varieties and our prices are very low so you are assured of extra good seed stock and at money saving prices.

Garden seed will again be in big demand. The War Production Board is asking that everyone who can, grow a Victory Garden again this year. Canned fruits and vegetables cannot help but be short, so your best assurance of having this food for your table will be by growing it. We have a nice supply of garden seed and think we will be able to take care of all orders. On Nursery Stock there will be quite a shortage on many items so do not delay ordering.

You will find our prices considerably under ceilings on such items as Clover, Sweet Clover, Timothy. Other items that are not under OPA are priced with the thought of giving our customers a real bargain. We guarantee the quality of seed shipped and anything you buy from the Berry Seed Company must be satisfactory or you can return it and have your money refunded plus transportation charges.

I have been in the seed business nearly forty years but I never experienced a time when it is more important for the customer to get in his order early, so for this reason I would ask that you act promptly upon receipt of catalog. The labor shortage is a problem but our biggest problem is to get sufficient supplies to fill all orders. As a friend, I will repeat that to serve you best and protect your own interest, you will be wise if you send your order in without delay.

Yours for biggest values,

Greens Fork, Ind.
Dear Sirs: Have bought several thousand dollars worth of seed from you. Have always found them prompt and reliable and have saved myself and neighbors several hundred dollars, always obtained seed of high germination.
D. W. HARRIS

Springville, Iowa
Gentlemen: The Marvellous Mixture of grass seed that I have been buying from you for several years is the best. I have been getting good returns for my money, and can heartily recommend to others desiring good seed.

Yours truly,
C. F. BUTLER

Mount Clare, W. Va.
Dear Sirs: I have been using your farm and garden seeds for some years and find them real money savers. Your descriptions and recommendations are accurate and reliable. Your courtesy and efficient service lead me to recommend you to all who wish to get the best seeds at a minimum cost. For purity and vitality your seeds are unsurpassed.
Truly yours, G. W. CONLEY

New Berlin, Ill.
Gentlemen: I have been buying seeds from Berry's for 24 years. I have lately club ordered my seeds, inducing my farmer friends to order with me. I have bought over \$18,800 of seeds from you in one year. Not one farmer returned a bushel. Always better than expected. I always save from \$4.00 to \$7.00 per bushel by ordering from you. I find your World Brand the very best buy.
J. W. GERHARDT

Hummelstown, Pa.
Dear Sirs: I have found your seeds OK and you have saved me lots of money. Your Lot me wonderful results. I sent you a photo showing the fine big growth. I am well satisfied with all dealings I have had with you.
Yours truly,
DANIEL BEHRENS

LOWEST PRICES

from WORLD'S LARGEST SEED HOUSE SELLING DIRECT to YOU!

Picture above gives a view of our main office, cleaning plant and storage for grass and clover seeds. The picture to the left is our corn dryer, and grading plant at Clarinda. There are several other buildings not shown.

TESTED QUALITY

Mr. L. C. Jorgenson is our analyst and has had 27 years of experience. He secured his training through U. S. Government at Washington, D. C.

The test tags attached to shipments of seed show the results of the purity and germination tests of a composite sample of the lot of seed from which shipment is made. This sample is obtained by taking small quantities of seed from different portions of the lot. These are mixed thoroughly so as to make the composite sample as representative as possible of the entire lot of seed. A portion of this sample is taken to make the purity and germination test. That is the general method of testing seed and is followed by ourselves. In most cases the analysis is our own but occasionally we use the analysis furnished by the party selling us the seed. It is our aim to attach such test tags to all shipments made. Sometimes a tag will be missed or lost from the shipment but in such case a test tag may be had upon request. Individual bags may vary from the lot test.

New Federal Seed Law

Gives Added Protection to Mail Order Buyers

A new Federal seed law requires that all seed shipments in interstate commerce be tagged in accordance with the laws of the state into which it is shipped in respect to any noxious weed seeds. In addition the purity and germination tests are to be given. Thus shipments of seed ordered by mail are required to give you truthful information and correct tests on all state and interstate shipments.

Good Service—Clarinda Shipment Only—Safe Arrival

This year due to labor shortages in Chicago we are making shipments from Clarinda only. We are making our prices f.o.b. Clarinda lower so as to equalize freight charges between these two points. Therefore it will cost you no more to have shipment come from Clarinda. There is not as much congestion of traffic at Clarinda during the spring and we ship mostly in full cars to eastern distributing points. That assures fast delivery and in the end means better service and lower costs for our customers.

If you want a receipted invoice ask for it on your order.

Service on Seeding Problems

Perhaps you may be undecided as to what you should sow. You may desire further information on some crops. Possibly you have a farming problem that is hard to solve. If so, write to us. We may be able to help you. Our vice president and secretary, Mr. Joe Faassen, has made quite a study of farm crops. He is always glad to help whenever he can. His services are at your disposal. Feel free to write at any time.

Cleaned Seed

The seed we sell our trade is not as it comes from the grower. It is cleaned and graded either by ourselves or direct through our buying connections. Seed cleaning and grading requires experience and equipment. Often it is necessary to run seed over different kinds of cleaners to get the desired results. Careful adjustments and expert operation are needed to do the best work. This applies also to grading for not all grades are of equal quality. The size and weight of berries as well as color enter into making grades. Our aim in cleaning or in buying cleaned seed is always to give the customer the greatest possible seed value at the price he wants to pay.

GUARANTEE

We guarantee that our prices are lowest, considering quality. If upon receipt of your order you are not entirely satisfied you can return it and your money, plus transportation charges, will be promptly refunded. Or you can keep it 60 days and have the seed tested in order to satisfy yourself that the quality is good and that you have saved money and secured a big bargain. Then if you are not pleased you can return it, and have all money, including freight paid, refunded. You must be satisfied and we guarantee to save you money.

We also guarantee to replace, free of charge, any garden or flower seed that fails to grow on account of poor germination. Our nursery stock is guaranteed to arrive in good live planting condition or it will be replaced free of charge. Our guarantee protects the buyer and is lived up to, so it means just what it says.

PRACTICE of
THOUSANDS
of GOOD
FARMERS

OUR CUSTOMERS REPORT
SAVINGS up to 40%

BERRY'S SEED GRADES

World Brand

This is our Extra Fancy grade. It is our purest and highest testing stock. For years it has been the choice of our most exacting and critical trade. We recommend this quality to those who demand the best and invite comparisons to any highest quality grade sold by any dealer.

Dealers Fancy

A high quality. Not quite as fine as the World Brand. It is still a very desirable grade and will pass for the best in many cases.

Planet Brand

This extra choice grade satisfies many customers. Not quite so bright and uniform but they report good seedling at low cost.

Square Brand

Our lowest priced grade. Smaller berried. A little lower germination but more seeds per pound, so it can perform well.

Special Lots

Some seed does not exactly fit into a regular grade or is secured for special prices. These are listed by name such as Lot Leader Red Clover, Honest John Alfalfa, etc.

Parcel Post Rates

Any package up to 70 lbs. in weight and not exceeding 100 inches in length and girth combined can be sent by parcel post. If you want anything shipped by parcel post that is not quoted postpaid be sure to remit to cover postage.

First find the zone you are in and then figure the amount of postage from the following table:

	1st	All Additional
Lb.	Costs	Pounds
Zone 1	10c	1c
Zone 2	10c	1c
Zone 3	10c	2c
Zone 4	11c	3½c
Zone 5	12c	5½c
Zone 6	13c	7c

For example, a 10-lb. package to the 3rd zone costs 10c for the first pound and 2c a pound for the next nine pounds. 10 + 18 = 28c total. For short distances or for small packages parcel post is cheaper. Otherwise express. Freight, of course, is cheapest excepting on packages of 35 lbs. or less.

A WORD ABOUT PRICES

The government has established price ceilings on some seeds like Alfalfa, Red Clover, Alsike, Sweet Clover and Timothy. These ceilings are based on purity, germination, weed content, etc., and include freight charges from producer to retailer.

Some of these seeds are so short that most dealers will unquestionably price them at top ceiling prices. You will find Berry prices on the average of the seeds covered by ceilings to be below the top limit that may be charged under government regulations. Thus you are assured of savings that are worth while.

A more important matter than prices will be the question of getting what you need. The prices given in this book will probably not vary a great deal. It is entirely probable however, that the stocks we have now will not last throughout the season and that they cannot be replaced at all. Some may be obtainable but if so we know we will have to charge the full ceiling prices because of the higher cost to us.

By ordering early you will have better assurance of getting what you need. You will have the season's lowest prices and you will have the seed on hand in plenty of time for your needs. Let us take care of your needs now.

HOW TO ORDER

It is easy to order by mail. Use our regular order blank form if you have one. If not, you can use any kind of paper or we will send you order blanks.

Give full name and complete address. Tell where you want the seed shipped to and whether to ship by freight, express or parcel post (see to left for postage rates). If your freight station is different from post office be sure to say so. In case there is no agent at your freight station, then include freight charges in your remittance or let us ship to the nearest station where there is an agent.

Figure up the cost of your order according to latest catalog or price list.

Some lots or grades of seed may become sold out. Whenever possible we ship exactly as ordered. Otherwise unless you specify "No substitution" on your order, we ship the next nearest grade or variety and either refund the difference in price or bill you for the difference if a higher priced lot is shipped.

Send your remittance with your order. You can send this in the form of a Postal or Express Money order, Bank draft or your own personal check on any going bank where you have funds to cover. Do not send stamps or coin when convenient to remit otherwise. We advise registering letters containing currency.

Address all mail and orders to Clarinda. We have discontinued Chicago shipment. If you want an A.A.A. receipt, ask for it on your order.

NORKAN "New Early Atlas"

Excellent for Grain or Fodder

Norkan is really a cross between Atlas and Early Sumac cane yet it bears a close resemblance to Atlas and one authority says it may be described best as an Early Atlas. It has the earliness and tonnage of Early Sumac and the palatable white grain of Atlas. The plants are medium early and medium tall, sweet and juicy. Makes a good forage variety especially for sections further north. Since the grain matures earlier it is ready for ensilage or forage quicker. This is very desirable as the best silage is secured if cut when seeds are in the hard dough stage.

Norkan is not quite as tall as Atlas but will grow 8 to 10 ft. tall depending upon location and soil. It is heavily leaved and being somewhat finer stemmed it is easier to handle.

Atlas Growers Switching to Norkan

The grain yield of Norkan is fully equal to Atlas Sorgo in grain production. Tests at Lincoln, Nebraska, show Norkan superior in yield of grain producing 55.8 bushel per acre. The reason many Atlas growers are switching to Norkan is that it is two weeks earlier and they have therefore greater assurance of getting a crop of mature seed. As mentioned above the earlier maturity of grain is of added value when the crop is wanted for forage or ensilage as more mature grain improves the quality and raises the feeding value. One of the biggest Atlas growers in Nebraska said this past fall he was going for Norkan from here on because it was earlier and easier to handle.

Suitable to a Wide Area

Many of our customers live east and north of the regular grain and forage sorghum section yet find big profits in growing these crops such as Atlas and Hegari. If you live north of the Missouri line and east of Lincoln, Nebraska, we strongly urge you to grow some Norkan. Farther south the Atlas may have some superiority because of its somewhat taller growth. For these other areas we advise Norkan because it is so much earlier, more certain to mature grain and still very satisfactory in fodder growth. Even if you are located quite far north or in sections requiring very early maturity Norkan should make excellent silage and forage. Livestock is very fond of this juicy sweet stemmed feed both in green and dry stages. Its heavy yields will give you a lot of food per acre. It is a big money crop yet economical to plant. Plant as suggested for Atlas. Regular corn rows 10 to 12 lbs. per acre. Double row 20 to 25 lbs.

\$2.50
BU.
50 LBS.

ATLAS SORGO

THE HEAVIEST PRODUCING SWEET SORGO

This is one of the most sensational forage crops ever developed. An enormous producer. Yielded up to 18.7 tons per acre where corn yielded half as much. In dry seasons out produced corn 3 to 1. Nebraska and other states report it the heaviest forage producer.

A matchless drought resister. Corn if it is severely injured by drought will stop growing. Atlas will start again. In sections where drought completely dried up corn, Atlas remained green. Where grasshoppers almost completely wiped out a corn field an adjoining field of Sorgo was practically untouched.

Atlas makes a highly palatable and very nutritious feed. The juice is sweet and live stock, especially cattle, will leave most any kind of feed to get it. They thrive on it. In dry seasons farmers have brought their livestock through with nothing but this feed and had them fat and sleek in the spring. Makes wonderful ensilage.

State Certified or Grown from Certified Seed

There are many varieties of sweet sorgo but we consider Atlas the most profitable to grow. Compare the growth Atlas with Hegari as shown in the pictures on this page. All pictures were taken near Clarinda on the same day. The Hegari was on second bottom the Atlas on upland. Why grow a crop that grows 5 to 6 feet when you can get 10 to 12 feet. Atlas makes a leafy, sturdy growth. Very resistant against lodging. The white seed is very palatable.

The State Certified seed is priced above. The seed grown from Certified seed is about 75c per bushel cheaper. Both are high quality lots. Shipment guaranteed entirely satisfactory.

Atlas must have a warm seed bed. Drill it in with seeds 4 to 6 inches apart, 8 to 12 lbs. per acre are used for single row planting. Cut in fall a little before severe frost. Shock to cure.

**WONDERFUL for PASTURE
and HAY**

Sudan Grass

**SPECIAL PRICES ON
LARGE QUANTITIES**

100 lbs., \$8.00; 300 lbs., \$22.25

GROW IT THIS YEAR

Prices Drastically Lower

We are giving our customers an extra measure of value in high quality Sudan Grass seed. Costs only about half as much as last year when retail prices were as high as \$15.00 per 100. At our present low price you can afford to sow it liberally. Only \$1.20 an acre at 15 lbs. per acre. It is the most economical as well as the most productive of this type of forage crop.

A Most Profitable Crop

This valuable, quick growing, heavy producing grass should be grown on every farm. Produces enormous hay crops. Makes fine pasture during hot summer months. If you are needing a big hay or pasture crop this year be sure to sow Sudan. It is a sure crop and easy to grow.

Description

Sudan belongs to the cane family but is finer stemmed and a free stooler. Grows 4 to 7 feet high and yields 4 to 10 tons of cured hay per acre. Livestock is very fond of Sudan. It has good feeding value. First hay crop can be cut in about 60 days after seeding and second and third crops 30 to 40 days apart.

Sudan is one of the best drought resisters known and supplies an abundance of fine pasture or hay during the hot dry months of the summer when feed is often scarce. That's why every farm should have some of it. It has been a life saver to thousands during the past few years.

How to Handle

Sudan is a warm weather crop. Do not sow until corn planting time or after. Prepare a good seed bed as you would for corn. Drill in close rows or broadcast. Cover seed about an inch deep. Sow 20 to 25 lbs. per acre. You can begin pasturing when 6 to 8 inches high. Cut for hay when in bloom, although you can cut earlier or later without damage or loss.

A Saving Guaranteed

The true basis of value at a bargain price is the quality you receive. We will sell you this seed subject to any test you care to put it to. You can have up to 60 days to satisfy yourself that you have secured a quality lot at a bargain price. We guarantee to save you money on our Sudan Grass. If this seed fails to please you in any way let us know and prompt adjustment will be made in conformance with our guarantee.

It is easy to grow Sudan Grass when you use seed of such fine character. We urge you for the sake of better farm profits to grow some of it this year. It produces enormous quantities of feed in a short time. It keeps right on the job when heat and drought are damaging other crops severely. You get good bargains by buying now.

Rockwell City, Iowa.

Gentlemen: I have been a customer of yours for several years. Your Red Clover seed is a wonderful producer. Your Dakota No. 12 Alfalfa, both in price and quality, has given me the best of satisfaction.

Yours respectfully,
S. G. FOWLIE.

\$4¹⁰
BU.
50 LBS.
NEW CROP
SEED

BILLION \$ GRASS

A tall growing variety of Millet. Yields up to 26,000 to as high as 50,000 lbs. of green feed per acre have been produced under favorable moisture conditions. Seed yields of 1,000 to 2,000 lbs. per acre are reported. Does not stand heat and drouth as well as Sudan. Photo above shows yield in a dry year in southern Iowa. This crop is grown in Iowa and states to north and east including the New England states.

It is a fast growing crop making hay in 6 to 8 weeks. May be sown during May, June or July. We recommend 20 lbs. of seed per acre. Will grow up to 6 to 8 feet high on soil of good fertility and not too dry. Makes good feed for cattle and sheep. Widely used for pasture. Does not become poisonous due to drouth or frost.

Seed supplies are short this year as much of the acreage in the largest seed producing sections was put to other crops like hemp. Therefore order Billion Dollar grass seed early.

Price 100 lbs. \$7.00; 50 lbs. \$3.60; 25 lbs. \$1.90.

A Remarkable Permanent Grass of Great Value

Here is a crop that can really "go to town." It's a remarkable crop in many ways and in a class by itself. It grows on extremely wet land, stands a lot of overflow yet withstands drought amazingly well. You should have seen it at the Iowa Experiment Station on upland one dry year. It stood out like an oasis in a desert. Farmers who came to look at the experimental field would spot it as soon as they entered the field. The Reed Canary Grass yielded 3 tons per acre when it was so dry Sudan made only half a crop. Produces 2 to 3 cuttings a year. No wonder farmers were enthused about it. You would be, too, if you had such a crop on your farm.

Grows 5 to 6 ft. High

You almost have to see it grow to appreciate the value of this crop. It is a very leafy grass. And how it can yield. Up to 3 to 5 tons of cured hay per acre from two cuttings. The second crop is even leafier than the first although not as tall. You ought to hear farmers bragging about its feeding quality. We do not consider it equal to alfalfa in feeding value, but some growers claim it is. They report increased milk flow on Reed Canary Grass. Tests show 9.43% protein in first cutting and 11.76% in second cutting. They like it for pasture. They like it for hay and many make good money out of the seed crop.

Grows from Early Spring Until Late Fall

Lots of times you can hardly wait for spring to come and give you pasture. Reed Canary grass starts on the job real early in the spring and keeps at it until late in

the fall. It is well adapted to pasturing after a good sod has been formed. And what a sod it makes especially on wet land.

Reed Canary grown on land so wet cattle would bog down in it, made a sod so strong it would support a team and wagon.

It is a perennial grass with a long life. In Minnesota a field was used for hay crops for 15 years and then 18 years as a pasture. A government report from the Pacific Coast showed it pastured four dairy cows per acre for seven months of the year.

Widely Adapted

You may ask, "Can I grow Reed Canary Grass?" This grass is adapted to all states from the Atlantic to the Pacific in the entire northern half of the country and as far south as into eastern Tennessee. If you have any low wet land there isn't a better grass you can grow. It will change acres that are worthless into valuable acres—real money makers. But it isn't limited to wet land as the Iowa Experiment Station has shown. It has been a real money maker. Use it for hay, pasture and seed production.

You can get all three in one year. First a seed crop. See below. Immediately after a hay crop and then pasture or hay. Sometimes a third cutting. The water table can be practically at the surface yet Reed Canary grass flourishes and it stands a lot of overflow. Again we would repeat that it also shows marked drought resistance. At the Urbana, Illinois Experiment Station for two years it averaged 5 tons of air dry hay per acre a year.

Postpaid: 1 lb., 65c; 5 lbs., \$2.75; 10 lbs., \$5.00.

How to Grow Reed Canary

It should have a relatively cool season for starting. Both fall and early spring seedings are widely practiced. Use 6 to 8 pounds per acre. Sometimes it is sown late in the fall so the seed will not germinate until the following spring. Be sure to prepare a good seed bed. Make it fine, smooth and get it well packed. Fall plowing is desirable although spring plowing can be worked into a good seed bed. Late fall seeding may be necessary on some poorly drained soils.

Sometimes the seed is sown during thawing weather in the spring. We suggest a light covering and packing it with a roller. About $\frac{1}{4}$ to $\frac{1}{2}$ inch is plenty of covering. If weeds get bothersome clip them back. Seedlings are as hardy as those of Timothy and will stand considerable freezing. The growth is not fast the first year. Second and following years give full and rapid growth.

Profitable Crop

Gordon Aebischer of Chilton, Wisconsin, says, "Hay yields run 1 to 3 tons per acre per cutting." Ordinarily 4 tons per acre in two cuttings. Seed yields range up to 450 pounds per acre. First seeding was in 1931. Have added more since and never had to reseed. Some of the seedling growing it is subject to overflow for as long as six months at a time.

Report from South

Frank Litchske near Enid, Oklahoma, sowed Reed Canary Grass in the fall four years ago. It has been growing continually since. He grazed 20 head of Hereford cattle on 4 acres for 60 days continually and there was still plenty left. He said it also makes good hay and checks soil erosion effectively in that wheat country.

Money in Seed Crop

Reed Canary Grass will produce 100 to 400 pounds or more of seed per acre. Even if the seed should get as low as 10c per pound that produces a nice extra cash income per acre. You don't have to sacrifice a hay crop for it. Good hay is obtained if cut immediately after seed harvest. It is a profitable crop as hay or pasture even if no seed is saved.

High Points in Canary Grass

Grows on very wet land. Withstands drought. Value of seed crop may run as high as \$90.00 per acre basis 20c price. Gives two to three cuttings per acre. Yields up to 4 and 5 tons per acre. Makes fine pasture. A seeding lasts many years. Comes on early in the spring and grows until late in the fall. Adapted to a wide area. It is a money making crop.

SOY BEANS

A Fine Cash Crop

Soybeans are taking their place as one of the important grain crops. They are bought and sold like other grains in many markets. There is no longer much question as to a market for your crop. You can cash in on them like wheat or corn if you do not wish to use them on the farm.

Many farmers do not harvest for beans but rather prefer to take the crop in the form of hay. They produce heavy yields and the hay is of high value being practically equal to Alfalfa in feeding value. No need to be without plenty of rich hay if your clover or alfalfa fails. Sow soybeans. They stand heat and drought and deliver the goods.

Good Profit in Beans

Soybeans are widely used instead of small grain crops and are generally found more profitable yielding up to 25 to 30 bushel per acre. On account of their heavy growth they are not suitable as a nurse crop for grass or clover seedings. Soybeans are legumes. They gather nitrogen from the air for their growth. They have a dense root system and make soils mellow.

The seed we have is cleaned and much more satisfactory and economical than stock containing a lot of split beans. Send us your order for beans. The quality and savings must please you or you can have your money back. See Guarantee Page 8. See also Page 15.

How to Handle Soy Beans

Plant when weather and soil is warm, corn planting time or later. Prepare a fine clean seed bed. For hay broadcast or drill in close rows 1½ to 2 bushels per acre. For seed in 18 to 20 inches apart 30 to 40 lbs. per acre. Cultivate with a harrow while beans are small and dry. Cut for hay when beans are fairly well formed, but before leaves fall. Harvest for seed when beans are practically ripe.

Inoculate Your Seed

Inoculate Soybean and Cowpea seed. That helps to secure a more vigorous growth, heavier yields and higher value. Cost is low. Easy to apply. Full directions furnished.

Postpaid Price Berry's Nodule Germ Inoculator for Soy Beans: 2 bu. size, 30c; 5 bu. size, 45c; 25 bu. size, \$1.95; carton six 5 bu., \$2.60. Also see page 41.

Types of Soy Beans

Dunfield Type. Pure yellow. Heavy seed producer and an excellent hay type. Stands up well. Does not shatter easily. Matures in about 110 days. Medium sized leaves and stems. An extra good all purpose variety.

Mukden. A popular variety. Maturity about same as Illini, 105 days. Seeds about same size, yellow color. Higher protein than Illini possibly a little lower in oil. A good yielder and a profitable variety.

Illini Type. Very popular. Grown for hay north of Central Iowa and for hay and seed south. Medium in stems, leaves and maturity. Grows erect. Color yellow. One of the most profitable varieties.

Kingwa Type. A Black Soybean of outstanding merit and quality. According to all customers reports it is greatly preferred to Wilson Black or Black Ebony both for hay and seed production. Especially valuable as a hay variety. Heavy producer and excellent quality hay.

Virginia Type. Hay bean. Makes large growth with enormous yields of hay. One of the best for poor land.

Seed brownish and smaller than the average. Requires less seed per acre. Prices on Pages 40-41.

RICHLAND SOY BEANS

A tremendously popular early maturing soy bean. Has the strongest stems and is the most lodge resistant of all commercial varieties. Adapted to the richest soils. Not quite as early as the Earlyana described on page 15 but 5 days earlier than Mukden and about 10 days earlier than Illini or Dunfield. A heavy yielder of beans making 30 bushel per acre in Central Iowa over a 4 year testing period. These beans have a high oil content.

The growth of the stems or straw is a little shorter than the average, especially on thin land. Average height in northern and central Iowa about 35 inches. Not as good for hay but a profitable producer of a quality bean crop. Adapted to southern Minnesota, Wisconsin and northern and central Iowa for normal planting dates and fine for late planting in areas further south.

Often times weather and other conditions require late planting and it is then best to choose one of early maturity. It does not pay to select too late a variety further north and risk spoiled beans when heavy yielding varieties like Richlands and Earlyanas can increase your profits. The extra yields much more than pay the additional cost of starting a better moneymaking variety. Have your own seed for a bigger acreage next year and supply your neighbors with seed. See page 41 for prices.

FIELD PEAS

For early hay or green feed nothing equals Field Peas. Can be sown as early as land can be worked. Disc or harrow in 1 to 1¼ bushels Peas with 2 bushels Oats. Cut for hay when oats are in the dough stage. Production is very heavy and feeding value very high. Also fine to plow under for soil enrichment. Crop very fattening. Increases milk production. Excellent for hogs. Solves the problem for early green feed as no other early crop can do. Inoculate Field Peas. Shipment is guaranteed to please you in every way. Crop limited but our prices low. See page 41. If you are going to be short on feed next spring we recommend this crop very highly.

Edwardsville, Ill.

Dear Sirs: I have bought seed from you for several years. I find them to be O. K. in every way. The quality and the germination is very satisfactory. Your seeds produce results. Also your prices are real money-saving quotations. I am well pleased. Yours truly,

H. C. STRASEN.

NEW SOY BEANS

EARLYANA—Finest Early Bean Extra Early—High Oil Content—Top Quality

Two Superior Beans

On this page we offer for the first time two varieties of Soybeans. Each one is so outstanding in its maturity class as to have no equal. Wide awake farmers will want to get started at once with either or both. Plant this year. Have seed for a larger acreage next year and get premium prices for your crop. Neighbors will grab it when they see the crops grow.

Earlyana

For real early maturity, heavy yields, high oil content, high protein and all around a No. 1 performance we know of no bean that will equal it. Adapted to a wide range of soils. Excellent for northern areas and for late planting in the sections like southern Iowa and northern Missouri it is a great bean. Write your State Experiment station or take our word for it and make extra profits growing Earlyanas.

Lincoln

This variety is even more sensational in a way than Earlyana because it competes in a later maturity group like Dunfield, Illini, etc., and far surpasses them in yield and at the same time excelling in percentage and quality of oil. Adapted to sections growing varieties like Dunfield, Illini, etc. Outyields those old favorites by 22% and will replace them. Get started with your seed now. Only one car of State Certified beans at this very low price. Others are asking up to \$6.50 per bushel.

This great variety has given sensational performance. 10 to 14 days earlier than Dunfields, 4 to 7 days earlier than Richlands. A wonderful variety for normal planting in sections similar to the central and northern part of Iowa and in southern Minnesota, Wisconsin, Michigan and all areas having similar conditions. In New York, Pennsylvania, Illinois, Indiana, Ohio, West Virginia, etc. Excellent for late planting in sections further south. Can be harvested early and permit seeding of winter wheat.

They are more lodge resistant than Dunfields or Illini. Lower branches and pods are well above the ground thus avoiding loss in harvesting. Pods contain 2 to 4 beans per pod with about a 3 average as compared to around 2 for Richlands. Does not require as rich a soil. Grows a taller straw, only an inch or two shorter than Dunfield.

It is a heavy bean yielder being fully equal to Richlands and very close in acre yield to the later maturing kinds. On a moisture free basis will average 20% or better of oil which has a high drying quality. The protein analysis is 43 to 45%.

This bean is so outstanding in its yield and quality for an early bean that it is strictly in a class by itself. Start growing this bean this year. Be able to supply your neighbors with seed next year. They'll want it when they see its sensational early performance. We have just one car of State Certified seed. Place your order at once.

LINCOLN—The Sensational Soybean

Already the fame of this new bean is spreading over the countryside. You will hear and read a lot more this year and by next year it will be in great demand.

This soybean has "shown its heels" in yielding ability to every variety with which it has been compared in Iowa for the past five years. Yes, in an average of 61 replicated tests made during the past five years in the states of Ohio, Indiana, Illinois, Missouri and Nebraska, show it outyielding Illini and Dunfield by 22%. It grows in between these two in height and straw and lodges less than either of them.

The seeds are of medium size and high in oil content, about 22%, with excellent drying quality oil

and protein 40% on a moisture free basis. In Indiana tests it outyielded other medium season beans by 10 to 11 bushel per acre and late varieties as much as 6 to 8 bushels per acre.

We consider this bean too late for northern Iowa, but for sections having conditions similar to the southern half of Iowa and northern half of Missouri should find it to outperform any other oil bean. When planted south, later planting seems to give best results.

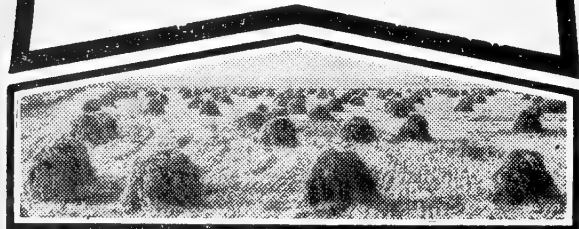

Letters started coming in from customers way last fall asking for Lincoln soybeans. We still have them. Beautiful quality State Certified seed. Let us help you get started with something that is really superior in many ways.

CROPS of SPECIAL VALUE MILLETS

BERRY'S ANNUAL PORK PRODUCER

A rapid growing mixture of legumes, forage and grass crops. Makes a wonderful pasture. Can be used a few weeks after seeding. Very productive. High in protein. Builds big body frames, reduces grain consumption. Makes hogs of marketable size in quicker time. Contains Vetch, Rape, Rye, Barley, Oats, Wheat, etc. Sow 40 to 50 lbs. per acre early in spring. This is a great pasture combination at low cost. See page 41 for prices.

VETCHES

SPRING VETCH

Spring. An annual variety having much the same characteristics as peas. Does well wherever Canada Field Peas are grown. Requires cool growing season. Should be sown early, using 50 lbs. per acre. Grows 3 to 5 feet high. Is quite finely stemmed. Generally sown with a bushel or two of oats and the two cut together for hay. Grows rapidly, yields heavily. Excellent feeding value; high in protein. Produces a wonderful early hay crop. Makes best hay if cut when in full bloom. Does not live over winter.

Scotia,
Nebr.

Dear Sirs:

My father started buying seeds from you in 1898 and I have used Berry's seeds for the past 15 years. Have never had a complaint. You have always satisfied me and saved me money.

Yours truly,
CHAS. KEOWN.

SAND OR HAIRY

Also called Winter Vetch. May be sown spring or fall. Lives over one winter. Use 20 to 25 lbs. per acre. Can be sown with spring grain and pastured some in fall. Remains green for a long time. Excellent cover crop. Fine soil builder. Good yielder. High feeding value. Inoculate all Vetch seed. See Pages 40-41.

GERMAN OR GOLDEN TYPE

This is that beautiful, heavy growing variety that makes such wonderful production. Its leafy growth is 4 to 5 feet tall. Yields up to 4 to 5 tons per acre and seed yields of 40 to 50 bushels. The feeding value is fine. It is one of the most popular varieties of millets and very widely grown.

This crop can be sown any time after corn planting until the latter part of July. Sow 40 to 50 lbs. per acre for hay production; 25 to 30 lbs. per acre for a seed crop. Our seed is secured from good sources and we guarantee shipment to please you. See page 41 for prices.

WHITE WONDER TYPE

This runs our Golden Millet a close second in popularity. Many think it is better. It has a dense foliage and broad leaves. A wonder for production. Matures early in spite of its big size. It has long heavy seed heads and is a good seed producer. Color of seed is white. Makes excellent hay if cut just when seed heads are beginning to form.

Millets make an excellent "catch crop" or to give an extra crop after an early maturing one has been taken from the land.

SIBERIAN OR EARLY RUSSIAN TYPE

Two to three weeks earlier than German. Can be sown later but does not yield as much. Hay is of very fine quality. Grows 2 to 4 feet. Seeds reddish brown. Sow 35 to 50 lbs. per acre.

PROSO-TYPE MILLET

Also Known as Hog Millet—Broom Corn Millet and Russian Wheat.

This Millet is grown almost exclusively for seed. A very prolific producer. Seeds are larger than other millets. Makes fine feed. It is used in some countries for human food. Equal to Barley in feeding value. Makes extra fine poultry feed.

Proso is a heavy seed producer, yielding up to 60 to 70 bushel per acre. It matures in sixty to seventy days. Makes a good cash crop. Needs warm weather and soil for quick germination. Sow 40 to 50 lbs. per acre. Drill in close rows or broadcast.

The demand for this seed has increased very rapidly in the past few years. Order as early as possible.

DWARF ESSEX RAPE

Reduces Pork Production Costs
Enormous Producer—Grows Quick
See Page 41 for Prices

One of the greatest of all quick growing forage pasture crops for the corn-belt. Can be pastured within six to eight weeks after seeding. May be sown from early spring until mid-summer. Equal to alfalfa in feeding value for hogs and sheep and also good for calves, cattle and horses. Cuts down on amount of grain required and gets hogs ready for market quicker. In tests at the Iowa Experiment Station Rape pasture cut down more on grain consumption and tankage than Alfalfa and carried more head per acre.

Rape under favorable conditions yields 40 tons or 80,000 lbs. of green matter per acre. On a dry basis it analyzes as high as 37% protein. It is also high in calcium and phosphorus. Superior to alfalfa and clover as a corn balancer. Endures trampling and grazing if not eaten too close to the ground. Provides pasture from early spring until the ground freezes in November.

Sow alone in spring or with oats and pasture when oats are removed. Also good to sow in corn at last cultivation. Use 5 to 6 lbs. of seed per acre. Grows on many soils. Does best on fertile well drained loams. Not so well adapted to sandy or stiff clay soils.

Our seed is produced from Genuine Holland Dwarf Essex seed stock and guaranteed the finest obtainable in the U. S. Rape seed is a very short crop this year. See page 41 for prices.

Small lots 5 lbs. postpaid \$1.75

CANE

A Leading Forage Crop

A crop that is rich in sugar and fat and very palatable. An enormous yielder producing from 10 to 15 tons of excellent green feed on rich land. A most remarkable drought resister. Especially valuable in dry hot seasons. Makes a wonderful hay crop when sown at the rate of 75 to 100 lbs. per acre.

Some farmers get cash out of their ordinary hay crops and use cane for their own feed supply. A few acres of cane will make as much hay as many acres of Timothy. Your live stock will relish cane hay and fatten on it. You can also pasture cane or cut it for green feed. Makes excellent summer and early fall feed. It is also used for ensilage. Cane is also a good seed producer, yielding 30 to as high as 60 bushels per acre.

How to Handle

Sow quite heavily for hay or pasture, 75 to 100 lbs. per acre. Heavy seeding makes a finer growth and therefore easier to cure. Do not sow until corn planting time or after. It is a warm weather crop. Drill in close rows, or broadcast. Cover about an inch. Can be cut and cured like ordinary hay. Takes a little longer to cure than ordinary grass hay.

Early Amber Type. The kind most generally grown and of great value because of its splendid growing qualities.

Early Orange Type. Heavier stalks, more abundant leaves. Head more compact. Heavier yielder but a little coarser.

CANE for MOLASSES

To make good sorghum, seed must be pure and we take care in getting this seed direct from sorghum producers. We do not guarantee the crop, but we consider our seed equal to if not superior to any on the market.

Red or Orange Type. Secured by us for Molasses purposes from local growers who make sorghum. We know this sorghum or molasses is of excellent quality both as to color and flavor and we believe you will be highly pleased with it. It is juicy and is the choice of most sorghum makers in this section.

Price, 1 lb., 30c; 5 lbs., \$1.00, postpaid. Not prepaid, 5 lbs., 75c; 10 lbs. or more, 11c per lb.; 50 lbs. or more, 10c per lb.

KALO

This is Early Kalo. A drought resistant grain sorghum. Heavy in production. Becoming very popular in sections outside regular grain sorghum section because of its fine quality and wide adaptability. See page 41 for prices.

BERRY'S Special GRAIN and HAY CROPS

KAFFIR CORN

Our Kaffir type grain sorghum is used to some extent for hay. Stalks less juicy than cane and not sweet. Stands lots of hot dry weather. Makes fine poultry feed and suitable for all kinds of live stock when ground. Produces up to 40 to 50 bushels of seed per acre. For grain drill in rows 30 to 40 inches apart using 6 to 8 lbs. of seed per acre. For hay drill close or broadcast 75 to 100 lbs. Cut off heads, cure 10 days to 2 weeks, then thresh. The use of Kaffir corn is on the increase. While it has always been a main crop in sections subject to drought, farmers in the regular corn-belt are planting at least small acreages. They like it especially well for winter poultry feed. You can produce a lot of feed on a few acres and the seed cost is low.

See page 41 for prices. Small lots, postpaid: 1 lb., 20c; 5 lbs., 75c.

SEE
PAGE
41
for
SALE
PRICES

HEGARI

Our Hegari Type sweet sorghum is somewhat similar to Atlas (page 11), but does not grow as tall. Very nutritious. Valuable for grain, dry fodder, ensilage and pasture. Yields up to 5,000 lbs. of grain per acre and up to 18 tons of ensilage. Live stock especially cattle are very fond of it due to its sweet taste. It combines the grain production of Kaffir and Milo with the high forage value of cane. For grain production drill like Kaffir 6 to 8 lbs. per acre. May be double rowed using double the amount of seed. For hay drill in close rows at 75 to 100 lbs. per acre. Postpaid 5 lbs. for 75c. See page 41 for quantity prices.

BUCKWHEAT

A quick growing grain crop. Matures in 10 to 12 weeks. Excellent catch crop. Sometimes sown after small grain so as to get two crops from the land. Good cover crop for orchards. Makes land mellow. Good for bee pasture.

One of the best crops for very poor soils. Responds to increased fertility. Does not like lime and should not be sown on very wet land. Can be grown most anywhere north of the cotton belt. Prefers cool weather, especially at blooming time, but is sensitive to frost. Prepare a good seed bed. Sow 3 to 4 pecks per acre. Yields up to 50 bu. per acre depending on conditions. Clarinda-Chicago Prices Page 41. Postpaid, any of above crops. 1 lb. 20c; 5 lbs., 75c.

MILO MAIZE

Our Milo Maize type grain sorghum is similar to Kaffir. The stalks, somewhat more pithy, are considered one of the best drought resisters. The grain makes fine feed. White in color. Follow suggestions given for Kaffir in planting. Milo is a good yielder. Widely used for Chicken feed. It is grown in place of corn in sections of extreme drought. Farmers who have grown these grain sorghums generally want at least a few acres. See page 41 for prices. Small lots postpaid 1 lb. 20c; 5 lbs. 75c.

The Famous

TAMA

SEED OATS

DISEASE RESISTANCE

This Tama oat is outstanding in its ability to resist the four leading oat diseases. These are Crown or Leaf rust, Loose Smut, Covered Smut and Stem rust. Its resistance to stem rust is especially valuable because this disease breaks out severely every three or four years. It is a serious menace to most oats.

They are also resistant to some types of blight and in this respect excel the Boones. They are top quality. Start this new variety and you have one of the best. This isn't like Hybrid corn that you buy every year. Start them now and you have solved your oat problem with profit for many years. Show your neighbors something about raising oats. You'll probably be in the seed business yourself next year selling your crop of Tama oats at premium prices.

ADAPTABILITY

These are quite early in maturity. They have a strong stiff straw and stand up much better than most early kinds. Kernels are well filled. Color has a yellow cast. We consider these oats excellent for nearly every part of the country where spring oats are sown. We don't believe you can beat Tama. In southern Iowa they are exceedingly popular and replacing Columbia, Fulghums. This indicates their adaptability in the southern spring oat section. Naturally they are fine either east or west where similar conditions prevail. They are doing well in Kansas, Nebraska, South Dakota, Iowa, Minnesota, Missouri and on east to the Atlantic seaboard, including the New England states.

SENSATIONAL YIELDER

Top Yields—Finest Quality

The Tama Oat has outsold all of the new varieties this past year and from early sales indications are it will be the most popular of all these superior varieties. Its resistance to blight as well as rust and smut shows an improved character that means bigger yields and finer quality. All of the oats on these two pages are selections from the same cross but the Tama is now leading in popular favor as it seems to yield at the top under many varying conditions.

Early maturity, strong straw that seldom lodges, disease resistance and plump solid heavy grain makes for big high quality yields. It is a leader because it has superior quality and performance.

Wide Adaptability

A three-year test in Illinois shows the wide range of territory to which Tamas are adapted. There is a lot of difference in conditions between the northern and southern part of this long state. In the northern section was at the top of all commercial varieties being excelled only slightly by Vicland and Boone. In the Central section Tamas out-yielded all others and in the south this was also true even excelling Vicland and Boone by as much as 30%.

A Hybrid Selection

The Tama oat is a selection from a Hybrid between Victoria, a South American oat with wonderful disease resistance, and the Richland, a heavy yielder. This combination makes it a wonderful heavy yielding, disease resistant variety. We urge you by all means to get started with these great oats for you should find them very profitable and satisfactory. Better quality and Bigger Profits. Prices "Certified" seed: 25 bu. or more, \$2.00 bu.; 10 to 24 bu., \$2.05; smaller lots, \$2.10 bu. Non-Certified: 25 bu. or more, \$1.50 bu.; 10 to 24 bu., \$1.55 per bu.; Smaller lots, \$1.60 per bu.

See page 41

HIGH QUALITY SEED STOCKS

The Certified seed we price in the Boone, Tama and Vicland oats is seed that has been grown under state supervision and for which the growers have complied with all regulations and paid all fees. The non-Certified comes from originally and for all practical purposes is equally satisfied stock and for all practical care to go through the "red-tape" necessary for Certification. Both kinds have been thoroughly cleaned, are equally high in germination and both will produce the same big yields and be alike in disease resistance.

SENSATIONAL VICLAND

A GREAT DISEASE RESISTER

An Amazing Yielder

The Famous Wisconsin Cross

This wonderful oat has the same parentage as explained under Tama on page 18. This particular selection was originally produced in Wisconsin and its fame is about as wide spread as Boone and Tama. In reports we have received from various states the Viclands and Tamas are neck and neck in performance. Some rate Vicland as two days earlier about 3 to 6 bushel heavier in yield and a little taller straw. This should therefore make it a little better suited to thinner soil. Official state yield records show yields of Vicland of more than 100 bushel per acre over an average of three years. State after state reporting on Vicland rates it as a top ranking spring oat with big yields of top quality grain.

Characteristics

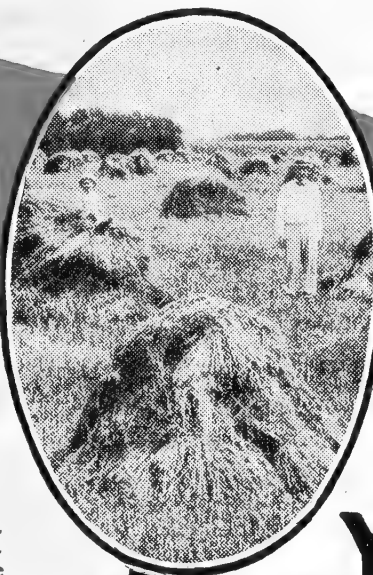

The Vicland have the same resistance to disease as explained for the Tama. The straw is equally strong and a little taller. The quality of the grain is equally fine. This variety is recommended highly for all of the spring oat section which of course includes all of the northern states.

When sown in the winter oat sections like the states of Kentucky, Arkansas, etc., they will generally excel other spring sown varieties such as the Columbia. Naturally the big acreage is farther north and it is there that their extra yield and finer quality make them so much more profitable. They are as early as the Gopher. Minnesota tests show that in normal years it will outyield these once popular Gophers by 15% and in bad rust years they outyield them by 50% to 100%.

Tremendous Demand

Reports on Vicland yields and quality seem to have spread by word of mouth throughout the corn-belt and there has been a great increase in the demand for this variety. We have tried to provide for these increased orders by securing additional stock of fine northern grown seed. Just how long this will last in face of the big demand we cannot say but can take good care of early orders and hope to be able to fill them until spring. We advise early orders.

Price of Vicland oats same as Tamas on page 18.

SEED OATS

HEAVY YIELDING BOONE

An oat with a record of yield that few can equal. An official Illinois test shows 104.4 bushel per acre. In Iowa for an average of six years of eighty bushel per acre. Whenever you get an oat that will yield like that over a six year average you have a good variety to choose as your main crop oat. It is a selection of a cross that produced all four varieties we handle and rates high in the characteristics that make these oats so profitable to grow.

A high degree of resistance to crown and leaf rust and loose and covered smut. In years when these diseases are common Boone oats are at their best. In normal years they also outyield. Their very strong straw makes them suitable to the richest land. That does not mean however, that they are only for rich land as Boone Oats are popular on a lot of soils and adapted to a wide area.

These oats will not "run out" if you will keep them free of mixture with other oats and grains and by screening your seed and sowing good plump stock you should get top yields for years to come. All of our seed is new crop, re-cleaned, tested and guaranteed.

Price Certified seed 25 bu. lots or more \$2.00 per bushel; 10 to 25 bu. \$2.05 per bu.; less than 10 bu. \$2.10 per bu.

Non-Certified 25 bu. lots or more \$1.40 per bu.; 10 to 25 bu. \$1.45 per bu.; less than 10 bu. \$1.50 per bu.

CONTROL OATS

In yield, quality and disease resistance they rank at the top.

We are fortunate in having this variety established at the Clarinda institution. Farmers around here are enthusiastic about them. With a local supply we can select our seed stocks from the best fields. Invariably these oats show a heavy test weight and with our further cleaning and grading we produce fine quality seed stock that pleases exacting buyers. Such seed is always profitable to sow. While not certified as explained in the opposite column this is first class seed in every way.

As a further description would state that the Control are very similar to the Boone and whatever we have stated concerning the Boone would also apply to the Control. They are an exceptionally heavy yielder, rust resistant and a variety that has proven very popular.

They stand up well, are adapted to either heavy low land or upland. The color of the Oats is slightly yellow, straw color, extra heavy weight and a variety that cannot help but please.

They have proven an exceptionally popular variety in this territory and we do not hesitate to recommend them in the highest terms. We feel sure they will please and if you desire an extra good variety, one producing not only high yields but excellent quality this variety will answer your requirements. The seed we have this year is exceptionally fine seed stock and is one of the new varieties sometimes known as a hybrid, the same as the other varieties listed.

Price 25 bu. or more \$1.40 per bu.; 10 to 25 bu. \$1.45 per bu.; less than 10 bu. \$1.50 per bu.

See page 41 for prices f.o.b. Clarinda

SPELTZ

ALSO CALLED EMMER

NORTHERN GROWN

Great Drouth Resister. Practically Rust and Smut Proof. A Good Producer. Dandy Feeding Grain

This grain is one of the oldest grains known to mankind. It was apparently grown in prehistoric times. German-Russian immigrants introduced it to the United States.

It is a remarkable spring grain crop. Really a type of wheat. Shucks cling to the grain. Generally two grains in a shuck and somewhat softer than wheat. Makes a nutritious feed. The kernels with the hulls removed have about the same composition as wheat. Best as ground feed. Highly resistant against rust and seldom injured by smut. Also an excellent drought resistant grain. A good producer and under drought or rust conditions it is especially a desirable crop. Matures early. Makes a good nurse crop. Grown from Canada to Texas. Iowa, Minnesota, Wisconsin, Michigan and other states are growing it as well as Western States where drought conditions generally prevail.

Grow some speltz this year and show your neighbors what this drought and disease resistant grain can do. Sow in the spring. It is an ideal nurse crop. Sow $2\frac{1}{2}$ bu. per acre. Set drill for oats. Sow early as possible. Cut before dead ripe. Thresh as for oats but not too close. It is a remarkable grain crop. Its nice heavy grains will delight you. Splendid for all kinds of stock.

SPRING WHEAT

NORTHERN GROWN THATCHER TYPE

Exceptionally Rust Resistant

Thatcher is a beardless rust resistant spring wheat first released to growers in 1934. Developed by the Minnesota Experiment Station. Has given sensational performance especially in years when stem rust was damaging. Reports during the bad rust years of 1935 and 1937 show yields of Thatcher 250% of New Marquis and over 350% of Red Fife. Think of $2\frac{1}{2}$ to $3\frac{1}{2}$ times as much wheat per acre grown side by side with the other varieties. If you live in a section having rains, morning dews and relatively high humidity by all means grow Thatcher wheat.

Thatcher has a very strong straw. Not as tall as some varieties. Excellent for rich land. Makes a wonderful nurse crop. Matures 2 to 4 days earlier than New Marquis. Heads are short and compact. An excellent milling wheat. It is also quite resistant to bunt and loose smut. This is by all odds the most profitable spring wheat for sections susceptible to stem rust damage.

Our seed is northern grown, re-cleaned and very nice. Supply limited

SPRING RYE

Strictly a spring grain crop. Sow early in spring. Grain looks like Winter Rye. Used mainly as a grain crop. May be pastured or cut for hay. Sometimes combined with Field Peas for hay. Big yielder on rich land. One of the best small grain crops for thin land. Makes fine feed. Sow early in spring using about 2 bu. per acre.

GRAIN SEED**

SEE PAGE 41

Wilt Resistant FLAX

Grow Flax for bigger profits. Prices have ranged from 8 to 10 times prices paid for oats. These famous Wilt Resistant varieties Bison, Red Wing and Linota may reasonably be expected to yield 10 to 15 bushel per acre.

Higher yields than these are secured. These varieties are real money makers. Wilt drove Flax out of many sections. These wilt resisters are bringing it back. Adapted to most of the spring oat section having rainfall of around 25 to 30 inches.

Flax Facts and How to Grow It

Flax does best on medium to heavy land. It is not good on light soils. Biggest yields follow corn, some other cultivated crop or soybeans which leave the land reasonably weed free. Sow about spring grain seeding time. Late seedings may reduce yields. Seed bed should be firm. Pack with a roller if necessary. Do not cover over an inch. Half an inch is generally plenty. Drilling is best. Sow $\frac{3}{4}$ bu. per acre of Linota and Red Wing or about 1 bu. per acre of Bison. Harvest when bolls are ripe and stems yellow.

Flax makes a wonderful nurse crop for Red Clover, Alsike, Alfalfa.

Linota. Also a Wilt Resistant type and according to tests is superior to Bison and Red Wing for late sowing.

Bison the most Wilt Resistant. A little later in maturity. Largest seed. Excellent oil producer.

CERESAN

Disinfects Small Grain
for less than 3c per bu.

Controls stinking smut of wheat, covered smut and stripe of barley and loose and covered smut of oats. Makes for better stands, larger yields and finer quality.

A dust treatment. Easy to apply. No water needed. Does not cause seed to clog in drill. Very effective.

Prepaid price 1 lb. enough for 32 bushels only 90c; 5 lbs. for \$4.00.

USE CERESAN TREATMENT ON GRAIN. SEE

BARLEY

SPARTAN

A two-row, smooth awned spring barley. Beards without barbs. One of the strongest strawed barleys grown. Bears large uniform kernels. A fine variety for pearling. Not acceptable as a malting variety. Its unusual strength of straw makes it an ideal kind to sow on rich land. Easy to harvest and because of its smooth awns or beards it is very satisfactory to harvest and thresh. Heavy yields are recorded. It has greater value than some which, although yielding well, are discounted on the market or whose weak straw causes trouble. Spartan Barley is a profitable variety.

Small lots, any variety, postpaid, 1 lb., 20c; 5 lbs., 75c.

**LOWEST
PRICES
ON
HEAVY
PRODUCING
VARIETIES**

ILOGLOSS

A Very Fine Type Extra Heavy Yielder

NOT AVAILABLE

A smooth awned, stiff strawed and high yielding strain of spring barley. It is a malting type. Ripens about the same time as the Velvet. In tests extending from 1930 to 1937 it showed a superiority over both Velvet and Wisconsin 38 in lodging strength. It outyielded all varieties in the test by a very substantial percentage. It produced 7 to 9 bushels per acre more on the average than other widely grown varieties. When you consider that this was the average of a seven-year test its significance is most important. No barbs, strong straw, big yield make Iogloss an exceptionally fine barley.

VELVET

The KIND With SILKY BEARDS

Our Velvet Type Barley Is Cleaned, Graded Stock

Velvet is a smooth awned or barbless spring barley. The awns or beards give the grain some protection yet these beards have no barbs on them. They are as smooth as straw making the crop more pleasant to handle.

Velvet is a malting type barley that is in such big demand. It appears to withstand unfavorable conditions very well. It has a good stiff straw being close to Iogloss in that respect. Its quality and productiveness have made it one of the most popular varieties in the state of Iowa. It is now being grown over a wide area.

In many sections farmers are switching from oats to barley. These improved smooth awned kinds yield more and make more profitable grain crops. Barley has always been the heaviest producing grain in the northern states and this is materially above the average in production.

Barley makes a better nurse crop for grass and clover seedings because it does not shade the ground so heavily and matures earlier. Velvet is one of the most popular varieties.

A VERY POPULAR VARIETY

WISCONSIN No. 38

BARBLESS BARLEY

Our Wisconsin 38 Type Barley Is the Smooth Bearded Kind

This is claimed as an improvement over Velvet-type and has shown a slight edge over it in production. In one test Wisconsin No. 38 outyielded all others with a production of 50 bushels per acre. It is also a spring variety and has smooth beards or awns. It is a fine malting type barley. The straw is generally somewhat shorter than Velvet and a little later in maturing. In Central Iowa it should be ripe about July 15th.

Wisconsin No. 38 shares the popularity of malting types with Velvet and Iogloss. In some eastern and northern states it is even more popular. The straw is not quite as strong but it yields well. In localities where both are equally well known it is about a toss up between the two.

A farmer can scarcely make a mistake in selecting any of the varieties listed on this page. They are all recognized as excellent kinds. We price our barley at close figures. Our guarantee assures you of a satisfactory shipment or your money back. See page 10.

Barley makes a wonderful feed for hogs. It is fattening. Builds nerves, muscle and sinew. Matures early. It is a fine nurse crop. Malting demand creates a good market. Requires only 2 bushels of seed per acre. Grow better barley by sowing better seed.

We advise treating barley with Ceresan. It is a good investment. See description on oat page 20.

ODERBRUCKER

Our Oderbrucker Type Barley Is the Rough Bearded Kind

Also known as Wisconsin 55 Type. A standard malting barley. This, in our opinion, is a heavy producer. Plumper kernels. Great disease resistance. Higher protein test. Better feed. A bearded variety that gives greater returns. We endeavor to secure the best of quality at our prevailing low prices. Recleaned seed gives you stock with small stuff removed. Plumper grains generally make somewhat stronger plants. All of our barley and other seed grains are shipped subject to your approval. If in your opinion you have not received an extra measure of value, write us for shipping instructions. See guarantee page 9.

Danese, W. Va.

Dear Friends:
I have found you an honest and reliable house. Your seeds are certainly good and reliable in every respect. I am well satisfied with your service.

Yours truly,
WATSON COLE.

See Page 41 for New LOW PRICES

BROMUS INERMUS OR BROME GRASS

DROUGHT RESISTANT

**Heavily Productive—Highly Palatable
Starts Early. Grows Late in the Fall
Canadian Certified, Canadian No. 1 and
Domestic. See description below**

If you are needing a grass that will take lots of punishment and still produce a valuable crop, grow Brome Grass. If you want a grass that is palatable and greatly relished by all kinds of livestock, grow Brome Grass. If you want a grass that can be used for pasture or hay, Brome Grass fills the bill. For drought resistance and early and late growth it is hard to equal. We wish you could talk to farmers who are growing Brome Grass and hear their enthusiastic stories. Or better yet if you could see the crop growing and see the production it can make you would certainly want some of it. It isn't a new grass but its great value is just becoming more widely known. There are stands in Illinois that have stood over twenty years. It has been popular in the west for many years and has become widely grown in the eastern states. From Kansas and the Dakotas on east to the coast. From Michigan and Wisconsin on south into Kentucky. It is being grown as never before and each year the praises for it are better and louder.

Characteristics

Brome Grass is also known as Bromus Inermus, Smooth Brome, Awnless and Hungarian Brome Grass. It is a long lived perennial grass. Grows erect to a height of 3 feet or more depending upon soil fertility. The fibrous roots go deep sometimes 5 feet or more. Highly resistant against drought and cold. Remains green after Blue Grass has turned brown and dry. It is adapted to a wide range of soils. Does well on clay loam and sandy loam soils if not too low in fertility. Stands trampling and grazing very well. Fine to grow with alfalfa for hay and widely used with it and other clovers and grasses for pasture. While permanent it is not difficult to eradicate. If it becomes sod bound a thorough cultivation generally corrects that.

Getting a Stand

Brome Grass is sometimes a little slow in starting. Best results are obtained by preparing a good fine solid seed bed same as you would for alfalfa. May be sown either in spring or fall when moisture conditions are favorable to start it. The seeds are large and light and sometimes a little difficulty is had in feeding it through drill spouts. Mixing with sand or dirt or a peck or two of oats per acre helps. Keep it stirred and mixed in the box. An endgate seeder may be used. Some practice hand sowing. The seed should have a light covering but deep covering should be avoided. Wherever possible use a cultipacker or roller after seeding. Sow about 18 to 20 lbs. per acre alone. In mixture use 8 to 10 lbs. of Brome. Eight pounds each of Alfalfa and Brome is a good mixture. Remember it grows slowly the first year. What may appear a poor stand the first year is usually surprisingly good the second.

Seed Grades and Prices

The regular Brome Grass is available in the grades described below and also in the new strain described on the next page. Any shipment is guaranteed to please. See page 41 also for prices.

Fancy Domestic. Select quality home grown seed.....\$19.00 per 100 lbs.
Canadian No. 1. Heavy quality thoroughly cleaned..... 19.50 per 100 lbs.
Canadian Certified. Extra heavy—finest quality..... 21.00 per 100 lbs.
Small lots Postpaid; 1 lb. 50c; 5 lbs. \$2.00; 10 lbs. \$3.65.

Alfalfa and Brome Mixture

The top production of Brome especially when used as a pasture can be obtained by sowing alfalfa with it. The yield per acre is heavier, the quality is improved and it lasts for a longer period of years.

Tests show Brome with Alfalfa contained 21% more nitrogen than when grown alone. A 13-year experiment in Canada showed the combination yielded 2½ times as much. Almost every state experiment station reporting on Brome Grass advises sowing alfalfa with it. This year because of alfalfa seed shortage red clover may be substituted in some seedings.

The rate of seeding may vary according to personal ideas. Some authorities recommend 8 lbs. of alfalfa and 8 pounds of Brome per acre. Others increase the amount of Brome and decrease the alfalfa. See page 41 for prices on different grades of alfalfa or red clover any of which may be used with your Brome seeding.

\$19⁰⁰
PER 100 LBS.

Farmer Reports on Brome Grass

Elmer Wagner of Ada, Minnesota, says, "It pastures better than Blue Grass. Has seen fields that stood severe pasture for 10 years. As a hay crop I have found it as valuable as alfalfa. Likes it mixed with sweet clover for pasture."

J. T. Dudgeon of Penick, Kentucky, reports he has been growing Brome Grass for more than 30 years. Cattle grazed in different grass prefer Brome to all others. He uses Alfalfa and Brome mixed with highly satisfactory results. All kinds of livestock eat Brome ravenously.

Achenbach Bros. of Washington, Kansas, say it is the only grass they have ever found to take the place of the old time prairie grass. Comes on early, stays on late in the fall and often eliminates weeds. When sown with Alfalfa reduces danger of bloat when pastured. Yields 1½ to 4 tons of hay per acre.

Lack of space prevents giving many more reports but these are indicative of the great value farmers place on this crop.

Experiment Station Reports

Agricultural Experiment Stations now recognize its value and most states in the northern half of the nation have circulars or bulletins describing the crop and its value.

The Illinois experiment station considers it the most drought resistant grass in that state. Also very palatable and relished by cattle and horses. New York recommends it especially for pasture in mixture. Michigan finds it adapted, very drought resistant, highly palatable and especially suited for mixing with Alfalfa for pasture. Nebraska recognizes it as superior to all other cultivated grasses in that state. Iowa finds it of great value. Kansas finds it especially good in the northern part of the tame grass section with hay yields of 1 to 3 tons per acre. South Dakota says it is one of the outstanding grasses in the eastern section.

NEW STRAIN

BROME

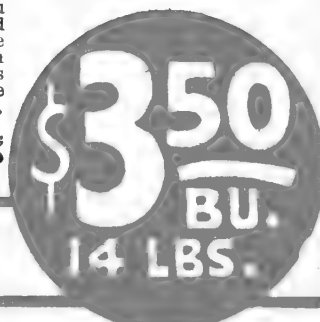

**Wonderful Yields—Superior Quality—
Big Crops**

**Up to 50% more pasture and hay.
Easier to get stands. Larger growth—More Profit**

This is the kind of Brome Grass seed to sow if you live in sections having climatic conditions like Iowa, Nebraska and states to east and south. Each year this New Strain Brome is playing a more and more important part in the nation's pasture and hay program. In our opinion it is the most important and valuable of all grasses. There is an enormous enthusiastic demand for this New Strain Brome. Experiments and trials in many sections show conclusively that special new strains are far more productive in states like Iowa, Illinois, Indiana, Ohio and east as well as Nebraska, Kentucky, Oklahoma, etc.

Northern seed like our Canadian stock is good for northern states, but Iowa, Nebraska and Kansas have developed new strains which should be used. Seed produced in these areas is the most profitable to sow in the general area suggested and we offer you this New Strain Brome at money saving prices.

New Crop Recleaned Seed—Priced Low

Some of the Advantages

Kentucky reports such seed produced 50% more than the northern seed. Illinois says it is decidedly superior in yield especially in the southern half of the state and further that farmers are much more successful in getting stands. Reports from Iowa, Kansas and Nebraska show a much taller growth and all experiment stations find this greatly superior to northern seed. Ohio reports the new strain distinctly superior throughout the state. Some find in trials that the new strains last longer. The evidence clearly indicates it has greater resistance to hot weather. Therein is perhaps the main reason for its great superiority in yield.

New Strain Makes Big Money

A farmer near Lawrence, Kansas, is reported to have received this past year \$1900.00 for the seed from 16 acres of Brome plus \$435.00 for the hay, making a return of practically \$146.00 per acre.

Extra big yields are obtained when Brome and Alfalfa are grown together. In a Kansas experiment Brome alone produced 5860 lbs. of hay per acre the first year which declined to 2588 in the sixth year. When grown with alfalfa it yielded 6600 pounds per acre the first year and 8460 the sixth year.

A Liberty, Nebraska, farmer has 100 acres of Brome-Alfalfa mixture on which he pastured 700 hogs with excellent results, reducing his protein concentrate supplement 50%. Another Burchard, Nebraska, farmer considers his pasture worth \$50.00 to \$60.00 an acre as it carries a lot of stock and decreases the need of protein supplement. At Wisner, Nebraska, a large cattle feeder is increasing his acreage of New Strain Brome and Alfalfa because he says an acre of this will produce more beef than an acre of corn and cuts his protein requirements in half. He feeds 2000 to 3000 cattle and has no trouble with bloat. Iowa finds new strain Brome far superior to Blue Grass because it provides earlier grazing in the spring and a shorter period of dormancy in midsummer.

New Strain Superior

In practically every instance when you will check the production of Brome in the area outlined above you will find the new strain Brome of Iowa, Nebraska and Kansas production to be by far the most profitable to use. This is emphasized by reports from farmers as well as experiment stations. This is causing acreage

of Brome to be rapidly increased. In one Nebraska county there was practically no Brome 5 years ago—now 90% of the farmers are growing Brome or Brome and Alfalfa combination. This increase in Brome acreage is spreading throughout all states to the east and to the south at least as far as Oklahoma and Kentucky.

Very Palatable

Feeding tests have shown Brome to be more palatable than other grasses. The leaves retain their green color and palatability even after seed is ripe. Thus seed can be combined and still have hay or pasture. It starts growing early in the spring. Does far better than other grasses during dry summer weather. Keeps on growing until late in the fall. Experiments with Alfalfa mixed with Brome and used as pasture show that Brome and Alfalfa are both eaten readily while if other grasses are used the stock will often eat only the Alfalfa and thus cause it to kill out quickly. Brome and Alfalfa mixed will last longer than any other combination.

Widely Adapted

It is adapted to a wide range of soils from sands to peats. It wants a good supply of nitrogen in the soil. That is why Alfalfa or Clover is such a good combination. This Brome is also fine for ditch banks or wherever you want to keep soils from washing. It forms a dense sod and lasts for years, yet it is easy to eradicate.

Start This Year

Get new strain Brome Grass started on your farm this year and grow a grass that is highly profitable. For best results sow some Alfalfa or Red Clover with it. That makes the best quality of hay and pasture and the largest yield. Such a mixed seeding lasts the longest and has the highest feeding value. When used for pasture add a half to 1 pound of Ladino Clover. A seeding of 8 lbs. to 10 lbs. of Alfalfa or Red Clover is good. Buy whatever grade of Alfalfa seed you wish and sow with Brome. When sown alone use about 20 lbs. per acre. You'll take pride in this grass that is now being so widely used because of its great value. It will give you fine quality, palatable feed in great abundance from early spring until late fall and stay with you for a long time if you want it. Berry's new strain Brome gives you the popular kinds you read and hear about so much. The seed is recleaned and shipment is guaranteed to please you in every respect.

GRASSES of SPECIAL MERIT

CRESTED WHEAT GRASS

EXTRAORDINARY DROUGHT RESISTER

If you want the most highly drought resistant grass, sow Crested Wheat grass. In sections with as little as 10 to 18 inches of annual rainfall and high evaporation it has made a very satisfactory growth. Yields of 3 tons per acre are recorded in more humid sections and seed production up to 900 pounds per acre.

It is a deep rooted long lived perennial grass. A fine stemmed leafy grass. Roots go down as much as 8 feet and are very dense. It does not spread by under ground root stalks, therefore is easier to eradicate than some grasses. On the other hand it does not become sod bound like some dryland grasses or to deteriorate like others.

Comes on Early—Grows Late in Fall

Starts growing unusually early as it likes cool weather. No amount of freezing or subzero temperatures seem to hurt it. Begins growing in the spring from one to two weeks before Brome Grass which is also an early starter.

Likewise it continues growing later in the fall. During hot weather it becomes dormant but responds quickly to a little fall moisture. It has not been definitely determined how far south it will grow. Has been grown in Colorado and Illinois and is worthy of trials further south and east. It is under extremely dry conditions that it shows its most striking superiority over other grasses.

Other Valuable Characteristics

It stands close grazing and trampling remarkably well. In one test it was grazed continuously for five years from early spring until late fall without apparent injury. It has proven a fine weed eliminator. A field that was heavily infested with mustard and Russian Thistle was almost totally freed of these weeds after Crested Wheat was established, yet the grass is easily eradicated.

It is relished by all classes of livestock and especially horses. Cures to greenish stems and abundant leafage as hay which is very palatable and highly nutritious. No grass is more winter hardy.

Seeding Suggestions

Prepare a fine well settled seed bed. Rolling or packing are desirable. Use about 10 pounds per acre and sow with grain or grass seed drill. Relatively early spring seedings when weather is cool and moisture conditions most favorable for quick germination are best. Cover seed about half an inch. In very dry sections cover a little deeper. Rolling is a good practice.

Postpaid: 1 lb., 40c; 5 lbs., \$1.60; 10 lbs., \$2.75.

\$16.00
100 LBS

RED TOP GROWS MOST ANYWHERE

Seldom Fails to Make a Stand

No other grass will grow under as great a variety of conditions as Red Top. It will grow on soils so poor in lime that most other grasses fail. Next to Reed Canary it is the best wet land grass. It is also strongly drought resistant. Fine to sow on banks to prevent erosion. If you have trouble in getting a stand of grass, sow Red Top—it seldom fails.

It is second only to blue grass as a pasture plant especially in the northeastern part of our country and it grows when blue grass often fails. On sour land we know of no grass to equal it. Red Top and Blue Grass is good for both pasture and lawn purposes. Likewise it is good in hay mixtures and it is widely used in that way.

Adapted to the Entire Country

Red Top thrives from Canada to the Gulf and from New York to California. It is a vigorous grower and quickly forms a turf. Very valuable for use in soil erosion work to stop washing. When used with Timothy for hay it generally increases the yield. Matures at about the same time.

It is a perennial grass. One seeding lasts several years. The seed is small. Around 10 pounds per acre are sown when not mixed. A mixture of three or four pounds per acre is fine in pastures and meadows. May be top sown on old stands to increase production. Early spring or late summer is the best time to sow.

The seed is very small therefore the seed bed should be fine and solid. Take care not to cover it too deeply. Red Top is cheap this year compared with Blue Grass, Orchard, Brome, etc. If you wish to get a grass that is economical to sow and almost sure to get a stand even on poor land be sure to sow some Red Top this year. Use it with Timothy for hay and with Blue Grass for pasture. It will help you get more feed per acre. Check soil erosion with Red Top. It is a crop that can fill an important place on your farm.

Small Lots Postpaid, 1 lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.00.

\$22.00
100 LBS

Bermuda Grass

This grass is very widely used in the south for lawns and pastures. Stands the extreme heat of southern locations better than any other on soils of a clay or loam character. Grows on sandy soils too but is less productive on them. The seed is quite small. Five pounds sows an acre, although for lawn seeding a heavier rate is recommended. It is not very winterhardy and probably will winter kill north of Kansas and similar locations.

We have a very nice quality of seed for you and we are pricing it on a close margin.

Prices Bermuda Grass

Small lots, postpaid, 1 lb., \$1.25; 5 lbs., \$5.00; 10 lbs., \$8.50. Not pre-paid, 10 lbs., \$7.50; 25 lbs., \$18.00; 50 lbs., \$34.50.

\$7.50
10 LBS

Orchard Grass

This grass has been grown in nearly every state in the Union. Starts growing early and grows late in the season. Soil requirements are similar to Timothy and Blue Grass. Will stand more shade than most grasses. Especially valuable to mix with other grasses for pasture. Makes best hay if cut when just in bloom. It is what is known as a bunch grass. Seed has been very scarce in recent years due to the government land lease program. This grass is very popular in Europe where it is valued very highly. The seed we have is fine but supply limited.

Postpaid 1 lb., 65c; 5 lbs., \$2.75; 10 lbs., \$5.00. See page 41 for other prices.

KENTUCKY BLUE GRASS

A Most Valuable Pasture

This long lived perennial grass is well known as an outstanding pasture and lawn grass in a great portion of our country. It is

very nutritious and highly palatable. Grows from early spring until late fall. Makes a fine sod and stands close grazing. Stands a lot of drought, coming out after long dry spells in an astonishing manner. It is adapted to a wide territory and to different soil types. Will stand some wet conditions and some acid but not as much as Red Top. Because of its fine quality it is widely desired for pasture.

Make Blue Grass More Profitable

Blue Grass pasture should be good money makers yet on many farms they are not. That is not the fault of the grass but more often due to neglect. When bare spots show up little attention is given them. It is hoped they may be reseeded by mother nature. Sometimes they are but it is slow. Meanwhile you lose what bare spots might be producing and weeds creep in. Save money by reseeding such places.

Other ways in which you can improve Blue Grass pasture is to fertilize them. Grasses use plant food same as grain. Sow clovers in Blue Grass to give them more nitrogen. Sweet clover is excellent for that. Clip weeds before they go to seed. Disc it occasionally and harrow early in the spring. Do not over-graze it in dry season.

Good pastures pay good profit. You lose money on poor ones. Use Berry's Extra Fancy Quality seed to build money-making acres.

Seeding Suggestions

Buy good seed but don't pay too much for it. Our prices should save you money. In spite of short crops our prices are low. Prepare a fine, well settled seed bed. Sow in the spring or fall. Spring seedings may be made with a light crop of grain as a companion crop. Often it is best to cut grain for hay so as to give the grass a better chance. Some clover also may be used with a spring seeding. Timothy is sometimes used both with fall or winter seedings. Blue Grass straight is sown 15 to 20 lbs. per acre. In mixtures, reduce to suit your ideas. For thickening thin spots 8 to 10 lbs. are generally sufficient. Whenever possible roll after seeding.

Blue Grass for Lawns

For lawns a very thick stand is desirable and a pound to every 5 or 600 square feet is suggested. An application of commercial fertilizer and a little lime will make a more luxurious growth, give it better color and help keep out weeds such as dandelions.

Small Lots, Postpaid: 1 lb., 60c; 5 lbs., \$2.25; 10 lbs., \$4.25.

\$33⁰⁰
100 LBS.

DOMESTIC RYE GRASS

An Early Starting—Fast Growing Grass

We receive many requests for a grass that can be sown early in the spring and make a good growth that same year. It is well known that grasses like Kentucky Blue Grass and Timothy will not make a large growth the first year and especially not early in the year. Domestic Rye Grass will make a good yield early. You can sow it as early as any grasses or about small grain seeding time. It sprouts quite quickly and grows fast.

This Rye Grass will normally not live over winter and should be considered an annual. Its greatest value is as a pasture crop and has special merit in mixtures. The leaves are somewhat like Blue Grass but a little broader and lighter green in color and grows taller. Do not confuse this with Rye that is sown for grain as it is entirely different. Most lawn grasses contain Domestic Rye Grass to provide green growth while the slower growing grasses are getting started. It responds well to favorable moisture conditions and good soil fertility.

A crop like Sudan Grass will make a much larger growth than Domestic Rye Grass and will stand more heat and drouth. However, you cannot sow Sudan until around corn planting time while Domestic Rye Grass in at oat seeding time and for early pasture, alone or in mixtures, be sure to use some of this fine grass. When sown alone use 25 lbs. per acre.

Small lots postpaid: 1 lb. 35c; 5 lbs. \$1.50; 10 lbs. \$2.50.

\$13⁵⁰
100 LBS.

English Blue Grass

A Grass That Is Widely Adapted

A crop used for hay and pasture. Yields around 2 tons of hay per acre on average land. Grows 15 to 30 inches high. Exceptionally valuable for pastures because it comes on very early in the spring and keeps on the job until late in the fall. Grows well from Kansas and Nebraska east to the Atlantic Coast and from Canada to the Gulf of Mexico. Not critical as to soils. Few grasses can equal it on wet land. Lives longer than Timothy. Seed cost is low this year. Sow about 20 lbs. per acre. It is a profitable crop either alone or in mixtures. It adds variety to pastures and increases their value. Grow some of it this year.

See page 40 for Clarinda prices. Small lots, postpaid, 1 lb., 60c; 5 lbs., \$2.25; 10 lbs., \$4.25.

\$8⁰⁰
100 LBS.

Lot "TIM" Red Top & Timothy

A Popular Low Cost Seeding

Our trade uses a lot of this for top seeding in pastures and meadows, and new stands. Many sow it alone, others add Alsike and other clovers. Adapted to a wide range of soils and climate. Especially good for wet land. Ten pounds an acre makes a full seeding. A.A.A. payments 40c an acre where adapted.

Lot "Tim" is Red Top containing some Timothy seed. We secured this seed at low cost and are selling it at figures that make an appealing bargain. The low acre seeding cost and the ease of obtaining stands make this a very popular value. Shipment guaranteed to please.

See price list for other quantity prices. Small lots, postpaid, 1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$1.95.

\$3⁹⁰
25 LBS.

GROW QUICK PASTURE MIXTURE

\$3.20
BU.
25 LBS.

A Popular Mixture at Reasonable Cost

Our Grow-Quick Mixture is a big seller. The cost of seeding is low and it gives quick production. You can begin pasturing it lightly within relatively few weeks after sowing.

This spring may find many farmers short on pasture. This is a seeding that may help you solve your problem. Good quality seed is used and we mix it as thoroughly as we can so as to give you a fine value at low cost. Only around \$2.50 per acre for this rich mixture.

Contains Approximately 50% Clovers

The Rye Grass in this combination is a fast grower and affords the earliest feed. Meanwhile the Sweet Clover, Korean and Timothy are developing to increase its production and value. It keeps on growing until after frost. The Korean will reseed for the next year unless the season is too short. The Sweet Clover and Timothy of course live over winter and can be used the next year for plowing under, for continued pasture or cut for hay.

Sow 15 to 20 lbs. per acre. Cover seed lightly and roll if possible. A firm seed bed and a light covering are always helpful in getting stands. Sow about the time you sow small grain. Do not use a nurse crop.

Contains
**Korean Clover,
Sweet Clover,
Domestic Rye Grass
and Timothy.**

Approximately 50%
Clovers, Balance Grasses

PERMANENT PASTURE and MEADOW MIXTURE

Thrifty Mixture

A combination of Grasses and Clovers that give our customers very satisfactory results at low seeding cost. A seeding that lasts several years. Produces a fine quality and variety of feed. Gives a longer pasture season. Some of the crops in it start early. Others grow through hot dry weather and late into the fall. Some stand wet conditions. Others prefer it dry. Under almost any conditions it can give you a stand that is productive.

The grasses in the mixture are Kentucky Blue Grass, Red Top, Rye Grass and Timothy. These are combined with Korean Clover and Sweet Clover. The Rye Grass grows fast and serves as a nurse crop although a light seeding of grain can be used if desired. Red Top is also quite a fast grower and these two grasses provide early feed. The Korean and Sweet Clover are generally ready to pasture by mid summer and on till late fall. The Timothy and Blue Grass also add to the fall pasture.

The grasses are all perennials excepting the Rye Grass. The Korean Clover is an annual but generally reseeds itself no matter how closely it is pastured unless the season is too short. The sweet clover is a two-year crop and it too, nearly always reseeds when in pastures. Thus you have legumes to build up your land, increase the growth of the grasses and improve the feeding value of the pasture. Sow 15 to 20 lbs. per acre.

We guarantee the quality of the seed to show up to your entire satisfaction and assure you of good value. Your money back if the seeds or the savings are not fully satisfactory.

\$7¹⁰
50 LBS.

Master Mixture

A combination of grasses only. Contains no clovers. Many of our customers want such a mixture. Some have clovers of their own to add. Some don't care for clovers. Others want to add one kind of clover and some another. So here it is. A straight grass mixture that we are sure you will like and priced to please you.

Our Master Mixture contains Kentucky Blue Grass, Brome Grass, Timothy, Reed Canary, Red Top and Crested Wheat Grass. These give a variety of grasses and that is what livestock likes. There are other advantages. All of them are perennials. Some start earlier in the spring. Brome Grass takes the heat and drouth exceptionally well. Meadow Fescue starts early and will grow until late in fall. It is widely adapted. Red Top grows most anywhere. Reed Canary stands wet and drouth. Timothy fills in well for several years as the other grasses are getting well established.

Poor thin pastures don't pay their way. They lose money. They become infested with weeds. They start to wash and erode. Thicken up old stands by reseeding. Disc the land, harrow. Sow one of our mixtures and roll or pack the ground. Make new seedings if old ones are too far gone. See page 25 under Blue Grass for seeding suggestions. Use 10 to 12 lbs. of mixture for top seeding or 18 to 20 pounds for a new seeding. Make those pasture acres profitable. More stock per acre for a longer period of time getting a greater variety of feed.

We use good seed and mix it as thoroughly as we can according to a definite formula. The shipment is guaranteed to please you. If you do not consider it a great value in every way at our low price you may return it for refund plus freight.

See Page 41 for Clarinda Prices

Gentlemen: We buy seeds from you. Some years the bill runs over \$1,000. The quality of the seed holds us as a customer. Then, too, the price is always less.

Yours truly,
RAYMOND C. LANGAN.

**It pays to inoculate
clover seeds. See p. 41.**

Early GIANT Korean

Early Maturing—Heavier Yielding Lespedeza

The great value of this earlier, taller growing Lespedeza was more clearly demonstrated this year than ever before. There is hardly a farmer who has seen Lespedeza pasture during hot summer months but wanted it on his farm. But southern Iowa seemed about as far north as the regular Lespedeza would reseed. The Early Giant Korean also known as 19604 is fully two weeks earlier and will mature seed 100 to 150 miles further north. U. S. D. A. states it is a reliable seed producer to the northern limit of Illinois. That covers areas up to north central Iowa and to many sections of Nebraska, Indiana, Ohio, Pennsylvania and others where the regular Korean is too late or too small.

Big Profit Features

Growth up to 2 feet was reported in the dry season of 1936. This Korean will stand a lot of dry weather yet responds to favorable moisture conditions. We have reports that indicate the Early Giant will grow twice as tall as the regular Korean.

It will grow on very poor soils without lime as a seed producer it is also prolific with yields as high as 1000 lbs. per acre reported. Because of its earliness it is more certain to make a seed crop.

Grain, Hay and Seed Crops Same Year

Farmers brought seed to us this fall that came from stands which had been sown the year before with small grain. The Early Giant seeded in the fall. The next spring small grain was again sown

on the same land but no more Lespedeza. He took off a good crop of oats in early July, then in August he harvested a hay crop and in October a seed crop of Lespedeza. The volunteer stand of this clover was secured at no cost for seed. Do not take from this that it will become a pest. Whenever you put the land into a cultivated crop you will kill the Lespedeza.

A Crop Many Farmers Need

Early Giant Lespedeza provides an abundance of fine stemmed, leafy, high protein pasture during hot summer months when many other crops are dormant. It may be used in mixture with other grasses or clovers and such combinations are popular as this gives early pasture from the Lespedeza. Sow 12 to 18 lbs. per acre for straight Korean seeding. You can use less seed and it will thicken up by reseeding in another year. Be sure to have a firm seed bed and do not cover over $\frac{1}{2}$ inch deep. If you want to top seed an old pasture be sure to harrow so the seed will get down to the soil. Inoculate your seed. See page 41.

Early Giant Korean will make you money as a pasture and generally as a seed and often a hay crop. Get started this year with this legume that will make your acres produce more. Extra fine for thin land.

Small Lots Postpaid: 1 lb. 45c; 5 lbs. \$2.00; 10 lbs. \$3.50.

BERRY'S LAWN MIXTURES

GENERAL CHOICE MIXTURE

This makes a fine smooth lawn in the northern half of the United States. Contains chiefly Blue Grass, Red Top, White Dutch Clover and Rye Grasses. The quicker growing grasses provide a nice green stand while the slower kinds are coming on. It is our most popular mixture, because it gives such wonderful satisfaction. Postpaid price: 1 lb., 55c; 3 lbs., \$1.40; 5 lbs., \$2.35; 10 lbs., \$4.50. A pound sows about 500 square feet.

TERRACE MIXTURE

This mixture contains deep rooted grasses. They hold the soil firmly and resist drought. Select this for terraces and sloping places. Soil on terraces is often filled in dirt of low fertility. It will pay you to fertilize your ground well. You cannot have a nice lawn on poor soil. Postpaid price: 1 lb., 65c; 3 lbs., \$1.75; 5 lbs., \$2.50; 10 lbs., \$4.75. All seed is thoroughly cleaned and tested.

SHADY-SPOT MIXTURE

This contains grasses naturally adapted to growing in shade, such as Poa Trivialis. Fine for grounds shaded by trees or buildings. In heavy shade a light application of lime in addition to fertilizer will improve results. This is a dandy mixture. Postpaid price: 1 lb., 60c; 3 lbs., \$1.50; 5 lbs. \$2.50; 10 lbs., \$4.75.

WHITE DUTCH LAWN CLOVER

The small white clover so popular for lawns. This may be mixed with any lawn grass seed you have on hand or sown on an old lawn in the early spring. Very drought resistant. Helps soil fertility. Seed is very small. A pound sows 1,000 or more square feet, depending on how heavy percentage of clover is desired. Postpaid price: 1 lb., \$1.25; 3 lbs., \$3.50; 5 lbs., \$5.50; 10 lbs., \$10.00. See page 40 for larger quantities.

KENTUCKY BLUE GRASS

The most satisfactory all purpose lawn grass for the U. S. from Nebraska and Kansas east to the coast and from Canada south to Tennessee. Stands through drought. Makes an excellent turf. Grow from early spring until late fall. Use Berry's quality Blue Grass. Postpaid price: 1 lb., 60c; 3 lbs., \$1.50; 5 lbs., \$2.25; 10 lbs., \$4.25.

KOREAN CLOVER

\$ 2.75
BU.
25 LBS.

See below for other prices

Grows on the poorest land
Wonderful pasture — Excellent Soil Builder.

A VERY VALUABLE CROP

Markets on Korean Lespedeza seed are very strong as there is a tremendous demand for it. Will be used in place of Sweet Clover in many sections.

Korean is a Nitrogen gatherer and will improve the poorest land where other clovers cannot even get started. It will resist more heat and drouth than any other clover. It will stop soil washing and will grow in ditches and gullies.

CHARACTERISTICS

Korean is an annual. It grows only one year from a seeding. It reseeds itself very readily and matures seed even after plants have been killed by frost. Thus it is proving itself adapted farther north than was at first thought possible. It is steadily and surely working its way north into Iowa, Illinois, Ohio, Indiana. If it does not reseed itself it will not come up the next year. When it does reseed the stands get heavier from year to year.

It is quite a common practice to put oats on land where Lespedeza has reseeded itself. After the oats are off, there is the Lespedeza to give an abundance of pasture until frost. A very valuable crop. Superior to Alfalfa and other clovers in acid or thin soils.

PASTURE VALUE

Korean shows its greatest worth in pasture. It does not afford much feed early but produces its best during the latter part of June and in July and August up to killing frosts. Therefore Korean gives pasture when most other grasses are dormant because of heat or drouth. No matter how close it may be pastured the crop will reseed if heavy frosts do not come too early. We therefore recommend Korean as a mixture for all pastures, new and old.

VALUE AS A HAY CROP

Korean does not grow very tall. To get a good hay crop the stand should be heavy. While it is not tall the stems are very leafy and a surprisingly large yield can be secured from a stand that seems fairly short. One of our customers reports a yield of three tons per acre and a seed crop afterwards. This was in central Missouri.

SEEDING SUGGESTIONS

The firmer your seed bed the better your success. Just broadcast seeding during winter or early spring. If sown with spring grain just scatter on top and then roll the land. Be sure to avoid covering it much.

Korean Prices

Regular Grade, \$2.75 bu., Clarinda.

25 lb. Bu. Nice quality re-cleaned seed of high germination and good purity. Sow 12 lbs. per acre.

Special Grade, \$3.00 bu., Clarinda, 25 lbs.

Selected especially to comply with provisions of Iowa Seed law. Sow 12 lbs. per acre.

Hulled Korean \$8.40 for 60 pounds—30 lbs., \$4.30—15 lbs., \$2.20.

Has hulls removed. Generally germinates quicker. Best for late seeding. Sow 10 lbs. per acre.

In buying Korean don't be misled by too low prices. Much of the seed contains excessive weed seed and is no bargain. Considering quality our prices are low. Quality brings real satisfaction.

Ask for our Free Circular on Lespedeza.

INOCULATE YOUR SEED

Inoculation helps get bigger and better stands. Costs only 60c for a package that will inoculate up to 100 pounds of seed. Order a 60c size for every 100 pounds or any part of 100 pounds of seed.

Early Giant KOREAN

This clover is becoming more popular every year. Its performance in Iowa this past season was outstanding. Farmers got a small grain crop, then a hay crop and then a seed crop all in one year. This Early Giant also known as 19604 is a very profitable Lespedeza. Be sure to read page 27 for full description and price.

SERICEA LESPEDEZA

A perennial lespedeza having growth habits similar to Alfalfa. Stems die in the fall. Next spring new growth starts from the crown. Has very strong root system. Generally has only one main stem the first year unless grown in cultivated rows. Second year it will have 11 to 15 stems and gets thicker each year. Has wintered as far north as Vermont, New York and southern Michigan. Official checks show little or no winter killing with temperatures of 17° below zero without any snow protection. It is adapted throughout the corn-belt. Makes excellent hay if cut early when it is 12 to 15 inches high. Larger growths become somewhat woody. Two hay crops can usually be obtained in a season.

Sericea is a better soil builder than Korean due to its larger root system. It also has the advantage of starting earlier in the spring since it comes up from the roots. It is taller growing and better for hay. As a pasture it is not quite as palatable as Korean. Sow on a solid seed bed and use 10 to 15 lbs. per acre; some use less others more. See page 40 for prices on quantities.

Small lots Postpaid, 1 lb., 60c; 5 lbs., \$2.50; 10 lbs., \$4.50.

CYCLONE SEEDER

A handy substantial hand seeder. Distributes seed evenly. Saves on seed and labor. You can sow many acres in an hour with a Cyclone. Sows Clovers, Timothy, Alfalfa, Oats, Sudan, Wheat, etc. Can be regulated for different amounts per acre. Double feed insures uniform flow of seed. Slanting feed board keeps hopper filled. Distributing wheel scatters seed evenly in equal amounts at equal distance from operator. Supply limited due to war time restrictions. First come First served. Postpaid Price, \$2.85.

HORN SEED SOWER

Simplest of all seeders and very popular. Sows all smooth seed like Clovers, Timothy, Alfalfa, Lespedeza, etc. Patented seed gauge regulates amount per acre to be sown. Tube comes in sections that fit tightly. Easily operated. No wasted seed. Pays for itself many times over. Postpaid, \$1.00.

Look at this great value. See the quality of this seed which is the heaviest yielder of all our mixtures. Fifty percent of clovers which are Red, Alsike, Sweet and Alfalfa balance Timothy. Rich in hardy, heavy yielding clovers yet low in seeding costs. You will have approximately 45 to 50 clover seeds per square foot when you sow this at 11 pounds per acre and the Timothy besides. That makes a cost of less than \$1.95 per acre. You can sow less seed, bring the cost still lower and get good results.

A Seeding That Lasts Several Years

Such a combination of clovers and grasses makes extremely heavy yields of hay. Our customers report highly satisfactory results. Big crops. Fine quality and Big savings in cost. Many use it as a pasture. They stock it heavily and get feed of excellent value. The alfalfa seed in the mixture helps to establish the crop on your land. The sweet clover opens up the soil and adds much nitrogen. The Red and Alsike fill the lower growth and the Timothy supports them and adds to the weight and growth of all. It is a great seeding and it is no wonder our customers are enthusiastic about it.

Quality Guaranteed to Please

The enclosed sample speaks for itself. Note the heavy clover content. This seed is all hardy domestic seed that has been re-cleaned. Note the letters in the opposite column. Results are what count. Satisfied customers can tell you of the great value of this seeding better than we can. Order with complete assurance of a satisfactory shipment. Your money back if you do not consider it a great value on which you have made a big saving. See our guarantee on page 9.

Start This Profit Maker

You, too, can become enthused over its wonderful production and high feeding value. See how it checks soil erosion and enriches your land. That dense heavy mat of clovers is a joy to behold. We sell thousands of bushels of Marvelous Mixture every year and with present low prices on such a combination of all home grown seed its sales should smash all previous records. We will protect prices until seed is sold or market advances make duplication impossible. Get the best bargain now. Sow around 10 to 12 lbs. per acre.

A Few Who Speak for Thousands

It is the experience of our customers that gives our Marvelous Mixture its strongest endorsement. It is the heaviest producer we have ever developed. High in feeding value. Rich in soil building elements. Suitable for hay and pasture. Low in seeding costs. It makes an ideal combination for thousands of farmers.

Saves 50% at Berry's

Stratford, Wisc.

Dear Sirs:

I was more than pleased with the seeds I bought from the Berry Seed Co. Never had a finer stand of hay. Sowed Marvelous Mixture this spring, and the seedling looks very good. I feel I saved about half by buying from this Co.

 60 lbs per bu.

SEE
 PAGE 34

Here you have one of our biggest selling lots of Alfalfa seed. Serviceable seed priced extremely low. We believe this to be absolutely the lowest price at which you can buy seed of this character. It has purity and germination tests that we have found adequate to produce good heavy stands. And our customers have found it so. The saying "thick as hair on a dog's back" indicates the character of reports we have from many customers. People write us "we want some of your Honest John because we saw what it did for our neighbors. They had better stands than we did from much higher priced seed."

Honest John is practically the same in hardiness as any of our Corn-Belt stock. It should yield as well and last as long. The appearance of the seed, however, is not as nice as the higher priced lots. The color is not as good nor the berries as large. If you do not object to a lack of uniformity so long as it can produce satisfactory results, then seed should please you. It is a seeding that pleases thousands. Sow 15 lbs. per acre. There are more seeds per pound than in larger berried stock.

**GENUINE
 NORTHERN
 GROWN**

GRIMM
 Lot **NORTH**
 Approximately 99% Crop Purity

ALL NORTHERN GROWN SEED FOR EXTRA WINTER HARDINESS

The seed in Lot North comes from states where severe winters kill non-hardy plants and leave only the hardiest to survive and bear seeds. States like Minnesota, Montana and Nebraska. Contains no southern seed. Seed of this character is always in big demand and sells at a premium over other less hardy origins.

Lot North has the high quality characteristics. Good color. Approximately 99% pure including sometimes a small percent of crop seed like Red or Sweet Clover. Good germination. A vigorous growing type. We'll gladly send you a sample. Compare it with the best grades. Consider the hardy character of this seed. Your saving should run around \$2.00 to \$3.00 per bu.

We have been able to secure a limited quantity of this seed and while the supply lasts it is a very attractive value. All Alfalfa stocks are limited as this catalog goes to press. Additional supplies are expected later but just what grades will be obtainable cannot at the time of this writing be determined. Therefore, we urge our customers when ordering alfalfa to make a second or third selection or permit us to ship the quality nearest to the grade ordered. Lot North is not our lowest priced seed. There are other lots on pages 34 to 37 as well as the quality lots on page 31. Send your Alfalfa order early—See page 41 for inoculation.

Our Finest Northern Grimm

We sell different grades and origins of alfalfa as described on pages 30 and 34 to 37. The greatest possible measure of value is packed into each lot. The Grimm is gaining in popularity among farmers everywhere because of its finer character of hay and extra winter hardiness.

Our World Brand Northern Grimm has always been in big demand. This comes from states designated as "Northern" under O.P.A. price regulations. Seed from these sections is extra winter hardy and in Grimm especially so.

Supplies Short—Buy Early

We cannot recall a year since alfalfa has become widely distributed that alfalfa seed has been as scarce as it is this year. There probably will not be much price advance because of O.P.A. regulations. However, it is very clear that supplies will be very short later so we advise early buying and making a second and third selection when ordering. By placing your order promptly we should be able to ship you this fine Northern Grimm without substitution.

I am constantly striving to give our customers the kind of seedings and values that will give them the best results for the lowest cost. While farm incomes are on the whole very good, the wise farmer is still watching expenses. The value of Lot Leader lies in its real high quality at a low cost. That is why it is so popular with our trade. By selecting lots of Red Clover seed that have been obtained by our purchasing department to special advantage we can make the value in Lot Leader outstanding in a very practical way. You will find in this Lot a fine clover seeding at low cost.

Character of Lot Leader

This is made up of quality lots of Red Clover seed. Sometimes we will get in some lots of seed that are beautiful in every way and contain a sprinkle of Alfalfa or Alsike seed, maybe 3 or 4 percent. When we have such lots they are used in Lot Leader. This year our clover seed has come in largely without any lots containing crop seed so Lot Leader is practically World Brand quality. With the Timothy as described below you will have a crop purity of fine quality at 98%. Fine beautiful bright seed.

All High Quality Seed

After figuring a discount on the Red Clover I wanted to lower the cost further without hurting quality or yielding ability. Experience has proved to me that a little Timothy in with clover improves rather than hurts yields. In fact quite a large proportion of Timothy can be used. However, in this seeding I decided that by including a very moderate amount a farmer sowing it would get practically the equivalent of a straight clover seeding. There is enough Timothy to act as a supporting crop for the clover. That really helps as the clovers then grow more erect, there is less loss of clover leaves. The quality of the hay is often superior. Also the clover increases the feeding value of the grass. The timothy content was therefore set at about twenty-five percent.

Cost Only Around \$2.25 Per Acre

Here then is a dandy clover seeding with a little grass having a high crop purity and very free of weed seed. Seven pounds will sow an acre. It should yield fully equal to a regular straight clover seeding. In fact I am certain it will yield more. The seed is all hardy domestic stock adapted anywhere in the U. S. It makes a thoroughly dependable seeding. I consider this the most outstanding value in clover seedings for the year. Buy it and if you are not completely satisfied let me know. I'll have it returned and promptly refund your money plus freight. This is truly a big extra value.

For best results with clover seedings be sure to inoculate your seed. The cost is low. It is easy to apply. A package that inoculates a bushel of seed costs only 50c; and 2½ bu. size 90c. See page 41.

A MONEY SAVING MIXTURE
JUST-RITE RED CLOVER
 WITH ALSIKE and TIMOTHY

\$10.35
 BU.
 45 LBS.

Very Satisfactory

This seeding is still lower in cost than Lot Leader. We have sold this for several years and it has proven very satisfactory and highly popular with our customers. The cost is only \$1.70 per acre as a bushel will sow around 6 acres. Contains plenty of clover seed for excellent stands and the seeding cost is very low. The seed is all hardy domestic seed adapted wherever such seeds are grown. The best evidence of its great value is the many repeat orders we receive. Customers who have once used it like the results they get and buy it again when they make another seeding.

The crop produced from Lot Just-Rite is heavy and high in feeding value. It is an excellent soil builder and stores nitrogen in the land as well as increasing the humus content. Our sales records show this to be the biggest seller of its class. There is real economy in this lot.

Gives a Fine Clover Seeding

It contains 50% or better Red and Alsike Clover carefully mixed with Timothy. This runs 30 to 35% Red Clover, 15 to 20% Alsike. When you sow this at the rate of a bushel to six acres you will have approximately 20 Red Clover seeds and 18 Alsike seeds per square foot. A total of 36 clover seeds per square foot and you have the Timothy besides to hold up the clover and increase the yield.

Recleaned Quality Seed

Do not compare this with country run or cheap seed of doubtful quality. We haven't tried to see how cheap we could make this. On the contrary we have made it the best possible value at this low price. It is cleaned seed, carefully mixed. It has the quality to produce good stands.

You can use it for hay, pasture and for soil erosion control. It is an adapted seeding and a good one priced to save you money. If you don't believe you have made a worthwhile saving on quality seed, return it and get your money back including freight charges.

For best results from clover seedings—Inoculate your seed. 1 bu. size package, 50c; 2½ bu., 90c.

RED CLOVER

For
Highest Quality Buyers

When it comes to really building up land for a corn crop you can hardly beat Medium Red Clover. It gets the job done without excessive burning or drought damage. The real quality corn crops come from Red Clover sod. And of course there is good money in hay, seed and pasture crops. To get good clean vigorous hardy stands use Berry's World Brand. It is the quality that has pleased our most critical trade for years and is distinctly superior to the so-called best grade of many dealers.

ECONOMICAL AND SATISFACTORY

This quality pleases because of the results it can give. It requires less seed per acre than country run or poorly cleaned lots. A bushel goes further. This seed is priced very low considering its fine quality. If at any time within 60 days after you receive shipment you do not consider you have made a very substantial saving, write us for shipping instructions and a prompt refund.

THIS SEED IS HARDY U. S. GROWN

Suitable anywhere in the nation where hardy clovers grow.

You will find other grades of U. S. grown Medium Red Clover described on page 10 and priced on page 40. Lot Leader and Lot Just-Rite described on the page opposite this are also U. S. Grown. Postpaid 1 lb., 60c; 5 lbs., \$2.50.

GETTING GOOD STANDS

Use Berry's World Brand Seed. Avoid heavy nurse crops. Cover seed lightly. Roll if at all possible. Inoculate seed. Inoculation pays well and costs little. Price: 1 bu. size 50c; 2½ bu. size 90c. Also see page 41 on inoculation.

F.O.B. CLARINDA

**THE FINEST
QUALITY at a
BARGAIN PRICE**

MAMMOTH RED

This Is a Superfine Premium Quality Seed

Mammoth Red Clover is the large kind also known as Sapling, Pea Vine and Bull clover. It grows taller and somewhat coarser than Medium Red and is later in maturing. Does not as a rule make two cuttings of hay but the one crop is heavier than that of a crop of medium. There is a heavy aftergrowth which makes a wonderful pasture or crop to plow under. The Mammoth Clover generally lasts longer than the medium Red and some prefer it for pasture purposes.

Mammoth is grown extensively in the northern states where the season is too short for two crops of Medium and in the corn-belt where its growth habits fit best into individual farming plans. Supplies of Mammoth Red Clover seed are quite limited but we were able to secure some extra fine quality seed and this premium grade quality will thoroughly satisfy our most exacting trade. Berry's World Brand Mammoth is strictly tops. We also have it in the Planet Brand as priced on page 40.

Planet Brand Medium Red

All our Red Clover is Medium unless especially designated as Mammoth. Planet Brand Medium is the same hardy adapted home grown seed as the World Brand described at the top of this page. Not as uniform in color and appearance but good serviceable quality. See page 40 for prices on other grades.

\$22.20
BU. 60 LBS.

CORN-BELT ALFALFA

This is the type of alfalfa that is very popular throughout the Corn-Belt because of its heavy production and its winter hardiness. Its use however, is by no means confined to the corn-belt. Northern states like Minnesota, Michigan and Wisconsin use this character of seed with very satisfactory results and customers in eastern, western and southern states like it very much.

Thoroughly Dependable

Reg. U. S. Pat. Off

We sell this seed in different grades and pack the greatest possible measure of value into each lot. From the lowest to the highest price you will receive seed capable of producing good stands of hardy type heavy yielding Alfalfa. If you demand the finest order World Brand. Each lot and grade is a great value and every shipment is guaranteed to please you.

Suggestions on Ordering Alfalfa

The supply of Alfalfa seed is the shortest it has ever been since the crop has become widely used. The demand for seed will be enormous and therefore some of the grades and lots offered in this book may become sold out. Therefore we suggest that you make a second or third selection when ordering or authorize us to make a substitution if necessary. In case of substitution we will send you the nearest to your order and refund you if the price is lower or write you for the balance if only a higher priced lot is available. Be sure to order early as seed is very scarce.

HARDY and HEAVILY PRODUCTIVE

CUSTOMERS' REPORTS ON BERRY'S ALFALFA

Joseph Ash of Otsego, Michigan: "We got some of your World Brand Corn-Belt Alfalfa 2 or 3 years ago. It is doing so good we want some more."

C. A. Foster of Sparta, Ill., says he bought some of our cheapest Corn-Belt Alfalfa 5 years ago. Still going strong. Has another piece of ground ready for more.

Ed Phienheimer of Shipshewanna, Ind., has used Corn-Belt Alfalfa for seven years. Orders more. Says to send it whatever the price may be.

Ivan R. Arnsmeir of Juda, Wis., reports our Corn-Belt Alfalfa gave him four cuttings when his neighbors got only two. He had our lowest priced grade.

Wm. Koutny of Brandon, Iowa, states he obtained a fine stand. Lots better than some who paid five bucks per bushel more for their seed.

Oscar M. Hub of Riley, Wis., says the four bushels of Corn-Belt alfalfa was seeded with excellent results. Well pleased.

Frank L. Wilcox, Galloway, Ohio, wants another bushel and a half like the Corn-Belt he got the year before which gave very good results.

Wm. S. Van Tassel, Antwerp, N. Y., says: "I secured a wonderful stand last year of your seeds, especially of your alfalfa."

Elmer Broedlow of Jefferson, Wisconsin, writes: "Just wish to say the alfalfa I purchased of you last year withstood the drought and ice of last winter. My seeding is excellent although some report their seedings are dead again this year."

GRADES of CORN BELT ALFALFA

Berry's Corn-Belt Alfalfa comes in four regular grades of common. These grades are separated largely according to color and size of berries. Read page 10. There are also special lots of Corn-Belt designated by names such as "Big Krop," etc. We also have the Corn-Belt Grimm such as our World Brand on page 31 and Lots Bonafide and Bed Rock. We have found our Corn-Belt Alfalfa hardy and heavy in production. See money saving prices on regular grades on page 40 and get seed that is suited to corn-belt conditions.

INOCULATE ALFALFA SEED

Better Stands—Heavier Growth

Alfalfa gathers nitrogen from the air. That is why it builds up soils and contains so much protein. But it can do this only when the plant's roots have certain bacteria working in them. You can get these bacteria by inoculating your seed. These bacteria can thus enter the roots and form nodules as soon as the seed sprouts. Then your plants will be healthier, stronger and grow larger. Plants that are not inoculated often turn yellow and die. Inoculation may mean the difference between success and failure.

Berry's Nodule Germ Inoculation is inexpensive. It is easy to apply. Full simple directions with each package. Price 1 bu. size, 50c; 2½ bu. size, 90c. If this inoculation does not form nodules on the roots of your plants we will refund the price of the Nodule Germ.

Market Conditions

Production in some of the big seed producing sections was very short. There is practically no carryover seed. The demand is enormous. While prices may not advance much due to government ceiling the question will be whether you can get seed at all later in season. It will pay you to buy now if you want alfalfa seed.

Sowing Alfalfa

Get your seed bed as fine and well packed as possible. Sow a little later than Red Clover with a very light nurse crop. Better still a little later seeding after some advance harrowing to kill weeds. In such case sow without a nurse crop. Fifteen pounds per acre is plenty. Do not cover over half an inch. Roll, if possible after seeding. Inoculate your seed.

North Liberty, Indiana.
Dear Sirs: Your seeds are the best I ever used. The Yellow Biennial Sweet Clover is certainly the best. Every seed came up. I am well satisfied and can recommend your seeds highly.

Yours truly,
ELDEN KANE.

ALFALFA

Inoculate your Alfalfa Seed. Easy to apply. The cost is low. It pays big dividends. See page 41.

LOT FANCY

A Fine Fancy Quality

We generally call this our Dealers Fancy Grade because it is a quality that is so often sold as the best in a retail way. It might easily pass for the best if you didn't compare it with an extra fancy quality like our World Brand.

You'll like its high purity and smooth berries. It has good color too. Not quite as bright as the World Brand but plenty nice at that. And it has the growing power to produce good stands. The hardness is the same as the World. In fact it will do everything the higher priced grade will do. The main difference is in the color and that difference isn't great.

You can save approximately \$1.50 per bushel over our World Brand and compared with average retail prices the savings should be much more. You can buy this or any other lot and if you do not think you have made a good purchase and savings don't keep our seed. See Guarantee on page 8. This Lot Fancy is a great value. Buy early.

Corn-Belt Alfalfa Seed

A low priced grade that satisfied many

This is a quality similar to our Square Brand. Thousands of our customers have been using this type of seed for many years. They know the seed isn't the best for looks but they also know by experience that they can get good results from such seed. The great saving in seeding cost is clearly seen in our very low prices. Less expense with satisfactory results, gives plenty of reasons for the popularity of this lot.

The crop from this seed is just as hardy and productive as any of our corn-belt alfalfa. If you don't object to smaller berries and some discolored seed we're sure you'll like it as so many of our customers do.

WORLD BRAND CORN BELT ALFALFA

We ask every critical buyer to check the savings you can make on this high quality grade. This is Corn-Belt alfalfa at its best. Our extra fancy quality. The highest color and plumpest berries. A grade that nearly always runs 99½ pure. Priced to save you

real money. See the samples of World Brand Alfalfa seed enclosed. That indicates the beautiful character of this grade. Such seed is always a sound value and we guarantee to save you money on it. We have ample seed on hand as this catalog goes to press and will endeavor to supply it all season long. The wise thing is to get it by ordering now.

The hardy character of our Corn-Belt Alfalfa is described on page 34. The beautiful quality of this seed is sure to please you. This is seed that we consider winter hardy and highly productive. It is this character of alfalfa that has helped build up such an extensive alfalfa seed business for us. Quality to please our most critical trade and a price to suit our keen judges of value. You will appreciate this high grade bargain.

Chippewa Falls, Wisconsin.

Gentlemen: My father used your seeds for 30 years and would never think of planting any other seeds than Berry's. I have been farming for 14 years and always bought my seeds from you. The seeds always come up, have strong hardy plants and bear excellent crops.

Yours truly,

WM. E. KLEMKE.

LOT BIG KROP

Choice Quality Corn-Belt Alfalfa

\$24⁶⁰
BU
60 LBS.

If you want a good serviceable, in between quality, order Lot Big Krop. It is a finer grade than the Honest John (page 30) and the Lot Good Service described above. It is not as smooth and uniform as the extra fancy World Brand described in the opposite column.

It is the same hardy Corn-Belt alfalfa like the others. This medium quality seed has given our trade a high degree of satisfaction for many years. The very low price we have on it makes it a great value that we do not believe can be duplicated anywhere. It is a good practical value for thrifty buyers.

Order early while supplies are available.

EXTRA HARDY ALFALFA

Shipped in a Sealed Bag A Real Value

A selected bargain in medium grade Grimm Alfalfa seed. Honest-to-goodness quality without the extra high color that means higher prices. It is seed of good character; cleaned, good growing power, extra hardy.

Lot Bonafide is Northern Grown of a productive hardy type. It is one of our most popular and biggest selling lots. This grade may sell as a fancy quality. It certainly is a serviceable lot.

We know that a lot of farmers have to watch their expenditures very carefully. That is why we made a special effort to secure seed of this type. We strive to supply the needs of every customer. It is typical of Berry Service to enable you to secure such quality of Grimm Seed at so low a price. Shipment is guaranteed to satisfy you. Any buyer of Lot Bonafide who does not think he has made a big saving can return shipment and get his money back.

Lot BED ROCK GRIMM

Our Lowest Priced
Grimm Serviceable Seed
of Hardy Origin
Supply Limited

Grimm Alfalfa is in greater demand than ever. This lot places it within the reach of every farmer who wants this kind. This lot is priced very low for such quality. It is a grade that has given our customers satisfactory results. Has good growing power. Produces the same kind of alfalfa as higher priced seed.

This low price is possible because we obtained some Grimm seed that was somewhat discolored. It would not classify for fancy colored grades. Berries are a little smaller. While the germination per hundred seeds is lower there are so many more seeds per pound that this is largely compensated for. Several tests per ounce show more sprouts than an ounce of larger berried kind.

A Heavy Producer

We sell this seed because we know that it has the ability to produce good, strong stands. In appearance it isn't the best but from a practical standpoint it does very nicely. Sow 15 pounds per acre. Shipment is guaranteed to satisfy. If you want to get a start with Grimm at a low cost, order this lot. Customers report it an outstanding bargain.

World Brand Montana Grimm

Extra Hardiness

Montana Grimm is known nation wide for its hardiness and yielding qualities. The demand for this seed is heavy and the supply short. This year in spite of OPA regulations there has been a wild scramble to get this Montana seed. We were able to secure only a very limited supply and on a price basis that does not give any net profit. We wanted to have some of it for some customers always want Montana seed. Our regular Northern Grown, however, should be equally desired in every respect. Grimm Alfalfa seed produced in any part of the country designated as "Northern" under price regulations should be hardy anywhere in the U. S. We can take care of early buyers with such seed.

Extra Quality

At the time of going to press with the catalog we have the Montana Grimm only in the World Brand quality. That is the grade that most customers demand in Montana seed. High in purity and germination. Such seed is always economical for there is no seed at any price that can give you better assurance of satisfactory results. Therefore you can depend upon fine quality as well as extra hardiness in this alfalfa seed. If we should be sold out of Montana we suggest World Brand Northern Grimm as described on Page 31.

GRIMM ALFALFA

At STRIKINGLY LOW MONEY SAVING PRICES

GENUINE

STATE CERTIFIED GRIMM

\$34.00

BU=60 LBS.

By the time this catalog is distributed most farmers will know that Alfalfa seed is a very scarce article this year. The production of Grimm Alfalfa seed is short and State Certified seed is almost impossible to obtain. Through one of our western buying connections we were fortunate in obtaining about half a car load of genuine State Certified seed. We will sell this first come first served as long as it lasts.

Grimm Alfalfa seed is noted for its qualities of extra winter hardiness and is recommended for sowing wherever soil or weather conditions are liable to cause excess winter killing. This seed of ours is of central origin and such stock is often larger growing and more productive than that of extreme northern origin. This seed therefore is particularly well adapted to farms over a wide area.

The seed stock used in sowing must be "approved" by state authorities in order to get a field of certified seed. These same authorities also make field inspections and the seed from these fields is harvested, cleaned and finally placed in sealed bags under their regulations and inspections. Thus anyone buying "Certified" seed has extra and positive assurance of securing genuine Grimm.

There are certain grade specifications based on color of seed, purity and germination. Purity and Germination are of course the most vital factors and those are the ones used in O.P.A. price regulations. On this basis our State Certified Grimm is "Premium Quality" seed. We paid for it on this basis and while the price is high we are only trading dollars at this figure. We are handling it to accommodate our trade rather than any profit for actually it shows us a net loss.

Small lots Postpaid, 1 lb., 75c; 5 lbs., \$3.25; 10 lbs., \$6.25.

State Certified seed comes to us in bushel bags. Each bag carries a state tag and state seal. When you buy in full bushel lots you will receive it in this way. When it is necessary to break a bag to fill an order there will be no tag or seal on that smaller bag. However, we carefully guard this seed with lot numbers so that even single pound orders get exactly the same seed as in full bushel bags. This applies also to the State Certified Cossack described below.

Critical customers who demand the most carefully grown, processed and supervised seed should buy State Certified while it is available.

Genuine State Certified Cossack

Hardest of All Alfalfas

We consider Cossack able to withstand the most severe winter conditions of any alfalfa and still be a good producer. This makes it rank high in favor among farmers who have excess trouble with winter killing. That may be due to weather conditions or soils because some soils give more trouble than others in this respect. So if you want the hardest buy Cossack.

Northern Origin Seed

State Certified Cossack is sown, grown, harvested, cleaned, sealed and tagged under state supervision as explained for Grimm above. Our Certified seed is of "Northern" origin which is considered by authorities the most hardy of all origins. You would get nothing more rugged in character or finer in quality for this is the "Blue Tag" grade which represents State Certified seed at its very best.

\$35.20

BU
60 LBS.

Big Demand—Order Early

There is an enormous demand for the small supplies of Alfalfa seed that are available. The call for northern origin is especially strong because so many feel the need of extra hardiness.

In this State Certified Cossack you not only get the northern origin but also the hardest of all kinds. Stands of Cossack should remain for many years thus making it in the long run a most economical kind to sow. We have only 20,000 lbs. of this seed which will not last long under present conditions so if you want some of this fine stemmed, branching, leafy, extra hardy seed be sure to order early.

1 lb. Postpaid,
80c; 5 lbs., \$3.50;
10 lbs., \$6.50.

Myerstown,
Pa.

Dear Sirs: I have been getting my seeds from you for twelve years. I get the kind of seeds I want and save money. The Grimm Alfalfa I sowed in 1930 gave me three cuttings of fine hay this year.

Yours truly,
MILES L. RISSER

and 41

ALSIKE CLOVER

WORLD Brand

\$24⁰⁰
BU.
60 LBS.

This is a clover so valuable, so adaptable to conditions unfavorable to other clovers that many farmers are passing up a good bet when they do not use it. In this World Brand you secure our finest quality. Highest in color and plumpest berries. The grade that has satisfied our most critical trade for years. All hardy U. S. Grown seed.

Alsike is a fine stemmed perennial clover. Higher in feeding value than Red, greener in color and less dusty. Under favorable conditions stems grow 3 to 5 feet long. Prefers loam to heavy soils. Grows on land too sour for red and is extra winter hardy. It is excellent practice to sow a couple of pounds of alsike per acre with Red. Helps to secure a better stand and a thicker growth.

Alsike is economical to sow. It is a smaller seeded clover, 5 to 6 pounds per acre is plenty to sow. Use it alone or with other grasses for hay and pasture. Stands trampling. An extra good clover for pasture and makes wonderful hay.

Alsike is grown from Oregon to Maine and from Minnesota to Tennessee and other southern states. In the south is used largely for pasture on lower ground. North and east it shows its great value as a hay crop. Extra good on wet land, stands a lot of overflow. Its use however, is by no means confined to wet land. It is generally easier to get a stand of alsike. Compare our values. Although the seed is relatively scarce we have very low prices and can save you money on this our finest quality.

Postpaid 1 lb., 60c; 5 lbs., \$2.50; 10 lbs., \$4.50.

LOT ALSIKE MERIT

This lot of Alsike sells at a substantial discount under our World Brand simply because it may have a little Red Clover or other farm crop seed in it. Will average 90% or better pure clovers. Free samples on request will show you just how nice this seed is.

You will like it for hay and it is very good for pasture. If you are making a new seeding you should like it and it is fine too for top seeding on old meadows and pastures. If you are making up a pasture mixture with other grasses you can use Lot Merit. It helps to reduce seeding costs and it is a value we are sure you will appreciate. Return seed for refund if you are not completely satisfied. See guarantee page 9.

\$21⁶⁰
BU.
60 LBS.

GIANT INCARNATE OF CRIMSON CLOVER

Resembles Red Clover. Grows up to 2 to 2½ feet.

Upright branching plants. Roots deeply. A bountiful provider of nitrogen. Will thrive better than Red Clover on thinner and poorer soils. Very efficient for green manuring. Plowing under a good crop is estimated equal to 20 loads of manure per acre. Stubble plowed under 12 tons. A cheap source of nitrogen. One authority says it's worth \$20.00 to \$30.00 per acre in nitrogen.

Most extensively used in the south as a fall sown crop. We suggest only spring seeding in north where it is a quick growing annual. Prefers cool growing season. Sow 15 lbs. per acre. Our seed guaranteed to please you.

Small lots, prepaid, 1 lb., 35c; 5 lbs., \$1.50; 10 lbs., \$2.75.

\$12⁶⁰
BU.
60 LBS.

Lot ECONOMY ALSIKE WITH TIMOTHY

A special lot and a seeding that our trade takes to in a big way. A bushel sows six acres. That averages about 60 clover seeds per square foot. You have the Timothy besides to hold up the Alsike. That helps it grow taller and cleaner. One crop aids the other. They will produce a greater tonnage in combination than when grown separately. Makes heavy crops of fine quality hay and pasture. Very nutritious as Alsike is higher in feeding value, pound for pound than Red Clover.

Lot Economy generally contains 50% or more Alsike. This is mixed with the Timothy to make a blending and quality that our customers consider a real bargain and a money-making seeding. Do not confuse this with the average combination of Alsike and Timothy. It is richer in clovers. Requires less seed per acre.

Shipment is guaranteed to please you. You can cut your seed bill. The seed is U. S. grown and hardy anywhere in the U.S.A. If you want to make an adapted seeding and an economical one order Lot Economy. We are sure you will be well pleased.

Dorset, Ohio.
Dear Sirs: I have been using your seeds for years back and I find them the best seeds I can buy. I have saved money on the seed orders I purchased from you. I gladly recommend you as reliable company to deal with.

Yours respectfully,
LAWRENCE S. GIDDINGS.

TIMOTHY WORLD BRAND

Our Finest Grade—Iowa Grown

The value of Timothy is again being appreciated. It is one of the surest to make a stand. Grows on a wide range of soils and is adapted to a wide area. Helps check soil washing better than straight clovers. Used alone and in combination with clovers and alfalfa to produce money making crops. Hay, pasture and seed crops are all valuable. A seeding lasts several years. Sow 10 to 12 lbs. per acre. Our present prices will save you money.

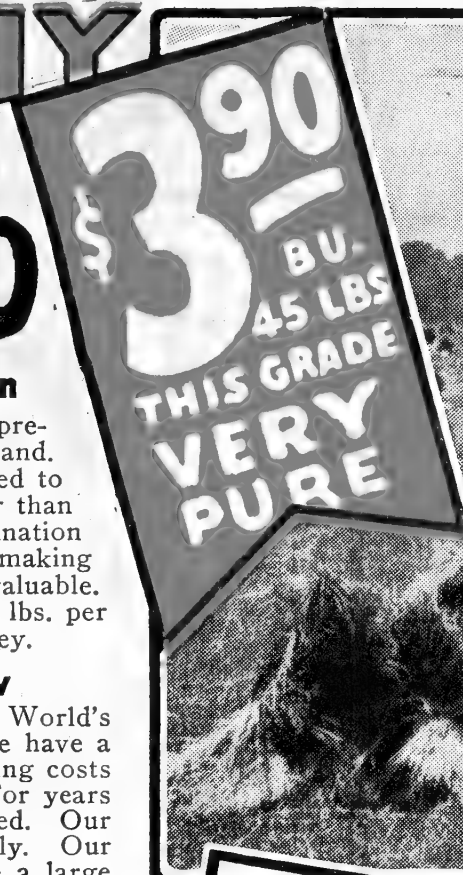

Berry's Quality Prices Low

Located as we are at the door of one of the World's greatest Timothy seed producing sections we have a better opportunity to get the best. Our buying costs are low. Transportation is a small item. For years we have been large handlers of Timothy seed. Our machinery is designed to handle it efficiently. Our experience has taught us much. We handle a large volume. All these factors combine to make our prices low and quality extra nice.

More for Your Money

Our World Brand grade is extra fine. That is what our most critical customers have been demanding and using for years. We have other grades too, Fancy, and Square. See page 9 for description and page 40 for prices. A quality and a price to meet every need and a genuine saving guaranteed on each one. Return for refund if shipment not satisfactory. Buy direct. Save Money. Get that extra measure of value and ease the strain on your pocketbook. Our prices are far below O.P.A. ceilings.

Single pounds, postpaid, 25c; 5 lbs., \$1.00; 10 lbs., \$1.80

PLANET TIMOTHY

This is a good average quality of Iowa grown Timothy seed. Very serviceable seed. A little lighter in weight than World Brand and not quite as bright. Has been well recleaned and will compare favorably with much seed used. Cuts seeding costs and gives satisfactory results to a large portion of our trade.

LADINO CLOVER

Beautiful State Certified Seed

Heavy Yielding Giant White Clover

You may have read about this wonderful clover in your Farm or Poultry magazines. They have been talking about its splendid yields, high nutritive value and big profit features. You will be hearing more and more about this great legume for additional experiments are continually showing it has wider adaptability of soils and climate than originally estimated.

It is a rapidly growing perennial legume that grows two to four times as large as common white clover and about six times as big as the English wild white clover. It has creeping fleshy stems that root at the nodes and joints. It covers the ground thoroughly and grows profusely. Reports from Pennsylvania show that Ladino runs close to 30% protein on a dry basis, where they recommend it highly for poultry range.

Up to 30 Tons per Acre

This same report showed that Ladino poultry range yielded as high as 30 to 40 tons of green feed per acre. This was based on small enclosures of wire placed throughout the field and clipping and weighing the growth every two or three weeks. An eight acre Ladino range carried 2500 to 3000 head of poultry from late April to late October. On a dry basis the yield was calculated of 5.4 tons per acre.

Adaptability

It was originally recommended especially for the northeastern U. S. Reports from other states show it is highly re-

garded over a wide area. Michigan says it has not equalled Alfalfa in yield but that it can be used for hay, silage or pasture, especially the latter. Kentucky says it outyields ordinary white clover in that state. Oklahoma reports that on the basis of recent tests they consider it will have a place in their pasture program.

In a general way it can be said that it does its best on fertile soils and responds well to fertilizer on poor land, especially phosphorus. Will stand quite a lot of drought and wet although not extremes of either.

Seeding Suggestions

Spring seedings are most general although fall seedings are not uncommon. It is very important that the seed bed be firm. Rolling very desirable. Ladino is widely used with other grasses. Two pounds of Ladino with 6 lbs. of Timothy is a good combination. Less Ladino may be used. For a straight seeding of clover only as much as 3 pounds per acre is suggested. The seed is very small and a little goes a long ways. Another good mixture for cattle or poultry pasture is 3 lbs. red, 2 lbs. alsike, 1 1/2 lbs. Ladino with 4 lbs. of timothy or orchard grass. Rye Grass, Red Top and Blue Grass are also suggested to use in combination with Ladino.

While high in price this clover justifies its place on your farm because of its great value. Be sure to use some by itself or in mixtures even if only 1/2 lb. per acre in mixture for it is a clover you should know better for greater profit. Price not prepaid: 10 lbs., \$25.00; 30 lbs., \$72.50. Postpaid: 1 lb., \$3.25; 5 lbs., \$14.50; 10 lbs., \$26.00.

INOCULATE ALL LEGUMES

Showing difference in yield between crop from inoculated and not inoculated seed.

The cost per acre is small. The extra returns are large. Bigger yields and better soil building.

Inoculation Necessary

No legume can thrive without proper inoculation.

In order to be inoculated there must be a certain strain of bacteria working in the roots of the plants. Then and then only can these legumes take nitrogen from the air and use it for its own growth.

Legumes are heavy users of nitrogen. If they cannot make it for themselves because they lack the proper bacteria, they generally turn yellow and often die. Meanwhile instead of building up your land they are robbing it of nitrogen which is the most valuable plant food. You grow legumes because you want them to store nitrogen in the soil but they will take it away if they are not properly inoculated.

When you buy Berry's Nodule Germ you get a package containing millions of bacteria suited for the crop you specify. You put that on the seed. See opposite column. As soon as the seed sprouts the bacteria start to work and give the plant the power to make its own nitrogen out of the air.

We urge you to inoculate. The cost is small. It is easy to apply. We guarantee our Nodule Germ to give satisfactory results. If it does not make nodules on the roots of your plants we will refund the price of the material. See opposite column for prices.

INOCULATING LEGUMES PAYS

Berry's Nodule Germ

A Wise Investment

In the opposite column we have explained the necessity of proper inoculation for your seed. Berry's Nodule Germ is one of the best and most economical ways of securing this inoculation. It is very easy to apply. The simple directions are printed on each package. Guaranteed to produce nodules if used as directed or money refunded.

A New Development

Most Inoculants are prepared so that you have to buy different packages for different kinds of legumes. For example you buy one kind if you want to inoculate Red and Alsike Clover, another for Alfalfa, Sweet Clover and still another for Soybeans.

Now, Berry's Nodule Germ is prepared by a laboratory that has devised a satisfactory method of combining different strains of bacteria in one package. This will inoculate Red, Alsike, Crimson Clover, and all Alfalfas. You can order as much as you need of Berry's Nodule Germ and use part of it on Clovers and part on Alfalfa, if so desired. It can also be used on Soybeans.

NODULE GERM PRICES

Order size nearest to the amount of seed you want to inoculate. It does not harm the seed if you use an excess amount.

3 Timothy AND CLOVER MIXTURES

AT
LOW
SEEDING
COST

TIMOTHY ALSIKE and RED CLOVER

Regular Grade

**Contains 20 to 25% Clovers
All Hardy U. S. Grown**

An economical seeding but a good one. There is ample clover seed to produce a good stand. At 10 lbs. per acre it provides around an average of 25 clover seeds and at 8 pounds per acre 20 to 22 clover seeds per square foot. The Timothy is in addition. There is a distinct advantage to the Timothy. It supports the clover plants. They grow straighter and taller. There is less loss of clover leaves because there are not so many in contact with the ground. Most of the feeding value is in the leaves.

The clovers help the Timothy. It gets the benefit of nitrogen gathered by the clovers. A number of tests show that grasses contain more nitrogen when they are grown with clovers. It has also been shown that Timothy and clovers grown together will yield more than when grown separately. Thus better quality, larger yields and low cost are big factors in making our mixtures so popular.

Costs around \$1.20 an acre

That is all it costs when sown at 8 pounds per acre. No one can afford to neglect seedings when the cost is so low. Build up your land. Get good hay and pasture crops. The way to big permanent profits is to make liberal clover and grass seedings every year.

\$6⁵⁰
BU.
45 LBS.

TIMOTHY & RED CLOVER HOME GROWN

SUPER GRADE

**Contains 28 to 32%
Red Clover
Hardy U. S. Grown**

\$7⁸⁰
BU.
45 LBS.

Red Clover is hard to beat as a soil builder in the corn-belt. It leaves the land in ideal condition for corn crops. The ground works up nice. It is easy to cultivate. There is less danger of burning than with some other legumes. You can be surer of a good vigorous well filled crop of corn. In fact a good grass sod is good too, only it lacks the nitrogen clovers bring. A combination of Red Clover and Timothy gives wonderful results, for you get both humus and nitrogen from the growth plowed under.

Berry's Timothy and Red Clover mixture has always been and long will be a seeding to give you these results. Yes, soil building, soil conserving, and at the same time produces money making hay and pasture crops. Then too it is economical.

The clover grows erect in the Timothy because the grass helps hold it erect. Thus the clover can do it best. Less spoilage; more leaves. The Timothy benefits by the nitrogen gathered by the clover. That increases its feeding value. All this for a cost of around only \$1.40 per acre. Some sow 8, some 10 lbs. per acre. At the latter rate you get around 23 clover seeds per square foot. Three or four clover plants make a wonderful stand. You have the Timothy besides.

Compare any prices on such a reclaimed mixture with Berry's direct-to-you quotations. We guarantee a saving of 20% and complete satisfaction on every shipment. See page 8.

Send us your order. Cut costs. Make a real seeding.

TIMOTHY and HALF AND HALF RED CLOVER

50% Hardy Home Grown Medium Red Clover

For the average corn-belt farm and to the north of the corn-belt Red Clover is the most popular of all legumes. It does not require as much lime in the soil as alfalfa. It is easier to get started. If you do not use too heavy a nurse crop it is easier to get a stand. It fits into corn rotations unusually well because it puts the soil in ideal condition for corn. You can often get pasture the first year, two hay crops or a hay and seed crop the second year, or hay and pasture or green manure. Clover adapts itself to the needs of individual farms in an admirable way.

Sowing Timothy with clover adds to yields, improves pasture and checks soil erosion better. Makes fine hay and lots of it. This half and half mixture is the way many farmers want it. It is a dandy. You will find mixtures of other proportions. The Super about 28 to 32% Clover, the Lot Leader 75% Clover on page 32 and Regular 15 to 20% on the next page. We give you quality at low cost, way below ceiling. Save money on your Clover orders at Berry's.

North Manchester, Ind.

Dear Sirs: After using Berry's seeds for five years I am fully convinced as to the quality of them. It is to my interest to buy from you. I always speak a good word for Berry's Seeds whenever the occasion arises.

Yours truly,

A. F. STELLAR.

3 POPULAR MIXTURES

Our ready mixed seedings have always been popular. They give a blend of clovers and grasses that produce heavily. They yield more when grown mixed than separately. The cost of seeding is reasonable. All the seed is re-cleaned and shipment is guaranteed to satisfy you in every respect. Return it for refund if not satisfactory.

TIMOTHY AND ALSIKE

15-20% Clover

Regular Grade

Low Cost — Big Yields

An Economical and Highly Satisfactory Seeding

Costs Only \$1.20 an Acre

\$6³⁰ BU.
45 LBS.

A seeding rich in clovers at a very low cost. At 8 pounds per acre you will have around 25 alsike seeds per square foot. It would take around 40% Red Clover mixture to give you that much clover. Makes a wonderful quality of hay. Less dusty than Red Clover and higher in feeding value. Fine for pasture. Checks erosion. A seeding lasts several years. Very popular with our trade because of the satisfaction it gives.

Both Alsike and Timothy are very winter hardy. Alsike being the hardiest of the clovers. It will also grow on soils that are too sour or too wet for other clovers. Timothy and Alsike have the same soil and climatic requirements. They are naturally adapted to growing together. The Timothy supports the clover, enabling it to grow erect, taller and more leafy. The alsike forms a dense mat of clover down in the Timothy and it seems to stimulate the growth of the grass. Thus both do better when grown in a mixture instead of separately.

We know the sections where large quantities of this seed are grown together. The seed is harvested mixed. Because it is so difficult to separate the two we can buy it at a substantial discount below the cost of the Timothy and the Alsike unmixed. We secure the bulk of our seed from these sections. It is processed, cleaned and uniformed. It is passed on to you at prices that are low figures for such fine quality clover rich seeding.

This mixture when sown at 10 lbs. per acre will give an average of 32 Alsike seeds per square foot. It would take about a 50% Mixture of Red Clover to give you as many clover seeds. Alsike seeds are smaller and go farther. This mixture satisfies because it is easy to get a catch, lasts for several years and produces big crop of the finest mixed hay.

We guarantee to save you money on this seed. Ask for sample. Compare for color, purity and clover content. This seed has good growing power. It is truly a remarkable value. We recommend and urge its use because we know it is a seeding that gives satisfaction and the seeding cost is low this year. Buy early and protect yourself on price.

Small Quantities Postpaid any Mixture on this page.

1 lb., 35c; 5 lbs., \$1.50; 10 lbs. \$2.50.

Inoculate Clover Seed
See Page 41

TIMOTHY and RED CLOVER

REGULAR GRADE
15-20% CLOVER

Seeding Cost as Low as \$1.10 an Acre

The same quality of seed that is used in our extra rich grade described on page 42. Our lowest cost mixed seeding. Contains sufficient clover to give an average of 12 to 13 clover seeds per square foot when sown at 10 lbs. per acre. That costs only \$1.25 an acre. 8 lbs. per acre costs only a trifle over \$1.10 an acre. Satisfactory stands of clover can be secured from such a seeding. All hardy U. S. Grown, cleaned seed. If you want to economize as much as possible, buy this Regular Grade of Timothy and Red Clover mixed. If you don't consider it an exceptional value in every way at this low price, return shipment for full refund.

Dalton, Ohio
Dear Sirs: I have been using Berrys seeds for many years, especially Red Clover. I have often compared with others, but find none to equal Berrys' for quality and price. This year I have the best stand of Red Clover in the community.

As ever, your customer,
S. J. KULA

28 to 32% Legumes

Red Clover, Alsike and Alfalfa in a generous measure mixed with Timothy to form a splendid seeding. This is one of our most popular and biggest selling combinations. Ample clovers to produce a good legume stand. An excellent way to see how Alfalfa will do on your land. A seeding of 10 lbs. per acre averages 30 clovers and Alfalfa seeds per square foot. 8 lbs. per acre 25. This seed is all hardy home grown. All re-cleaned seed, carefully mixed. Comes ready to sow. Produces heavily. Makes fine hay and very good for pasture. It will build up your land and check soil washing.

Costs only around \$1.50 an acre to sow and that is a really low price this year for such a fine 4 way mixture. No farmer can afford to neglect grass and clover seedings and with this combination you get a good one at small cost. We consider this one of our best mixtures. Our price is guaranteed to save you money and shipment is guaranteed to satisfy you. See page 8. We are sure you will be delighted with this seeding. It is economical, productive and very popular.

VARIETIES AND TYPES

That which we list as Sweet Clover is the White Type. Because of conditions in principal seed producing sections it may contain some yellow. Lives two years.

GRUNDY COUNTY TYPE. Matures about 3 weeks earlier than common white. Grows around 3½ ft. high. Lives 2 years. See page 46.

YELLOW TYPE. Lives 2 years. Matures between White and Grundy County. Finer stemmed and leafy. See pages 46 and 47.

HUBAM. An annual White Blossom Sweet Clover. See page 47.

GOLDEN ANNUAL. A wonderful new one year yellow. See opposite column page 44.

Sweet Clover Seed Limited

There are a number of factors that have reduced the supply of sweet clover seed below that of normal years. Unfavorable weather conditions which cut the formation of seed. Plowing under large acreages of sweet clover in the principal seed producing sections. This was done because the soil building benefits were greater than the profit from limited seed crops. We have good supplies with which to start the season and our prices are below ceiling. You can get excellent value in sweet clover seed at Berry's this year.

Sow early spring like Red Clover. Use 12 to 15 lbs. per acre. Have a firm seed bed and cover lightly.

SWEET CLOVER

A NEW SWEET CLOVER GOLDEN ANNUAL CLOVER

A Great Cash Crop—Heavy Seed Producer The Most Palatable Sweet Clover

Here is an entirely new variety of sweet clover. A clover that we believe is destined to rapidly replace other sweet clovers because it has so many valuable characteristics. The demand for the seed will be tremendous. Get in on the big money by growing a seed crop this year.

A Big Cash Income

One Iowa farmer sowed 15 pounds on 4 acres and harvested 1250 lbs. of seed last fall. Another got 360 lbs. from two acres and still another 25 bushels or 1500 lbs. from 2½ acres. That is 10 bushels per acre. This was from seeds planted in rows.

This clover ripens seed more evenly than other sweet clover and the seed hangs on to the plant. Very little loss from shattering. In the fall there are practically no leaves or blossoms but all seed.

Characteristics

It is an annual like Hubam, making its full growth, blooming and bearing seed the same year it is sown. It is slightly later than Hubam. It is leafier and has finer stems. The crop is very palatable. It is not as bitter as most sweet clover. Makes a fine pasture after small grain in August, September, when two-year-old sweet clovers are dried up. It is an excellent soil builder. Its roots are thick and fleshy, very much like the two-year sweet clovers. These roots go down about 4 feet.

How to Make Money

Its value for fall pasture and for fall plowing of the clover for fertilizer will be more common when seed is more plentiful and cheaper. Now is the time to cash in on it as a seed crop. Sow with small grain using 6 to 8 pounds per acre. The seed is smaller than other sweet clover. Or plant in rows with a corn planter fitted with drill plates using about 2 lbs. per acre. Be sure you have a firm seed bed. Pack with a roller if possible after seeding. Do not cover over 1 inch. If in rows cultivate as soon as you can see the rows and keep it clean. Inoculate your seed with Sweet Clover Inoculation. Harvest when top seed is fully matured.

Unfortunately our seed acreages of this year nearly all had a little volunteer Hubam Annual White Sweet Clover in them so there will be a little mixture of white but it will otherwise be all high quality annual (one year) sweet clover.

While it lasts our price is \$13.80 per bushel of 60 lbs.; \$7.00 for 30 lbs. and \$3.60 for 15 lbs. f.o.b. Clarinda. Small lots Postpaid 1 lb. 50c; 5 lbs. \$2.25.

Inoculate Your Seeds

Inoculation provides young plants with the bacteria they need to gather nitrogen from the air. Helps assure healthier and more vigorous plants and bigger yields. Easy to apply. Full directions furnished. Cost is low.

Price: 50c for 1 bu. size; 90c for 2½ bu. size.

See page 41 for further information. Berry's Nodule Germ is guaranteed.

BLUE RIBBON BARGAINS
UNHULLED
SWEET CLOVER
ALL RECLEANED SEED
\$4.20 at CLARINDA
PER BU.
30 LBS. to BU. **BAGS FREE**

Our well re-cleaned unhulled seed is the best to use for early winter seeding. It is better than hulled seed either scarified or unscarified. Germination is slower. Will not start to grow during a warm spell in winter. Becomes firmly embedded in the soil. Waits until spring, then grows rapidly. Many customers report that the sowing of our unhulled seed early in the winter gave them the finest stands they ever had. Sow about 20 lbs. per acre. Just broadcast it. No seed bed preparation necessary. If convenient cover it a little before growing season starts. Otherwise let nature take care of it.

This seed is fancy cleaned quality that pleases our trade. It is a high grade product and our prices are very low. Compare qualities. Judge values and note the difference.

Buy Now—Save Money—Sow Early

3 SPECIAL VALUES IN HULLED AND SCARIFIED SWEET CLOVER

LOT WONDERFUL SWEET CLOVER

\$9.90
BU. 60 LBS.

**Our Greatest Sweet Clover
Value
Better than 99% Pure**

We made a wonderful buy on a large lot of White Blossom type sweet clover. It is practically equal to our World Brand grade and still is \$1 cwt. lower in price. It is scarified, high germinating seed and as satisfactory to sow as any seed you can buy. We recommend it because it contains about 5% of mottled seeds which indicates the presence of yellow sweet Clover. In our opinion this increases its value as a pasture, makes good hay and a great fertilizing crop.

Get Seed by Buying Now

With Sweet Clover seed production estimated at only $\frac{1}{4}$ to $\frac{1}{3}$ of normal every one must realize that the supply will not be equal to the demand. While OPA ceilings will fortunately keep prices from skyrocketing it is going to be impossible for a normal amount of this seed to be sold because it simply is not in existence.

We have acquired fair supplies in face of these shortages and if you will order promptly you can get your seed. We suggest you give us the privilege of substituting if the particular kind or grade ordered should be sold out. Considering scarcity, quality and price we are confident these values make it very much to your interest to trade with us on any lot in this book.

SWEET CLOVER LOT DO-MORE

This lot stretches your money over more acres than any other. It is our lowest priced grade. It is a quality that has been giving our customers satisfactory results. It isn't the finest for looks but the favorable reports we get on it indicate its real value and after all, seed is sown for results.

Lot Do-More has been scarified. It comes from re-cleaned stocks. The crop from this seed is the same kind as will be secured from any of the higher priced grades. Sweet Clover is the greatest of all soil builders and the most productive pasture crop.

This Grade in Big Demand

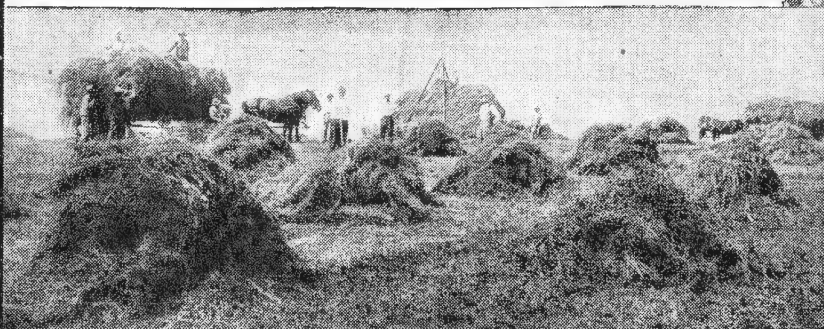

Every year we sell large quantities of this grade and this year the quality is improved. As mentioned above it is not the finest looking seed. It has some off-colored seeds in it. The berries are smaller and therein lies the secret of its performance in the field. While the germination per hundred seeds is lower than in the average larger berried grades, there are so many more seeds in a pound of Lot Do-More that this helps to compensate for the lower test per hundred seeds. The true value of a lot of seed, in our opinion, is the number of sprouts per oz. or per pound. You sow your seed by weight or measure and not by counting it out.

Reduced Seeding Costs

You do not have to sow Lot Do-More at any heavier rate than the higher priced seed. This lot is a real value. Compare it with the cost of sowing any other clover seed. Our customers who use this quality are boosters. They come back for more.

If you want our finest looking seed order World Brand. Lot Wonderful is also a good value. But if you want to cut seeding costs to bed rock order Lot Do-More. You may order this seed with perfect assurance of receiving seed of this character. You can have 60 days to test it after you get it. Then, if for any reason you are not entirely pleased you may return it and your money plus freight will be refunded. We cannot emphasize this value in a fairer or stronger way.

\$8.40
BU.
60 LBS.

YELLOW SWEET CLOVER LOT SAV-MOST

\$9.00
BU.
60 LBS.

We offer this Yellow Type Sweet Clover. It is a biennial or two year kind. Somewhat leafier than the White Type. Does not grow as tall and coarse. Blooms and matures 10 days to two weeks earlier. Preferred to many for hay. Some claim it is surer to make a stand.

Our Lowest Priced Yellow Type

Lot Sav-Most gives you a very low cost on this finer stemmed leafier sweet clover. It gives you a lot of value at low cost. We sell large quantities of this seed. It is our lowest priced grade. Naturally it isn't as nice looking as the World Brand or Premium on page 47 but we are sure you will find it a real bargain value. There are some smaller berries in it. The color and uniformity are not equal to our World Brand but the amount we sell of it each year indicates that it gives satisfaction to our trade.

Sow it alone or in mixture for hay and pasture. Start Sweet Clover this year. It is a money maker. Stands heat and drought. Produces lots of valuable feed and does a wonderful job of soil building. Lot Sav-Most gives you the yellow Type Sweet Clover at very low seeding costs.

Inoculate All Clover Seed

Inoculate with Berry's Nodule Germ. Inoculation helps make more vigorous growth, better stands and yields. Costs only 50c, 1 bu.; 90c, 2 1/2 bu. Easy to apply. Read page 41. It pays to use it.

3

WORLD BEATERS**SWEET CLOVER
BLUE RIBBON BARGAINS****LOT
PEARL****EXTREMELY
LOW
PRICES
COMPARE ON
A QUALITY
BASIS****GRUNDY
COUNTY****Dwarf Type
Sweet Clover**

An earlier maturing variety of biennial White Blossom Sweet Clover. Grows around 3½ ft. tall. Blooms about three weeks earlier than the Common Sweet. Matures seed more evenly. Easier to handle because of its shorter growth. It is in big demand where the common grows too rank or where earlier maturity is desired. Only requires 12 lbs. of seed per acre because the berries on this variety generally run smaller in size.

**World Brand
Quality**

We have the Grundy County type only in our finest quality. World Brand has pleased our most critical trade for years. It is scarified, cleaned, tested and shipment is guaranteed to please you in every way. You may compare it with the finest obtainable. If you do not find this a superior value at our low price you may return it for refund. See page 9.

Supplies of this Grundy County type are much smaller than of the common type. Be sure to order your Grundy County Type Sweet Clover early and save money. There is good money in seed production.

Inoculate your Sweet Clover seed. See pages 40 and 41.

**\$11.00
BU.
60 LBS.****A Good Value—Moderately Priced**

Lot Pearl is the biennial or two year sweet clover same as the World Brand grade described on this page and the Lot "Do-More" on page 45. The tall growing, big-rooted, long seasoned sweet clover. A leader in production. Unexcelled as a soil builder. Big pasture yields. Enormous hay crops. A valuable money making crop. Average seeding required is only 15 lbs. per acre.

A Medium Grade

Lot Pearl sells at lower prices because it is not as nice looking. If you demand the finest order our World Brand. If you want to cut seeding costs and willing to take seed that has some small berries and some off colored seed, then Lot Pearl should suit you ok. It has the ability to produce good stands. The seed is cleaned and blended. It lacks the uniformity and smoothness of our higher priced lots, but many of our customers have used a grade like this for many years and they are well pleased.

Compare Values

Lot Pearl is like our choice grade. There are a good many more seeds per pound than in the World Brand. If you would weigh out an equal weight of seed out of both grades and test all of the seeds in each pile you might find the larger number of sprouts in the lower priced seed. It is important to remember that while the germination per hundred seeds is lower in the cheaper grades, that larger number of seeds per pound tends to equalize that difference.

Inoculate Sweet Clover
Page 41

**WORLD BRAND
SWEET CLOVER**

Do you want the satisfaction of knowing you have the best? Do you like to compare values with your neighbor and prove that you have the finest quality and the biggest bargain? Order Berry's World Brand, for it is our finest and best. A first class quality in every way. See the sample of World Brand Clover enclosed for the fine character of this grade. Consider quality. Then compare prices. You'll see genuine savings and you will receive beautiful seed.

Sweet Clover has been one of our specialties for years. We were the first to feature it as a main farm crop in a big way. These many years of specialization have taught us much about the great crop and about handling, sweet clover seeds. Our buying contracts, cleaning and scarifying machinery, large volume, etc., enables us to give you values such as this. When you sow World Brand you sow our finest. There is no seed that would give you better assurance of success.

Sweet Clover is a crop of great value. Its enormous pasture capacity, its big seed yields, its heavy hay crops, its marvelous soil building power, these are all money making features. Cash in on them in the fullest degree by sowing Berry's World Brand.

Sweet Clover seed supplies are not large this year. We can take good care of your order if you will send your order early. Do not wait until late in the season. Assure yourself of the seed you need and have it on hand at the same time you need it by ordering now.

Binghamton, N. Y.

Dear Sirs: I have used your seeds for some time and I have had good results. I have used other seeds, but they are too high. I save about a third in buying from you and get better results.

Yours truly,
MIKE ZOPP.

LOW PRICE on HUBAM TYPE CLOVER

ANNUAL WHITE SWEET CLOVER

\$13.80
BU.
60 LBS.

The Sweet Clover That Does Two Years Work in One

Hubam seed is relatively scarce this year but we were fortunate in securing some fine seed. Supplies are limited however so order early. Sow it this spring. Use it as a hay, seed, pasture or soil building crop this fall. Hubam is a variety of sweet clover that blooms and bears seed the same year it is sown. It is an annual. Does not live over winter. Gives an enormous growth and production in a short season.

Get Two Cash Crops in One Year

Sow Hubam Type with small grain. Harvest your grain. Then cut clover for seed. Produces up to 600 lbs. of seed per acre. Sometimes more. Or use it as a pasture. It grows fast, attaining height up to 4 or 5 feet if not cut or pastured. Think what a carrying capacity that means. The growth is rich in protein, making it all the more valuable. Makes a heavy production of rich hay if cut when it begins to bloom. Or if you want to enrich your land fast, plow under a full growth. Some pasture it a while and then plow it under. Think of it, all this in the same year the crop is sown. No wonder farmers who know the crop were willing to pay up to \$18.00 a bushel for the seed a few years ago.

Seeding Suggestions

Inoculate your seed with Berry's Nodule Germ. See Page 41. Sow on winter grain when ground can be harrowed lightly. Sow 15 lbs. per acre. Harrow lightly or roll after seeding. Rolling is best. Sow with spring grain in a similar way. Cover seed lightly with a harrow and roll. The firmer the seed bed the better.

If you cut Hubam as a seed crop or use it for pasture, often the crop will reseed itself for another year. It does not become a pest. It is easily eradicated by cultivation. If plowed under before it seeds it will not come up again.

Low Price on World Brand Quality

Our Hubam Type seed is carried in one quality and that is our World Brand. That is our best grade and a fine quality that pleases critical buyers. Make comparisons on a quality basis and you will see the value of our lots. This is the year to get started with this valuable, quick acting, money making clover. Use Berry's World Brand scarified seed. We use care in the purchase and preparation of this seed. Our seed is scarified. Shipment guaranteed to please you and save you money. See Page 8.

We also call your attention to the new Golden Annual Sweet Clover described on page 44. This is very similar to Hubam and prices are about the same. Both are money making crops and you should find either or both equally profitable to grow.

Small Lots, postpaid: 1 lb., 50c; 5 lbs., \$2.25.

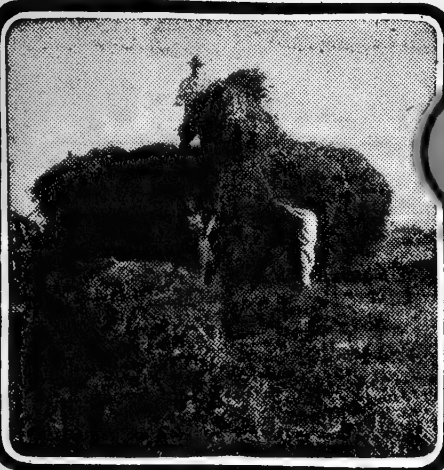

MIXED SWEET CLOVER

Lot PREMIUM

We consider this one of our biggest Sweet Clover values. It is a fancy quality seed which is just under our famous World Brand grade for quality. That means it is seed having good color and size and high purity and scarified for high germination. You can buy this fine fancy seed at this low price because it contains both yellow and white. That does not lower its value for practical purposes and enables you to make extra savings. Do not confuse this with lower grade mixtures of white and yellow sometimes sold. This Lot Premium has the quality that pleases. Runs approximately 80% White and 20% Yellow.

\$9.90
BU.
60 LBS.

INOCULATE CLOVERS PAGE 41

WORLD BRAND YELLOW TYPE SWEET CLOVER

\$10.80
BU.
60 LBS.

An Extra Value

Our very finest extra fancy quality. The choice of our most critical trade. Guaranteed to please the most exacting trade. See guarantee, page 8. Seed like this is scarce and difficult to obtain this year but we have some fine re-cleaned scarified seed on hand for early buyers.

Yellow Type Sweet Clover is in great demand. It is finer stemmed than the white and more leafy. Does not get so rank. Matures about 10 days earlier. Many say it is easier to grow. Provides pasture in abundance. Makes hay superior to white.

Brings Better Profits

Farmers generally are in dire need of clovers. They will restore humus, fertility and profits. Land will be easier to work. It will drain better yet hold the proper moisture at the surface for growing crops. Make your soil perform better. Use Sweet Clover to do the job. It will improve land quicker and at lower cost.

See page 41 for prices on other grades. All are excellent values. Let us take care of your Sweet Clover seed requirements.

It has been our specialty for years and we are equipped to take care of your needs.

Lakefield,
Minn.

Dear Friends:
I like your seeds and recommend them to others. Your

seeds do well in this section. I save money by buying from you. I am well satisfied and am sure other farmers will, too.

Yours truly,

JOHN GREIN.]

YOUR HOME GARDEN

SAVES MONEY AND RATION POINTS

PLANT A COMPLETE GARDEN THIS YEAR

DO YOUR PART TO WIN THE PEACE

You can help make the coming peace a just and lasting one by growing your own vegetables. This sounds a bit far fetched, but from our experiences at previous "Peace Negotiations" the country with food to offer to the starving people in war stricken areas has a definitely superior opportunity to direct the final settlement.

Your vegetable garden can have influence out of all proportion to its size and the amount of labor spent in it. Make your garden a good one this year.

We are continuing to offer our big value—The Family War Garden Collection—as listed on page 53. You get more seed for less money when you buy one of Berry's collections. Our quality is guaranteed—Grow the finest vegetables from the highest quality seed.

and PROTECT YOUR Family's HEALTH and PROSPERITY.

Raising lots of fresh vegetables for eating and canning not only insures you and your family better health but also adds greatly to your farm income. Surveys made recently show that the most successful farmers today are those who raise a big home garden. The whole family can take a part in it and the garden is the backbone of successful farm management. It also trains the children in a family to do their part and they here may learn the vital importance of assuming responsibility in contributing something vital to their own family's welfare.

We all know fresh vegetables from our garden taste better than any we may buy. There is also nothing like home canned foods. But some of you may not appreciate how far on food or living costs your own garden will carry your family. Government economists say a ½ acre farm garden will save up to \$200 on food costs for the average family of 5. With Berry's New "Victory Garden" Bulk Packages (see page 53) and our big collection offers on pages 49, 52 and 53 you may get enough seed to plant 1 acre of all vegetables for as little as \$3.90.

THE BEST ANSWERS TO GARDENING QUESTIONS

FREE CROP BULLETINS! SEE LAST PARAGRAPH

Every farmer and gardener can increase their yields and profits by reading the valuable and practical Free Bulletins distributed by the U. S. Department of Agriculture, the State Experiment Station in your own State, and your own County Agent.

There are several very good Victory Garden Bulletins which will enable you to increase your crops of vegetables without increasing your garden space and without increasing your investment. Different varieties do best in different localities. Some varieties are better for home canning and others for marketing.

The Free Bulletins on the planting and care of Fruits, Berries, Roses, Shrubs, Windbreaks, etc., are almost indispensable. Your County Agent can usually tell you which Bulletins to secure and where to write. If you have no County Agent, write your U. S. Senator or Congressman or write to the Division of Publications, Office of Information, U. S. Department of Agriculture, Washington, D. C.

DO NOT ORDER THESE FREE BULLETINS FROM THE BERRY SEED COMPANY AS THEY CAN ONLY BE SECURED FROM A GOVERNMENTAL OFFICE.

ORDER NOW BERRY'S TELL YOU WHAT AND HOW TO PLANT

In order to aid you in planning your garden so as to have all the vegetables necessary to health in your diet we'll furnish with each garden seed order for \$1.00 or more our Planting Guide. This shows you just how far Berry's "Victory Garden" Bulk Packages will go so you won't need to waste any seed. If you want to be sure of the right vegetables and varieties and save the most money, order our big "Lucky 7" or Farm Family Garden Collection pages 49 and 53. Also on page 53 see why in every Victory Garden Bulk Package you get more seed for your money at Berry's.

GERMAIN'S HOTKAPS

Crop insurance at low cost enabling you to market your vegetables three weeks earlier and insures finest quality. (Pictured on page 52.) Hotkaps are "individual hothouses" for each plant giving protection and forcing plant growth. They allow the proper amount of air and light for quickest plant development. Hotkaps are used to protect any flower or vegetable, being particularly adapted for vine crops.

Complete instructions given with each size package ordered or get our free circular before ordering. Postpaid prices: 25 Kap (Home Garden) size with paper setter, 50c. 100 Kap Size with fiberboard setter, \$1.95. 250 Kap Size with setter, \$3.50.

Not prepaid: 1,000 Kaps without Setter, \$11.00. Weight, 28 lbs.

SEE POST CARD ENCLOSED

You will find enclosed in this catalog a post card addressed to the Berry Poultry Farm of Clarinda, Iowa. This is a different firm than the Berry Seed Co. While there is no connection between these companies we are sure you will be well pleased with any dealings you may have with the Berry Poultry Farm. Mail this card promptly and you will hear from them direct. They will send you free large poultry catalog, printed in colors.

I WANT EVERY GARDENER TO "TASTE THE DIFFERENCE" OF THESE 8 FAVORITE VEGETABLES. A NEW THRILL AWAITS YOU IN THEIR EXTRA DELICIOUS QUALITY

Charles Sinn, our general garden seed manager, is now serving you in the U. S. Army.

THE BEST NEW DWARF GREEN BEAN

LANDRETH'S STRINGLESS An Improved Burpee's Bean

For years everyone has planted the old standby, Stringless Green Pod Beans, in their garden. It has given satisfaction—just as the old "Model T" did in the days gone by. Now we are able to give you something new and much better at little extra cost. Did you ever stop to think how little your garden seed costs? But my, what a difference there can be—something you must see for yourself.

Be sure and try this one now. It is more prolific than the old Burpee's, much better quality and more hardy. It is disease resistant—will thrive anywhere. Make a succession of plantings this year. You need at least 2 pounds for your garden. Our stock is western grown, hand-picked and polished, germination about 95%. There is no better seed or variety than this for the home garden. Lot No. 135—V.G.B.P., 15c; ½ lb., 20c; 1 lb., 35c; 2 lbs., 60c, postpaid. Other Beans, pages 54-55.

OUR BEST-A FAVORITE OF THOUSANDS

Berry's Beat-'Em-All Radish

Think of it! Crisp, snappy radishes ready to eat 20 to 22 days after planting. A decidedly superior bright scarlet, globe shaped variety, mild, tender. Extra early variety of superior quality for home or market. Save money by buying enough for a succession of plantings and enjoy fresh radishes all summer. Lot 527—Postpaid: Pkt., 15c; V.G.B.P., 20c; ¼ lb., 75c; ½ lb., \$1.35; 1 lb., \$2.25. Radishes, Also Page 45

AN EARLY TOMATO WONDERFUL QUALITY

Berry's Early Wonder Tomato

A favorite with home and market gardeners for years. The very earliest tomato that gives you unsurpassed quality. The color is a deep, glossy, bright, brilliant red. The skin is smooth. The thick meat is finely flavored. The fruit is nearly round and large in size.

Has a small seed cavity, firm but juicy flesh. A vigorous grower, it bears enormous crops over a long period. Grow this tomato for the earliest finest quality fruit. Lot 656 Postpaid: Pkt., 15c; V.G.B.P., 27c; oz., 50c; ¼ lb., \$1.50; ½ lb., \$2.75.

Other Tomatoes, Page 50

Berry's Tenderflesh Carrot

The finest health giving vegetable at its best. Crisp, tender, delicately flavored flesh makes this a garden favorite with anyone who grows it. Supreme quality. Coreless, distinctive cylindrical in shape with very little taper, its flesh has a deep rich orange color. This is a very early maturing strain developed for home gardens. Some say it is the favorite vegetable in their garden. Be sure to try it! Lot 210—Postpaid: Pkt., 15c; Victory Garden Bulk Package, 29c; oz., 60c; ¼ lb., \$1.75; ½ lb., \$3.25.

Regular Varieties, Page 58

EDIBLE SOY BEANS

Bansel

Try some of this very nutritious different bean. Especially desired for meatless days. Soy Beans are high in proteins and will add real tasty nutrition to your meals.

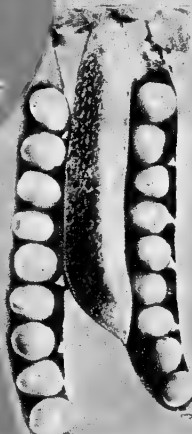

Bansel is an early variety which will ripen in all parts of the country. Used for both green shelling and dry like navy beans. The seeds are large, round, yellow, and of a mild pleasing flavor.

A fine home garden variety that is very productive and not susceptible to shattering. The plant is of medium height, and the pods are yellow with black tinge when ripe. 96 days from planting to eating. Lot 120—Pkt., 15c; ½ lb., 20c; 1 lb., 35c; 2 lbs., 60c, postpaid.

Berry's Supreme Wonder Pea

Named because you will marvel at its quality and production. A dwarf wrinkled variety growing vigorous dark green pods about 20 inches high. They are loaded with pods filled with dark green peas. You have never tasted peas so tender, so sweet, so delicious. The best there is for your garden. Plant at least two pounds at different times so you will have plenty for canning. Lot 456—Postpaid: V.G.B.P., 15c; ¼ lb., 27c; 1 lb., 45c; 2 lbs., 80c.

See Also Pages 62-63

AN EXTRA FINE EARLY CABBAGE

Berry's Earliest Cabbage

We challenge you to beat this variety anywhere for earliness, quality and productiveness. A round head type cabbage that starts with a bang, heads in a hurry and is ready for the table before most kinds curl up its center leaves. Heads are firm, color bright green. Rich flavor. Grows compact so may be planted closer together than most varieties. For the first cabbage in your own garden, plant this. Lot 180—Postpaid: Pkt., 15c; Victory Garden Bulk Package, 25c; oz., 80c; ¼ lb., \$2.20; ½ lb., \$4.00.

Later Varieties, Page 57

A BEET OF TRULY SUPERIOR QUALITY

Berry's Early Blood Red Beet

An early variety of deep blood red color. A selection of equally superior quality for table, canning and pickling. Smooth globe shaped roots with short tops. Extra sweet and crisp, it matures quickly but is a splendid keeper. If you want the best, try this one. It will be a favorite among all others. Lot 156—Postpaid: Pkt., 15c; V. G. B. P., 22c; ¼ lb., \$1.10; ½ lb., \$2.00; 1 lb., \$3.50.

BERRY'S TOMATOES

Rich Juicy

EXTRA EARLY SELF DETERMINATE KINDS

The varieties in this group have been developed for Extra early production of good sized fruit. They all yield very heavy crops on small stocky plants. They need no pruning since the plants are of dwarf type. If you live in the Great Plains area, from North Dakota and Montana to Texas, these varieties will grow best for you. If you have limited space and want neat compact tomato plants that really produce, order some of these varieties.

651 All Red. Needs no pruning. A fine first early variety with the good qualities of Bison plus large smooth fruits without green top or green core. Pkt. 10c; V.G.B.P. 17c; oz. 50c; ¼ lb. \$1.50 Postpaid.

658 Victor or Bounty. A new variety from North Dakota. Bears a huge crop of large smooth globe shaped fruit on a small sturdy plant. Actual counts have shown more than fifty fruits on a plant at one time. The fruit are scarlet and without green core or green top. 60 to 70 days from planting to eating. Pkt. 10c; V.G.B.P. 20c; oz. 50c; ¼ lb. \$1.75 Postpaid.

654 Bison. The old reliable mother of the above new varieties. Bison has proved through the years that tomatoes can be grown in a short, hot, dry season. 60 to 70 days. Large fruit, self determinate plant. Pkt. 10c; V.G.B.P. 25c; oz. 60c; ¼ lb. \$2.00 Postpaid.

BISON

EARLIANA

655 The old standby for many gardeners. 65 to 75 days from planting to eating, a heavy yielder of fair sized red fruit of good quality. This is a safe early variety that has proved its worth to thousands of gardeners for many years. Our Earliana seed is an improved strain that will please you. Pkt. 10c; V.G.B.P. 25c; oz. 60c; ¼ lb. \$2.00, Postpaid.

INTERMEDIATE OR SECOND EARLY SORTS

664 Rutgers. The outstanding new variety in its class. Really an improved Marglobe maturing a little earlier and being a heavier yielder. It ripens from the inside out to a uniform bright scarlet color. Thrives under more unfavorable conditions than other varieties. Pkt. 15c; V.G.B.P. 20c; oz. 28c; ¼ lb. 80c; ½ lb. \$1.45.

674 Bonny Best. Earliest of all tomatoes in this group. Fruits medium large, apple-shaped, smooth, solid, bright scarlet in color, of excellent quality, setting in clusters of 4 to 8. Unexcelled as a general purpose tomato. Pkt. 10c; V.G.B.P. 25c; oz. 60c; ¼ lb. \$2.00.

665 Marglobe. A most popular all-purpose variety, very vigorous and productive, disease resistant. Uniformly large solid fruits, bright scarlet, of finest quality and flavor. Pkt. 10c; V.G.B.P. 20c; oz. 50c; ¼ lb. \$1.75; ½ lb. \$3.25.

672 Prichard. A new disease resistant early variety producing ripe fruit in about 75 days. Large globe shaped fruit ripening to a deep red both inside and out. A heavy producer on rich soils. Pkt. 10c; V.G.B.P. 20c; oz. 50c; ¼ lb. \$1.75.

652 John Baer. An old favorite with large smooth scarlet red fruits of excellent flavor. Pkt. 10c; V.G.B.P. 25c; oz. 60c; ¼ lb. \$2.00; ½ lb. \$3.75.

RUTGERS

JUNE PINK

650—68 days. The earliest pink variety. A fine first early shipper. And favorite with home gardeners. Fruits are medium sized, smooth, and very attractive. Produces throughout the season. Pkt. 10c; V.G.B.P. 20c; oz. 45c; ¼ lb. \$1.25, postpaid.

Oxheart

this giant of all tomatoes—a favorite of thousands. Almost seedless, making it fine for slicing. Vines are vigorous and productive, fruits large, oblong-purplish red, thin skinned and solid. Recommended for superior flavor. Pkt. 10c; V.G.B.P. 25c; oz. 60c; ¼ lb. \$2.00.

663 New Stone. An old reliable home garden type. Very productive, fruits large, smooth, attractive scarlet-red, of fine flavor. Pkt. 10c; V.G.B.P. 15c; oz. 35c; ¼ lb. \$1.00, prepaid.

671 Oxheart—A distinctively attractive variety entirely different from any other tomato. Increasing in popularity each year because of its very solid meaty fruits of a delicious sub-acid flavor, almost seedless, the fruits grow extremely large and heart shaped. Flesh is pink. A favorite of thousands for the home garden. Pkt. 10c; V.G.B.P. 22c; oz. 60c; ¼ lb. \$2.00.

SMALL FRUITED VARIETIES FOR PRESERVES

657 Red Cherry. Pkt. 10c; oz. 50c.
659 Red Pear. Pkt. 10c; oz. 50c.
667 Yellow Plum. Pkt. 10c; oz. 50c.
673 Yellow Pear. Pkt. 10c; oz. 50c.
677 Small Fruited Mixed. Pkt. 10c; oz. 40c.
669 Ground Cherry. Pkt. 10c; oz. 50c.

SPECIAL FAVORITES

679 Golden Queen—84 days. A main crop, large, smooth, bright yellow tomato. Good for home gardens. Medium sized plants. Fruits are solid and of mild flavor. Pkt. 10c; V.G.B.P. 20c; oz. 45c; ¼ lb. \$1.25, postpaid.

656 White Beauty. Many feature this variety as "Snowball." An ivory white tomato with paper white flesh. As big as Ponderosa with few seeds and no acid. Grow something different in a big excellent quality tomato that anyone can eat. Pkt. 10c; V.G.B.P. 16c; oz. 50c; ¼ lb. \$1.50.

662 Golden Ponderosa (Yellow). A very large deliciously mild flavored late variety for the home garden, wilt-resistant and nearly seedless. Same as Ponderosa except flesh deep yellow color. Pkt. 10c; V.G.B.P. 16c; oz. 50c; ¼ lb. \$1.50.

653 Berry's Favorite 3—1 pkg. each Rutgers, All Red, and Oxheart. Varieties every gardener will enjoy. Regular price 35c—our special offer No. 653—25c, postpaid.

LATE or MAIN CROP

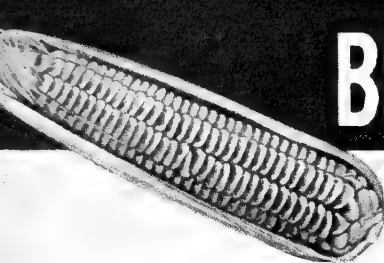

666 Berry's Giant Improved Ponderosa—the largest tomato developed to date. Our seed has been triple tested, in laboratory greenhouse and trial grounds in removing the roughness and splitting tendency from all tomatoes—a favorite of thousands. Almost seedless, making it fine for slicing. Vines are vigorous and productive, fruits large, oblong-purplish red, thin skinned and solid. Recommended for superior flavor. Pkt. 10c; V.G.B.P. 25c; oz. 60c; ¼ lb. \$2.00.

663 New Stone. An old reliable home garden type. Very productive, fruits large, smooth, attractive scarlet-red, of fine flavor. Pkt. 10c; V.G.B.P. 15c; oz. 35c; ¼ lb. \$1.00, prepaid.

671 Oxheart—A distinctively attractive variety entirely different from any other tomato. Increasing in popularity each year because of its very solid meaty fruits of a delicious sub-acid flavor, almost seedless, the fruits grow extremely large and heart shaped. Flesh is pink. A favorite of thousands for the home garden. Pkt. 10c; V.G.B.P. 22c; oz. 60c; ¼ lb. \$2.00.

SMALL FRUITED VARIETIES FOR PRESERVES

657 Red Cherry. Pkt. 10c; oz. 50c.
659 Red Pear. Pkt. 10c; oz. 50c.
667 Yellow Plum. Pkt. 10c; oz. 50c.
673 Yellow Pear. Pkt. 10c; oz. 50c.
677 Small Fruited Mixed. Pkt. 10c; oz. 40c.
669 Ground Cherry. Pkt. 10c; oz. 50c.

BERRY'S SWEET CORN HYBRIDS

**HYBRIDS
ARE SWEETER**

Why pay more for Hybrid sweet corn? Because Hybrids outyield open pollinated varieties, have large more uniformly shaped and filled ears, are sweet (actually contain more sugar), and Hybrids are disease resistant. You don't throw away half your crop because smut is in the ears when you plant Hybrids.

Plant early, midseason and late varieties on the same day. This will give you a succession with less labor.

**HYBRIDS ARE
MORE UNIFORM**

EARLY SPANCROSS

64¢
LB. 70 Days from planting to eating. An extra early golden Hybrid with cold resistance. Can be planted in April in all but the most northern states. Medium sized ears—short stalks. No. 291X—Pkt. 15c; ½ lb. 34c; 1 lb. 64c; 2 lbs. \$1.19 Postpaid.

EARLIGOLD

66¢
LB. Berry's "Best Early" Yellow Sweet Corn 72 days from planting to eating. A good sized extra early variety growing 5½ to 6 feet tall. Ears are uniform, 12 to 16 straight rows well filled tips, 6½ to 7 inches long. Extra fine quality. No. 280X—Pkt. 15c; ½ lb. 35c; 1 lb. 66c; 2 lbs. \$1.23; Postpaid.

MIDSEASON MARCROSS

60¢
LB. 76 days. A fine market and home-garden variety. Stalks are short but sturdy, highly resistant to bacterial wilt. Ears are long and plump with 10 to 14 rows of medium broad kernels of finest quality. No. 294X—Pkt., 15c; ½ lb., 32c; 1 lb., 60c; 2 lbs., \$1.10, postpaid.

64¢
LB. **GOLDEN CROSS** 80 days from planting to eating. A main crop variety that has proved its value over a number of years. Grows 6 feet tall, produces two or more ears per stalk. Ears 8 inches long, 10 to 14 rows, very uniform in size and shape. No. 276X—Pkt., 15c; ½ lb., 34c; 1 lb., 64c; 2 lbs., \$1.19, Prepaid.

60¢
LB. **TENDERGOLD** 81 days from planting to eating. An outstanding main crop variety, grows 6½ to 7 feet tall. Produces best quality fodder. Ears 7 to 8 inches long with 10 to 14 rows. Highest eating quality. A dandy for the farm garden. No. 275X—Pkt., 15c; ½ lb., 32c; 1 lb., 60c; 2 lbs., \$1.10, Postpaid.

66¢
LB. **IOANA** 83 days from planting to eating. A main crop "All American Winner" producing especially attractive ears. Grows 6½ feet tall with good drought resistance and few suckers. Ears are 8 inches long with 12 to 14 rows, very uniform, cylindrical, and well filled. Exceptionally sweet and well flavored. A really outstanding golden variety. No. 282X—Pkt., 15c; ½ lb., 35c; 1 lb., 66c; 2 lbs., \$1.23, Postpaid.

58¢
LB. **Berry's 12 Row Hybrid Blend** A combination of 12 row hybrids with same plant heights and that mature at different times. Enjoy hybrid quality over a long picking period of at least two weeks by planting this blend. No. 286X—Pkt., 15c; ½ lb., 31c; 1 lb., 58c; 2 lbs., \$1.05, postpaid.

Regular Sweet Corn Prices, Page 55

LATE LINCOLN

67¢
LB. 85 days from planting to eating. A new main crop variety with unusual qualities. Drought tolerant, stiff-stalked plants grow 7 to 7½ feet tall. Produces 12 to 14 rowed ears with husks so tight that earworm damage is very small. If you are troubled with wormy corn, plant this beautiful golden hybrid for your main sweet corn crop. No. 283X—Pkt., 15c; ½ lb., 36c; 1 lb., 67c; 2 lbs., \$1.25, postpaid.

STOWELL'S Evergreen Hybrid

69¢
LB. **A Favorite Variety at Its Best** Of many hybrids developed of the Stowell's type, we have selected this as the best. It gives you unsurpassed Stowell's quality and increased yields. It is vigorous and highly resistant to disease, wind and drought. Plant successively at one week intervals. No. 279X—Pkt., 15c; ½ lb., 36c; 1 lb., 69c; 2 lbs., \$1.29, postpaid.

Quality Gardens at Lower Cost

Victory Garden Bulk Packages More Seed for Less Money

This year we are giving our customers the greatest values in vegetable seeds. That means good dependable quality in larger measure at lower cost. Our farmer customers and all who have large gardens will find the lowest prices in bulk seed. That means in larger quantities than packets. The average packet is good for small gardens. For the in between or medium sized garden we have prepared the Victory Garden Bulk Packages which are designated as V.G.B.P. in the catalog. Present conditions still make it highly advisable to grow larger gardens. Grow plenty of food for your family. It will save you money and it's true patriotism.

QUALITY That Really Satisfies

The quality of your vegetable crops depends in part on the fertility of your soil and partly on weather. However, no matter how fertile your soil or how favorable the weather you will not have the finest quality unless you plant seed of the improved and twice tested varieties. We at Berry's pride ourselves not in novelties but in the best of quality that brings you delicious flavor along with heavy productions. So you will find here in this book the best of the new and older varieties that make for real satisfaction from your garden.

BERRY'S GUARANTEE

Our large garden seed business is built on the firm foundation of thousands of satisfied customers and each year new thousands find Berry's value outstanding. Our seeds are all laboratory tested and produced by dependable growers.

We positively guarantee our garden and flower seeds to grow. If they fail to grow due to poor germinating quality of the seed we will replace such seed free of charge. Safe arrival as well as satisfactory quality are also guaranteed.

It is easy, safe and economical to order by mail. Save money and buy on an unqualified replacement guarantee.

BERRY'S FARM FAMILY GARDEN

Will plant an acre to delicious, heavy yielding vegetables

Kill Bugs and Insects with BUG-DUST-O-CIDE

\$1.00
SPECIAL

A 2½ lb. carton of this famous Bug-Dust-O-Cide together with a duster. Full directions given. Ideal for the average gardener. Price is postpaid. If you do not have dusting equipment be sure to try this \$1.00 special.

Prepaid prices on a fine Insecticide

This is a powerful combination of Rotenone, Lethane Cupro-cide and Nicotine. It has a triple action on certain insects—as a stomach poison, a contact poison, and as a repellent. It is non-poisonous to humans and domestic animals when used as directed.

Bug-Dust-O-Cide controls aphids, bean beetles, flea beetles, leaf hoppers, cabbage worms, cucumber beetles, potato beetles, and certain other insects. Bug-Dust-O-Cide also controls certain plant diseases. Try it on mildew or other fungus diseases.

- 1 lb. Bug-Dust-O-Cide Sifter Can—35c.

- 5 lb. Bag Bug-Dust-O-Cide—\$1.60.
- 10 lb. Bag Bug-Dust-O-Cide—\$3.00.
- 25 lb. Bag Bug-Dust-O-Cide—\$6.95.
- 50 lb. Bag Bug-Dust-O-Cide—\$12.00.
- 100 lb. Bag Bug-Dust-O-Cide—\$20.00.
- Empty Fiberboard Dusters—25c each.

ORDER SEVERAL VICTORY GARDEN BULK PACKAGES

BERRY'S GARDEN BEANS

Famous for Their Tested Quality

Beans, Peas and Sweet Corn require a large part of your total gardening space. Therefore in connection with Beans and Sweet Corn on these two pages also refer to pages 62-63 for Peas. In planning how much room you need figure an average family of 5 persons for the quantities shown in our "Lucky 7" Collection, page 49, or a total of 5½ pounds.

Garden Inoculation for All Beans and Peas

Inoculate your bean and pea seed this year and get the added benefits these nitrogen supplying bacteria will give to your legumes. Uni-Culture inoculation is prepared for all garden legumes. Beans, Peas, Sweet Peas, Edible Soy Beans, and Lupines can all be inoculated from the same package. A 10c package will inoculate up to 10 pounds of seed. You can't make your treatment too strong since Uni-Culture is not harmful to seed.

No. N-10—Will inoculate up to 10 lbs., 10c, postpaid.

GREEN PODDED BUSH BEANS

136 Full Measure. A round pod stringless variety very desirable for canning. Produces a large crop with very fleshy straight pods 6 to 6½ inches long. 54 days from planting to picking. ½ lb., 21c; 1 lb., 37c; 3 lbs., \$1.00, postpaid.

116 Tendergreen. (See picture at right.) Hardy and prolific. Light green pods 7 in. long are round, meaty, tender, stringless. For the home garden, canners or truckers. Postpaid: ½ lb., 19c; 1 lb., 34c; 3 lbs., 92c.

134 Burpee's Stringless Green Pod. The old favorite garden bean for home, market or canning. Plants sturdy, very prolific. Pods round, fleshy, perfectly stringless and of excellent quality. Postpaid: ½ lb., 18c; 1 lb., 33c; 3 lbs., 90c.

132 New Bountiful. An extra early green podded variety ready to pick in six weeks. Vines vigorous and productive. Brittle, meaty and tender, absolutely stringless, and of fine flavor. Postpaid: ½ lb., 20c; 1 lb., 35c; 3 lbs. 95c.

133 Giant Stringless Green Pod. One of the favorite stringless podded sorts. Pods round, meaty, brittle. Stringless throughout entire growth. Heavy producer. Postpaid: ½ lb., 19c; 1 lb., 34c; 3 lbs., 92c.

143 Sieva Pole Lima. A small seeded Pole Lima. Very prolific and early maturing. Small flat beans of the highest quality. $\frac{1}{2}$ lb., 20c; 1 lb., 35c, postpaid.

Kentucky Wonder

Save money. Order these speckled bean collections or from pages 49 and 53. Plant more than ever before. Help America be strong.

WRITE FOR PRICES ON LARGER AMOUNTS.

No. 148—Great Northern or Idaho. 90 days. The most popular navy bean grown. A tremendous yielder of large white beans. Exceptional quality, the best for soup or baking. $\frac{1}{2}$ lb., 15c; 1 lb., 22c; 3 lbs., 58c, postpaid.

No. 147—Michigan Navy. 95 days. A hardy and prolific small almost round white navy bean. Pods about 4 inches long. Used generally for baking. $\frac{1}{2}$ lb., 15c; 1 lb., 22c; 3 lbs., 58c, postpaid.

No. 118—Pinto. 100 days. A dry land bean that does well in the West and South. Used for making chili. Oval shaped seed of light buff with brown markings. A heavy yielder. $\frac{1}{2}$ lb., 12c; 1 lb., 20c; 3 lbs., 50c, postpaid.

No. 150—Red Kidney. 95 days. The old fashioned baking bean. Produces large flat green pods, well filled with large dark red kidney-shaped beans, rich in flavor. Postpaid: $\frac{1}{2}$ lb., 18c; 1 lb., 29c; 3 lbs., 80c.

POLE BEAN COLLECTION

$\frac{1}{2}$ lb. Kentucky Wonder Wax, 23c.
 $\frac{1}{2}$ lb. King of the Garden Lima, 22c.
 $\frac{1}{2}$ lb. Kentucky Wonder, 21c.
 Catalog value, 66c. You save 16c.
 No. 112—3 varieties only 50c, prepaid.

SWEET CORN

Pick corn over a long period by planting early, midseason and late varieties on the same day. This practice saves you time and labor.

EARLY SWEET CORN

277 Golden Bantam. The favorite early yellow sweet corn. Ears 5 to 6 inches long, kernels broad, deep golden yellow, very sweet, juicy and tender. Postpaid: Pkt., 10c; $\frac{1}{2}$ lb., 18c; 1 lb., 32c; 3 lbs., 86c.

278 Deluxes Golden Giant. Mid-season yellow variety, good for home and market garden. A week earlier than Bantam. Postpaid: Pkt., 10c; $\frac{1}{2}$ lb., 19c; 1 lb., 34c; 3 lbs., 92c.

281 Early Sunshine. Four to five days earlier than Golden Bantam. Good sized ears, 10 to 12 rowed. Kernels golden yellow, sweet, tender. Postpaid: $\frac{1}{2}$ lb., 19c; 1 lb., 34c; 3 lbs., 92c.

288 Whipples Early White. Grows 6 feet high with 7 inch ears that are ready for use in about 80 days after planting. Ears are 14 to 18 rowed with deep kernels. Sweet and tender. Postpaid: Pkt., 10c; $\frac{1}{2}$ lb., 20c; 1 lb., 36c; 3 lbs., 98c.

292 Adams Early Roasting Corn. Grown extensively in the South for early use. Plants grow 6 feet high and bear $7\frac{1}{2}$ inch ears with 12 to 14 rows of white kernels. Tender at roasting stage. Ready to eat about 70 days after planting. Postpaid: Pkt., 10c; $\frac{1}{2}$ lb., 15c; 1 lb., 22c; 3 lbs., 55c.

SWEET CORN "FLAVOR FAVORITES"

1 Pkt. Early Golden Sunshine Sweet Corn.
 1 Pkt. Golden Giant Sweet Corn.
 1 Pkt. Golden Evergreen Sweet Corn.
 Regular Catalog Value, 30c.
 Order No. 295—Golden Corn Collection, 25c, postpaid.

LATE SWEET CORN

289 Golden Evergreen. A cross between Golden Bantam and Stowell's Evergreen combining the deliciously sweet flavor of Golden Bantam with the tenderness of Stowell's Evergreen. Ears with 14 to 18 rows, kernels rich golden yellow of finest quality. Postpaid: Pkt., 10c; $\frac{1}{2}$ lb., 18c; 1 lb., 32c; 3 lbs., 86c.

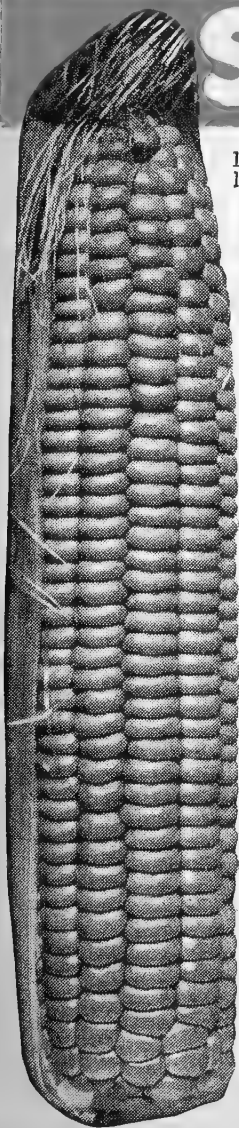

290 Early Evergreen. The earliest of all Evergreens. Ears are fully as large as Stowell's and remain tender for a longer period. One week earlier. Postpaid: Pkt., 10c; $\frac{1}{2}$ lb., 19c; 1 lb., 34c; 3 lbs., 92c.

287 Stowell's Evergreen. The best known standard main crop sweet corn, excelling all others. Ears 8 inches long, 16 to 20 rowed. Very productive. Kernels clear white, deep, medium width, sugary and tender. Postpaid: Pkt., 10c; $\frac{1}{2}$ lb., 18c; 1 lb., 32c; 3 lbs., 86c.

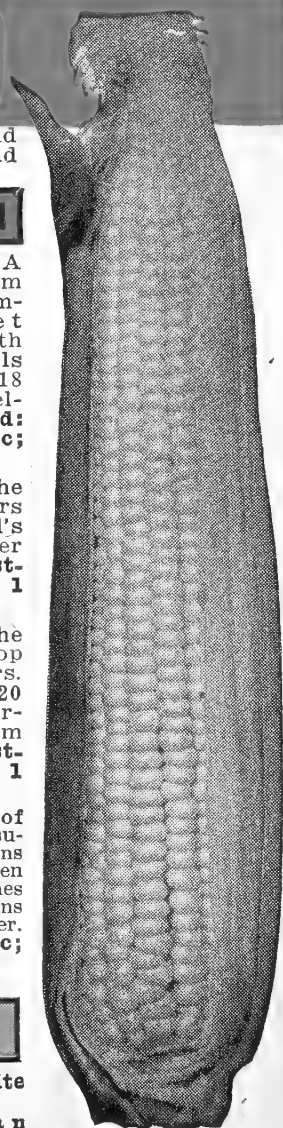

284 Country Gentleman. One of the best known late varieties, superior for home and market gardens and commercial canners. Stalks often with two ears. Ears 7 to 8 inches long, with narrow irregular grains of good quality, sweet and tender. Postpaid: Pkt., 10c; $\frac{1}{2}$ lb., 20c; 1 lb., 35c; 3 lbs., 95c.

Stowell's Evergreen

BEETS OF QUALITY

CHOICE TABLE BEETS

Beets should be planted both in Spring and Fall. Will keep fine stored in pit or may be canned. One V.G.B.P. will plant 25 feet of row. Plant about 1½ inches deep about 2 inches apart in row. Make several plantings about one week apart. Average person requires 10 pounds per year—1 V.G.B.P.

156 Berry's Early Blood Red Beet. Very early, thrives anywhere, deliciously crisp and tender, good uniform size. (Pictured, described more fully page 50.) Postpaid: Pkt., 15c; V.G.B.P., 22c; oz., 32c; ¼ lb., 88c; ½ lb., \$1.70; 1 lb., \$3.25.

154 Early Blood Turnip. (Pictured at right.) Excels in flavor and appearance. A medium early variety, roots top shaped, dark red, retaining color even when cooked. Sweet and crisp. Matures quickly but is a splendid keeper. Postpaid: Pkt., 5c; V.G.B.P., 18c; oz., 25c; ¼ lb., 75c; 1 lb., \$2.25.

168 Detroit Perfected. A superb beet that is tender and sweet at all stages of growth. This is an improvement over Detroit Dark Red. Smooth globe shaped with small top root and beautiful dark red flesh, splendid for dicing. An all American Selection. Pkt., 5c; V.G.B.P., 18c; oz., 25c; ¼ lb., 75c; 1 lb., \$2.25, postpaid.

155 Crosby's Egyptian. An extra early variety preferred by market gardeners, splendid for bunching. Roots globe shaped, slightly flattened, with small tap root. Finest quality, tender and sweet. Flesh purplish-red. Postpaid: Pkt., 5c; V.G.B.P., 18c; oz., 25c; ¼ lb., 75c; 1 lb., \$2.25.

157 Detroit Dark Red. The outstanding variety for home use, truck gardeners, and canning. Fine quality, tender and sweet. Roots perfectly round. With small tap root, uniform. Flesh dark red with slight zone. Postpaid: Pkt., 5c; V.G.B.P., 18c; oz., 25c; ¼ lb., 75c; 1 lb., \$2.25.

167 Berry's Early Wonder. (Pictured at right.) This wonderful early beet is the result of years of reselecting and improving. For earliness it can't be beat. Very uniform in growth, root globular in shape. Postpaid: Pkt., 5c; V.G.B.P., 18c; oz., 25c; ¼ lb., 75c; 1 lb., \$2.25.

158 Swiss Chard. Makes continuous greens of delicious flavor throughout the summer. Grows anywhere. Plant from early spring till July. Postpaid: Pkt., 5c; V.G.B.P., 15c; oz., 20c; ¼ lb., 70c; 1 lb., \$2.15.

159 Swiss Chard—Fordhook Giant. This variety is more popular every year. Grows larger than common Swiss Chard and has exceptional fine quality and flavor. Pkt., 5c; V.G.B.P., 18c; oz., 25c; ¼ lb., 75c; 1 lb., \$2.25, postpaid.

Early Blood Turnip Beet

The Victory Garden Program calls for more food. The average family should plant at least 3 V.G.B.P. of Beets.

MANGELS AND SUGAR BEETS

Stock Feeders—Raise Mangels

The average yield of mangels per acre is 30 tons. Aside from the minimum feeding value of \$2.50 per ton, the mangel is a regulator that keeps stock in the best health.

Mangels are very easily grown. A loose or sandy loam type of soil is best to grow mangels on. Drill about 6 pounds of seed per acre in rows 2 feet apart. Cultivate right after planting down the drill rows.

The following 3 varieties postpaid: Oz., 20c; ¼ lb., 60c; 1 lb., \$2.00; 5 lbs., \$9.40.

162 Mammoth Long Red. Heaviest yielding and largest of mangels. Flesh pink tinged.

160 Golden Tankard. Very large size and easily lifted. Skin deep orange, flesh yellow with white zones.

166 Giant Half Sugar. Heavy yielder, valuable for feeding. Flesh white, with good sugar content. Grows half out of the ground, making it easy to harvest.

Berry's Early Wonder Beet
(Described at left)

CELERY

251 White Plume. Earliest of all. A favorite for the table because of crisp tender quality. Stalks are uniformly large and solid. Pkt., 10c; V.G.B.P., 40c; oz., 50c; ¼ lb., \$1.50, postpaid.

253 Giant Pascal. An excellent variety for fall and winter use. Large, thick, crisp, stringless stalks with a delicious nut-like flavor. Blanches to a beautiful yellowish-white. Pkt., 10c; V.G.B.P., 35c; oz., 45c; ¼ lb., \$1.35, postpaid.

252 Golden Self Blanching. Most desirable for truckers. Stalks heavier than white varieties blanching into a rich golden yellow. Fine quality, crisp, tender, free from strings. Postpaid: Pkt., 10c; V.G.B.P., 50c; oz., 60c; ¼ lb., \$1.80, postpaid.

255 Celeriac or Turnip-rooted Celery. Roots nearly globe-shaped, are used for flavoring soup, stews, etc. Postpaid: Pkt., 10c; V.G.B.P., 35c; oz., 45c; ¼ lb., \$1.35, postpaid.

White Plume Celery

ASPARAGUS

SEED AND ROOTS

101 Washington Rust Proof. Preferred by market gardeners because of freedom from disease. A large straight luscious stalk with firm tips of finest quality. Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 12c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.10.

TWO YEAR

Asparagus Roots. 25 for \$1.15; 50 for \$2.15; 100 for \$3.95, postpaid.

Other Asparagus and Rhubarb Roots, Page 76.

CABBAGE

Golden
Acre

LATE VARIETIES

186 Premium Late Flat Dutch. Excellent for home and market garden use. Very solid, large, flat heads, 6 to 7 inches deep. High quality. Deserves its wide popularity. **Postpaid: Pkt., 10c; V.G.B.P., 30c; oz., 50c; ¼ lb., \$1.25; ½ lb., \$2.45; 1 lb., \$4.50.**

187 Drumhead Savoy. Popular for its tasty flavor. Sweeter than ordinary cabbage. Has crinkled leaves. Round ball-like heads are very heavy. An excellent keeper. **Postpaid: Pkt., 10c; V.G.B.P., 40c; oz., 65c; ¼ lb., \$1.75; ½ lb., \$3.15; 1 lb., \$6.00.**

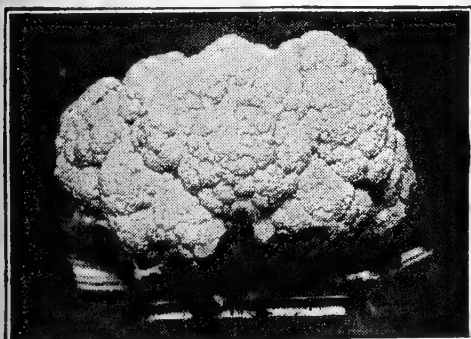

191 Danish Ballhead. A superior variety, one of the finest late cabbages. Extremely hard heads, 8 to 9 inches across. Desirable for shipping, storage, and kraut. **Pictured at right. Postpaid: Pkt., 10c; V.G.B.P., 40c; oz., 65c; ¼ lb., \$1.75; ½ lb., \$3.15; 1 lb., \$6.00.**

CELERY OR CHINESE CABBAGE

175 Celery or Chinese Cabbage. Most popular for the home garden. Cylindrical, tapering heads. Crisp and tender. Plant during July-August. Makes fine chicken feed. **Postpaid: Pkt., 10c; V.G.B.P., 40c; oz., 63c; ¼ lb., \$1.68; ½ lb., \$3.15; 1 lb., \$6.25.**

CAULIFLOWER

Choicest Imported Seed

Danish Giant

220 Early Snowball. Most widely used early variety, especially valuable for market. Dwarf habit. A sure header, medium size. Delicious, white and tender. **Postpaid: Pkt., 10c; ¼ oz., \$1.25; ½ oz., \$2.25; oz., \$4.00.**

Cabbage is of vital importance in our Health and Nutrition Program for Victory. Rich in Vitamin C when eaten raw. Can be grown over a long season. Plant seed in hills for plants outdoors as early as possible, cover lightly about ½ inch. Plant both early and late varieties. Order at least 2 V.G.B.P. to have plenty for a daily diet. One person needs about 50 pounds a year. Used more often in a health diet than any other vegetable except Potatoes and Tomatoes.

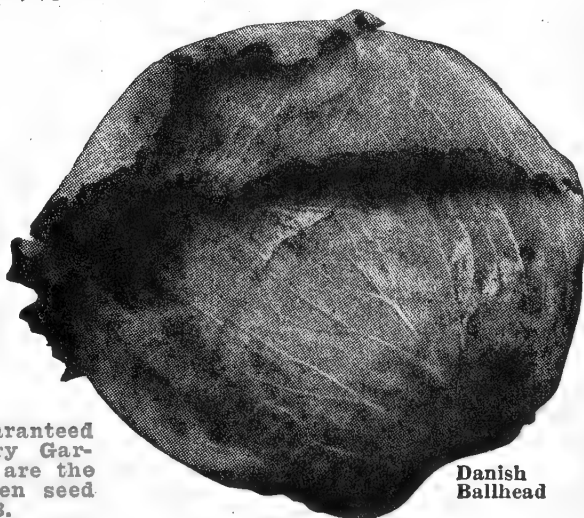

EARLY VARIETIES

180 Berry's Earliest Cabbage. The best for earliness, quality and productiveness. **Postpaid: Pkt., 10c; V.G.B.P., 40c; oz., 65c; ¼ lb., \$1.75; ½ lb., \$3.15; 1 lb., \$6.00.**

179 Golden Acre. A new variety, sure header; heads round and very solid, few outer leaves. Used by truckers for earliest markets. **Postpaid: Pkt., 10c; V.G.B.P., 40c; oz., 65c; ¼ lb., \$1.75; ½ lb., \$3.15; 1 lb., \$6.00.**

176 Early Jersey Wakefield. Small compact conical heads, broad base. Few leaves permitting close planting. A favorite of market gardeners and shippers. **Postpaid: Pkt., 10c; V.G.B.P., 40c; oz., 65c; ¼ lb., \$1.75; ½ lb., \$3.15; 1 lb., \$6.00.**

182 Copenhagen Market. Finest round-headed early cabbage. Heads uniform, solid, excellent quality. Few outer leaves. Short stem. Desirable likewise for early kraut. **Postpaid: Pkt., 10c; V.G.B.P., 40c; oz., 65c; ¼ lb., \$1.75; ½ lb., \$3.15; 1 lb., \$6.00.**

Danish
Ballhead

Our seeds are guaranteed satisfactory. Victory Garden Bulk Packages are the year's biggest garden seed values. See page 53.

181 Early Flat Dutch. A strain popular with market and home gardeners. Heads almost round, good solid quality, weigh about 5 lbs. **Postpaid: Pkt., 10c; V.G.B.P., 30c; oz., 50c; ¼ lb., \$1.25; ½ lb., \$2.45; 1 lb., \$4.50.**

YELLOWS DISEASE RESISTANT VARIETIES

The most destructive and widespread cabbage disease found in all sections east of the Rocky Mountains. "Yellows" is caused by minute organisms living in the soil indefinitely that thrive on living cabbage plants. The only control is to grow varieties that have been developed and are proven to be "Yellows Resistant."

174 Marion Market. Heads are almost round, very solid. Similar to Copenhagen Market but about 10 days later. **Postpaid: Pkt., 10c; V.G.B.P., 50c; oz., 60c; ¼ lb., \$2.00; ½ lb., \$3.75; 1 lb., \$7.00.**

183 Jersey Queen. 55 days. Selected from Jersey Wakefield with which it remains identical in type and season. Leaves smooth and dark green. Heads pointed small and compact, permitting close planting. **Postpaid: Pkt., 10c; V.G.B.P., 56c; oz., 76c; ¼ lb., \$2.10; ½ lb., \$3.80; 1 lb., \$7.60.**

BETTER SEED MEANS BETTER GARDENS

TABLE CARROTS

Carrots are vital to health. Rich in Vitamin A, also B₁ and C. They have a wide variety of uses in meal plannings, can be eaten raw from gardens, stored in pits or canned. The average family should plant 1½ ounces of seed or 150 feet of row half in the spring, half in the fall. Cover seed only a fraction of an inch.

203 Imperator. 77 days. An unusually fine variety. An All American Selection that does particularly well where soil is a deep sandy loam. Roots are smooth slightly tapering to a stump-rooted tip, smooth, rich orange color, very little core, crisp, and of fine sweet flavor. Exceptionally attractive for bunching. Postpaid: Pkt., 10c; V.G.B.P., 20c; oz., 30c; ¼ lb., 85c; ½ lb., \$1.50; 1 lb., \$2.75.

201 Oxheart. A short thick variety, best for heavy soil where it can be easily lifted. Roots orange-scarlet, about five inches in length; very heavy yielder. Postpaid: Pkt., 10c; V.G.B.P., 20c; oz., 30c; ¼ lb., 85c; ½ lb., \$1.50; 1 lb., \$2.75.

204 Danvers Half Long. None better for home gardens or market. Flesh bright orange in color and very tender. Grows six to seven inches long, tapered. Very productive. Postpaid: Pkt., 10c; V.G.B.P., 20c; oz., 30c; ¼ lb., 85c; ½ lb., \$1.50; 1 lb., \$2.75.

205 Chantenay. A fine sort for bunching, market or home gardens. About 6 inches long, stump rooted, deep orange in color. A heavy yielder. Postpaid: Pkt., 10c; V.G.B.P., 20c; oz., 30c; ¼ lb., 85c; ½ lb., \$1.50; 1 lb., \$2.75.

212 New Coreless Carrot. The greatest improvement made on any vegetable in years. Fine flavor, tender, and sweet. Early, uniform size. Postpaid: Pkt., 10c; V.G.B.P., 25c; oz., 35c; ¼ lb., 95c; ½ lb., \$1.60; 1 lb., \$3.00.

STOCK CARROTS

206 Long Orange. Suitable for stock or table use. Roots red-orange, tapered to a point. A good winter keeper. Oz., 30c; ¼ lb., 85c; ½ lb., \$1.50; 1 lb., \$2.75.

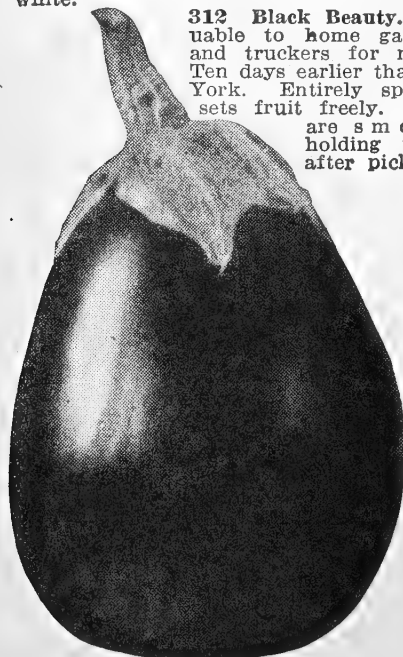

208 White Belgium. One of the best stock feeding carrots, 100 days. Oz., 30c; ¼ lb., 85c; ½ lb., \$1.50; 1 lb., \$2.75.

EGGPLANT

These two varieties postpaid: Pkt. 10c; V.G.B.P., 24c; ¼ lb., \$1.50; ½ lb., \$2.50; 1 lb., \$4.50.

310 Improved New York Purple. Our strain of this leading market variety is unsurpassed. Skin glossy black purple, flesh white.

312 Black Beauty. Valuable to home gardeners and truckers for market. Ten days earlier than New York. Entirely spineless, sets fruit freely. Fruits are smooth, holding well after picking.

New York Purple

New Coreless Carrot (Seed very scarce)

Victory Garden Bulk Packages are guaranteed to be the year's biggest values. Order at least 3 on carrots.

BERRY'S GIANT WHITE POP CORN

The New Giant Pop Corn No. 305

Here is something new and different in pop corn. Everyone who likes pop corn should be sure to grow some of it. Great big creamy white grains that pop into immense, crispy, delicious, snowy white puffs. Kernels as big or bigger than the South American but white instead of yellow in color.

Now is the time to start. Sell what you don't need for popping to your neighbors for seed. Produces tremendous yields—grows from Minnesota to the Gulf and from the Rockies to the Atlantic. Grows up to 7 feet.

Be sure to get started this year and have something extra fine in the newest thing out. Pkt., 10c; ½ lb., 20c; 1 lb., 35c, postpaid.

CUCUMBER

Special Pickling Cucumber. Available in regular size packets only—15c each.

225 Berry's Champion Pickler. The best variety for home gardens. Excellent for slicing and pickling. Fruits dark green in color, uniform in size, straight and smooth. We recommend this variety very highly. Postpaid: Pkt., 15c; V.G.B.P., 24c; ¼ lb., 75c; ½ lb., \$1.35; 1 lb., \$2.50.

226 National Pickling. The finest early pickling type slightly larger than Early Green Cluster. Uniformly smooth and cylindrical with well rounded ends. Flesh thick preventing splitting in the center and hollow sides in the pickles. Size 7x3 inches, 1¼ pounds. Postpaid: Pkt. 5c; V.G.B.P., 15c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.05; 1 lb., \$2.00.

228 Chicago Pickle. One of the most popular pickling varieties; also good for slicing. Mid-season. Fruits medium green, uniform in size. Postpaid: Pkt., 5c; V.G.B.P., 15c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.05; 1 lb., \$2.00.

229 Early Fortune. 60 days. An excellent home or market garden variety. Very prolific, uniform, and attractive. Fine slicing or dill pickles. Holds its firmness and dark green color for a long time. Pkt. 5c; V.G.B.P. 15c; oz., 21c; ¼ lb., 65c; ½ lb., \$1.15; 1 lb., \$2.20.

232 Snows Perfection. 54 days. A fine pickling variety. Blunt ends and blocky shape even when small. Extremely productive. Pkt., 5c; V.G.B.P., 15c; oz., 21c; ¼ lb., 65c; ½ lb., \$1.15; 1 lb., \$2.20.

233 Boston Pickler. Very early and prolific; uniform size, slightly tapered, weigh about 1½ lbs. Dark green. Fine for table. Postpaid: Pkt., 5c; V.G.B.P., 15c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.05; 1 lb., \$2.00.

234 Improved White Spine. Vigorous and productive, fruit uniform, seven to nine inches long, very showy. Postpaid: Pkt., 5c; V.G.B.P., 15c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.05; 1 lb., \$2.00.

239 Straight 8. The highest award winner of the All-America trials in 1935. The best new cucumber. Fruits are of excellent quality, uniform size, dark green color. About 8 inches long, 2 inches wide. Vines vigorous and productive. Ideal for the home garden, local market, or shipping. Postpaid: Pkt., 5c; V.G.B.P., 18c; oz., 25c; ¼ lb., 72c; ½ lb., \$1.30; 1 lb., \$2.50.

236 Improved Long Green. Standard late variety. Splendid for slicing, excellent quality. Fruits dark green, weigh 3 to 3½ lbs., flesh white, firm and crisp. Postpaid: Pkt. 5c; V.G.B.P., 18c; oz., 25c; ¼ lb., 72c; ½ lb., \$1.30; 1 lb., \$2.50.

231 White Wonder. 58 days. A distinct variety grown for its novel pure white color. Fine for pickles or slicing. Grows about 7 inches long, blocky shape with rounded ends, pure white at all stages. Pkt., 5c; V.G.B.P., 15c; oz., 21c; ¼ lb., 65c; ½ lb., \$1.15; 1 lb., \$2.20.

POP CORN

304 South American. (Dynamite.) Kernels are yellow, pop to immense size. Stalks grow larger than field corn, with two or three ears on a stalk. Popped corn has a rich cream color, flavor is excellent. Pkt., 10c; ½ lb., 18c; 1 lb., 30c, postpaid.

303 White Hull-less. Dwarf grower, small ears. Kernels hull-less, snowy white when popped; very tender, finest flavor. An old favorite with thousands of our customers. Pkt., 10c; ½ lb., 18c; 1 lb., 30c, postpaid.

Berry's Champion Pickle Cucumber

ONION SEED and ONION SETS

NEW CROP—HIGH GERMINATION

Grow your yearly supply of Onions from seed. A profitable crop for your own use or for sale. Yields of from 500 to 600 bushels per acre are possible. This crop can be grown in any state. Write to your State Horticulture Department for best growing instructions for your region. Buy your seed from Berry's and get New Crop High Germinating Seed in the varieties best suited to your region. Sow 2½ to 3 lbs. per acre or 1 oz. per 100 feet of row. Thin out so plants stand 2 to 3 inches apart.

Onion is an important vegetable to good health. One ounce will plant 100 feet of row the need of an average family. We suggest raising some onions from seed, plants and sets. Sets are best for early green onions, plants produce the later milder varieties.

YELLOW VARIETIES

431 Early Yellow Globe—95 days. Matures 2 to 3 weeks earlier than other yellow globe varieties. This is a fine globe shaped onion with a beautiful yellow skin and pleasingly flavored light cream flesh. An excellent keeper. **Postpaid: Pkt., 10c; V.G.B.P., 25c; oz., 50c; ¼ lb., \$1.50; ½ lb., \$2.75; 1 lb., \$5.25.**

435 Yellow Globe Danvers—105 days. A splendid variety for home gardens and market. Nearly globe shaped with pure yellow skin, white flesh, and mild flavor. Very productive with fine keeping qualities. **Postpaid: Pkt., 10c; V.G.B.P., 25c; oz., 50c; ¼ lb., \$1.50; ½ lb., \$2.75; 1 lb., \$5.25.**

436 Southport Yellow Globe—115 days. Usually grown for commercial purposes. A large, mild, white fleshed type with rich yellow color. An excellent keeping onion (pictured at bottom of page). **Postpaid: Pkt., 10c; V.G.B.P., 30c; oz., 55c; ¼ lb., \$1.60; ½ lb., \$2.90; 1 lb., \$5.50.**

437 Brigham Yellow Globe—115 days. Also called Michigan Yellow Globe. This is a fine onion noted for its long keeping qualities. A very heavy dark yellow skin and pleasing flavor, with high yielding ability make this a fine main crop shipping and storing onion. **Postpaid: Pkt., 10c; V.G.B.P., 35c; oz., 60c; ¼ lb., \$1.75; ½ lb., \$3.10; 1 lb., \$6.00.**

425 Yellow Sweet Spanish—110 days. The most popular onion grown. Golden yellow, extra large and mild, very pleasant flavored white flesh. An unusually heavy yielder. **Postpaid: Pkt., 10c; V.G.B.P., 35c; oz., 60c; ¼ lb., \$1.75; ½ lb., \$3.10; 1 lb., \$6.00.**

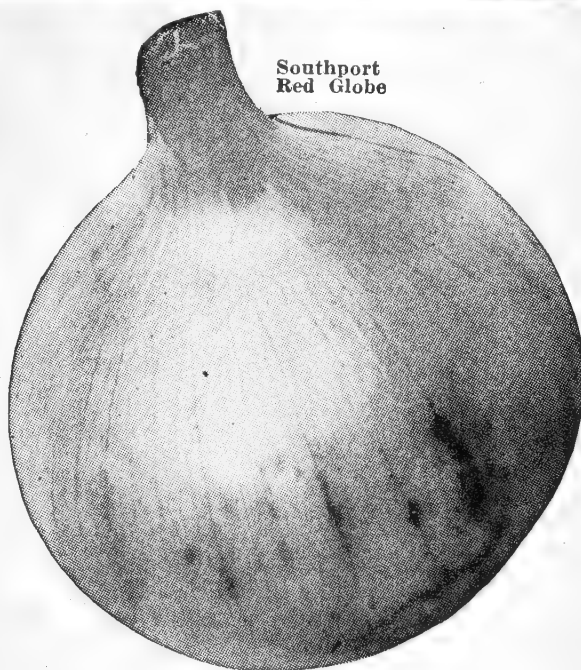

WHITE VARIETIES

434 White Sweet Spanish—110 days. The largest and mildest of all onions. Globe shaped, pure white flesh, very firm and mild. An unusual producer. **Prepaid: Pkt., 10c; V.G.B.P., 40c; oz., 65c; ¼ lb., \$1.85; ½ lb., \$3.75; 1 lb., \$7.30.**

440 White Bermuda or Crystal Wax—93 days. Clear white, mild, delicate flavored large flat onion of superior quality. You can grow Bermudas from seed. **Prepaid: Pkt., 10c; V.G.B.P., 40c; oz., 70c; ¼ lb., \$2.15; ½ lb., \$3.65; 1 lb., \$7.00.**

Southport
Red Globe

110 days. A splendid commercial onion, attractive in color, size and shape. A smooth globe type, flesh mild, fine grained and tender. A very heavy producer. **Prepaid: Pkt., 10c; V.G.B.P., 35c; oz., 65c; ¼ lb., \$1.75; ½ lb., \$3.25; 1 lb., \$6.30.**

441 White Portugal or Silverskin—100 days. The most widely used white onion. This all purpose variety can be used for sets, pickling, green bunching or storage. Bulbs are medium size, flat, clear white, hard, fine grained, and of pleasing flavor. At pickling stage bulbs are small, smooth and round. Raise your own this year. **Postpaid: Pkt., 10c; V.G.B.P., 35c; oz., 65c; ¼ lb., \$1.75; ½ lb., \$3.25; 1 lb., \$6.30.**

RED VARIETIES

432 Southport Red Globe—110 days. The finest of the red onions. Good for sets or storage. Uniform in size, handsome perfect globe shaped. An excellent keeper. Skin glossy red, flesh white, fine grained and tender. **Postpaid: Pkt., 10c; V.G.B.P., 35c; oz., 60c; ¼ lb., \$1.60; ½ lb., \$2.90; 1 lb., \$5.50.**

426 Red Wethersfield—100 days. Large flattened bulbs with purplish red skin, flesh white with pink tinge, very firm. One of the best keepers, an excellent commercial variety. **Postpaid: Pkt., 10c; V.G.B.P., 30c; oz., 45c; ¼ lb., \$1.25; ½ lb., \$2.25; 1 lb., \$4.30.**

FINEST GROWN ONION SETS

Produce Larger Onions of Highest Quality

Our onion sets are Colorado grown. This means they are produced under the most ideal conditions. Berry's sets are long keepers, uniform in size and of finest quality. We guarantee delivery of your set order free from sprouts.

444 Yellow. **Postpaid: ½ gal., 80c; 1 gal., \$1.50.**

GARLIC SETS

448 Garlic Sets. A bulbous root of the onion type, easily grown, used for flavoring. When leaves turn yellow, dig and dry in shade. **Postpaid: ½ lb., 32c; 1 lb., 60c.**

Southport Yellow Globe

Yellow Sweet Spanish

MUSK MELONS

Musk melons are rich in vitamins—an excellent health food. They thrive under varied conditions and soils. Plant in hills six feet apart each way or in drills have six feet between rows and thin plants to 12 inches in the row. Plant thick and thin out after plants are up. The average family needs at least 1 ounce which will plant 100 hills or drill 200 feet of row.

SALMON FLESHED

402 Berry's Favorite. (Center Picture.) A large size melon with quality equal to any. Early, luscious flavored, finest eating qualities for the home garden. Size about 6 3/4 by 7 3/4 inches, weighs about 6 1/2 pounds. Prominent ribs, good netting. **Postpaid: Pkt., 15c; V.G.B.P., 22c; oz., 29c; 1/4 lb., 85c; 1/2 lb., \$1.50; 1 lb., \$2.75.**

407 Benders Surprise—90 days. An extra large deliciously flavored melon weighing about 7 pounds. Skin hard and greenish yellow when ripe. Flesh is thick and bright salmon colored. The best of the big muskmelons. You'll really enjoy this one. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; 1/4 lb., 55c; 1/2 lb., \$1.00; 1 lb., \$1.80.**

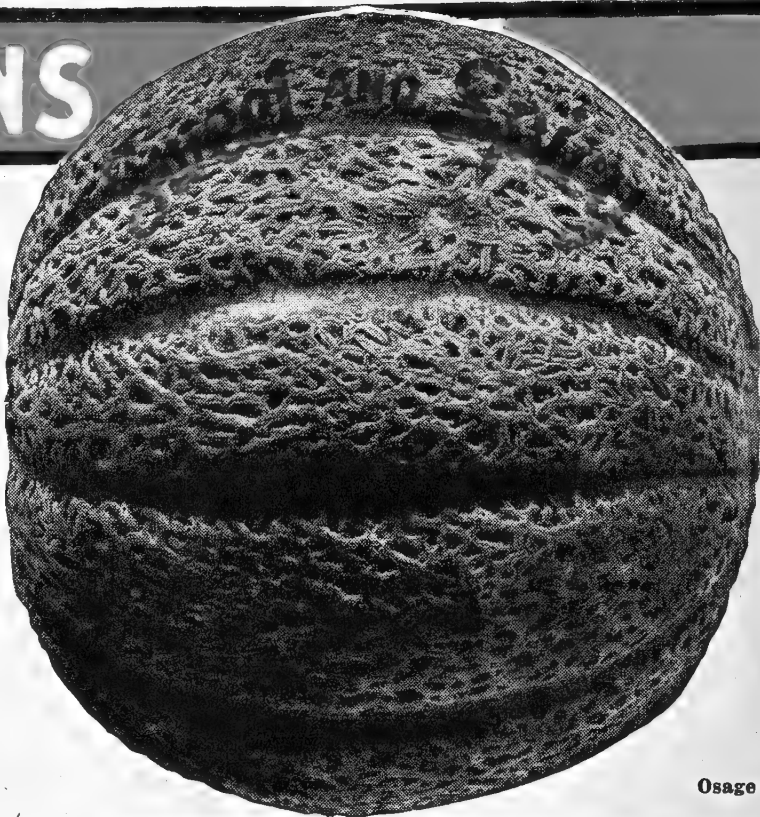

420 Hales Best #36—80 days. An outstanding shipping and market variety. Fruits 3 to 4 pounds. Very thick deep salmon colored flesh with a sweet aromatic flavor and fine texture. The most popular muskmelon grown. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; 1/4 lb., 55c; 1/2 lb., \$1.00; 1 lb., \$1.80.**

414 Imperial #45—Mildew Resistant—87 days. A Hales Best type with resistance to powdery mildew. A good keeper after ripening. A melon with unusual qualities. Thick, sweet, orange flesh. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; 1/4 lb., 55c; 1/2 lb., \$1.00; 1 lb., \$1.80.**

411 Honey Rock—81 days. All American winner in 1933. Has been most popular for the home garden since. Very early, weighs about 4 lbs., flesh thick and very sweet. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 16c; 1/4 lb., 50c; 1/2 lb., 90c; 1 lb., \$1.60.**

413 Hoodoo (Hearts of Gold)—90 days. Fruits round, about 3 lbs. Very small seed cavity. Tender, juicy, sweet with delightful flavor. A superior home garden melon. **Postpaid: Pkt., 5c; V.G.B.P., 12c; oz., 25c; 1/4 lb., 65c; 1/2 lb., \$1.10; 1 lb., \$2.00.**

418 Osage or Miller's Cream—95 days. The finest flavored. "Queen" of salmon fleshed melons. Exceptionally thick, tender and sweet flesh. Oval shaped fruits about 5 1/2 pounds. A superb home garden variety. **Postpaid: Pkt., 5c; V.G.B.P., 11c; oz., 20c; 1/4 lb., 50c; 1/2 lb., 90c; 1 lb., \$1.60.**

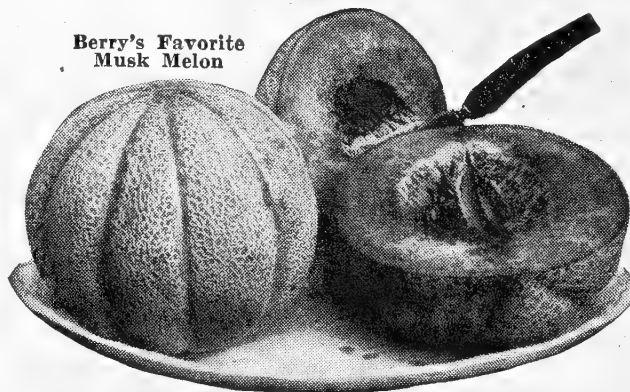

Osage

GREEN FLESHED

Musk melon seed is short this year. This applies to other vine seed crops in Colorado. We believe you will find we have the year's biggest values on all garden seeds for the Home Victory Garden. We save you \$1.00 on the Victory Garden Collection, page 53, which is adapted for every American gardener.

417 Gold Lined Rocky Ford. In delicious flavor Gold Lined far excels the regular Rocky Ford. It is slightly longer and a few days later. Oval in shape, small seed cavity. Flesh thick and firm. **Postpaid: Pkt., 5c; V.G.B.P., 12c; oz., 18c; 1/4 lb., 55c; 1/2 lb., \$1.00; 1 lb., \$1.85.**

412 Extra Early Hackensack—80 days. A most popular variety for home use and truck gardening. Fruits large, globular, flattened. Flesh is thick, very sweet and spicy. **Postpaid: Pkt., 5c; V.G.B.P., 12c; oz., 25c; 1/4 lb., 65c; 1/2 lb., \$1.10; 1 lb., \$2.00.**

Berry's Favorite
Musk Melon

Every family should plant as much musk melon seed as 2 V.G.B.P. to insure enough for their needs.

401 Select Rocky Ford—92 Days—(Pictured at left). Probably the most widely grown cantaloupe. Almost round. Green flesh of delicious flavor. Fruits weigh about 2 1/2 pounds. **Postpaid: Pkt., 5c; V.G.B.P., 12c; oz., 18c; 1/4 lb., 55c; 1/2 lb., \$1.00; 1 lb., \$1.85.**

403 Honey Dew—112 days. Green fleshed fruits 7"x8"; skin smooth, hard, and creamy white, flesh very thick, sweet, juicy and distinctly flavored. A good keeper. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; 1/4 lb., 55c; 1/2 lb., \$1.00; 1 lb., \$1.80.**

MUSTARD

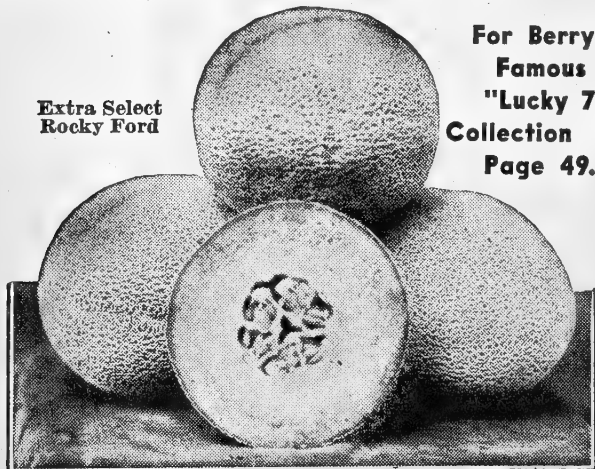

712—Tendergreen or Spinach Mustard—50 days. A quick growing variety that does not go to seed as soon as other varieties. Resistant to heat and drought. Distinctive superior flavor. Rich in vitamins and iron. **Postpaid: Pkt., 5c; V.G.B.P., 11c; oz., 15c; 1/4 lb., 50c; 1/2 lb., 85c; 1 lb., \$1.50.**

713 Southern Giant Curled—65 days. The most popular and best known mustard for greens. Leaves long, wide, light green, heavily crumpled and curled at the edges. Best known in the South. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; 1/4 lb., 50c; 1/2 lb., 85c; 1 lb., \$1.50.**

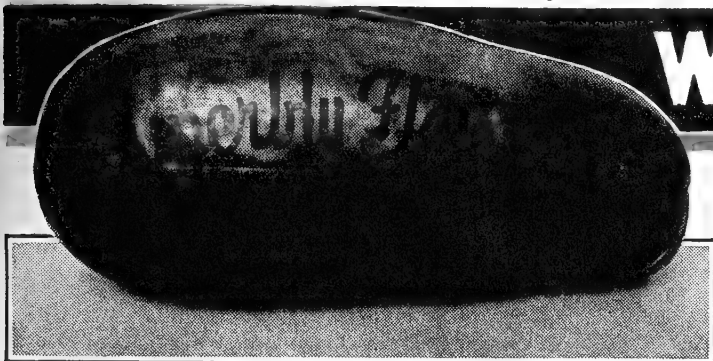

711 Florida Broad Leaf—55 days. A large upright plant with unusually large, thick, bright green, smooth leaves. A popular variety. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; 1/4 lb., 50c; 1/2 lb., 85c; 1 lb., \$1.50.**

WATER MELONS

Berry's Improved Kleckley Sweet

Plant in hills about 8 feet apart each way. One V.G.B.P. will plant about 15 hills. The average family if space permits should plant twice that much. Don't disturb the vines after they start to run. Don't plant until ground is warm and cover only about 1 inch. Because of long growing season required in northern states plant only early varieties.

368 Berry's Improved Kleckley Sweet. Finest melon for home and market gardens. An improved type of the old popular strain; larger and wilt-resistant. Medium early, dark green skin, with bright red flesh very tender and melting. **Postpaid: Pkt., 5c; V.G.B.P., 7c; oz., 9c; ¼ lb., 27c; ½ lb., 49c; 1 lb., 89c.**

351 Berry's Mammoth Melting Sugar. Very early for such a large melon. Sweetest, most delicate flavor of any. (Pictured page 52.) **Postpaid: Pkt., 15c; V.G.B.P., 20c; ¼ lb., 75c; ½ lb., \$1.35; 1 lb., \$2.25.**

370—Georgia Rattlesnake. A large long melon, striped light and dark green. Rind rather thick; flesh red, of good quality. Very prolific and drought resistant. **Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 12c; ¼ lb., 35c; ½ lb., 65c; 1 lb., \$1.10.**

Halbert's Honey

352—Halbert's Honey. One of the best for home and local markets; not a good shipper. Color dark green. Thin rind, rich red sugary flesh of fine texture. **Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 10c; ¼ lb., 30c; ½ lb., 55c; 1 lb., 95c.**

355 Hawkesbury—85 days. A wilt-resistant, long, light gray melon with very good shipping qualities. About 35 pounds. Black seed, dark pink, good quality flesh. **Postpaid: Pkt., 5c; V.G.B.P., 9c; oz., 14c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.35.**

360 Tom Watson. Very popular shipping melon of the long type. Early; keeps well. Flesh bright red, of excellent flavor. **Postpaid: Pkt., 5c; V.G.B.P., 7c; oz., 9c; ¼ lb., 27c; ½ lb., 49c; 1 lb., 89c.**

369 Golden Honey. Dark green, medium sized, long oval shape. Cream colored flesh which is very tender and delicious. **Pkt., 5c; V.G.B.P., 12c; oz., 17c; ¼ lb., 55c; ½ lb., 95c; 1 lb., \$1.75.**

353 Coles Early—75 days. A leading home garden variety for the North. Weight about 20 pounds. Red Flesh. Black Seeds. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 12c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.**

377 Stone Mountain. Light veined with dark green. Fruits round, weigh about 45 lbs. Flesh rich red of fine texture, tender, sweet, luscious. (See picture at right.) Wilt-resistant. **Postpaid: Pkt., 5c; V.G.B.P., 9c; oz., 12c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.**

Berry's "Sweet As Honey" Melons

Just enough seed in our best varieties to insure favorite melons over a longer season. Plant all at same time. 1 V.G.B.P. Golden Honey, Dixie Queen and Berry's Mammoth Melting Sugar—regular price 42c—No. 380—only 32c, postpaid.

374 Dixie Queen. A recent introduction of finest quality. Early, it attains an average size of 15x12½ inches, weight 32 pounds. Color light green striped with darker green. Flesh dark pink with very few seeds—white. Deliciously flavored. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; ¼ lb., 45c; ½ lb., 75c; 1 lb., \$1.35.**

375 Mixed. Finest for the boy's melon patch. Old favorite varieties—something to please everybody. 25c for ¼ lb. will pay big returns. Will plant 120 hills of about 15 varieties. **Postpaid: Pkt., 5c; V.G.B.P., 6c; oz., 10c; ¼ lb., 25c; ½ lb., 45c; 1 lb., 75c.**

357 Harris Earliest. Extra early, ready to pick in about 80 days, melons weigh about 20 pounds. Very red, firm flesh, of most delicious flavor. Fruits round, dark green striped with light green. **Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 12c; ¼ lb., 35c; ½ lb., 65c; 1 lb., \$1.10.**

358 Sweetheart. Vines vigorous and productive. Fruits large, oval. Rind thin, flesh bright red, firm, sweet and tender. A very fine shipper. **Postpaid: Pkt., 5c; V.G.B.P., 7c; oz., 9c; ¼ lb., 27c; ½ lb., 49c; 1 lb., 89c.**

371 Winter Queen. A melon of finest quality that will keep until Christmas. Nearly round, pale yellow. Flesh is bright red and sweet as honey. **Postpaid: Pkt., 5c; V.G.B.P., 11c; oz., 16c; ¼ lb., 50c; ½ lb., 90c; 1 lb., \$1.65.**

376 Early Kansas Red Seeded. A remarkably early melon for its large size. Finest quality, flesh rich red of delightful flavor. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 14c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.**

354 Early Canada—75 days. A new Ice-box size 11x11 inches, 10 pounds. The finest quality in an early melon. Brown seeds, red flesh. Really an outstanding variety for home gardens and local markets. **Postpaid: Pkt., 5c; V.G.B.P., 11c; oz., 16c; ¼ lb., 50c; ½ lb., 90c; 1 lb., \$1.65.**

SAVORY GARDEN PEAS

EXTRA EARLY VARIETIES

454 Mardelah. Something different in an extra early Pea. Produces peas for the table or canning in 53 days. Exceptionally sweet and tender. Wilt resistant. **Postpaid: Pkt., 15c; ½ lb., 27c; 1 lb., 45c; 2 lbs., 80c.**

455 Alaska Wilt Resistant. Extra early. Smooth seeded pea, ready to use in 53 days. Ideal for first market and home garden use. An old reliable variety. **Postpaid: Pkt., 10c; ½ lb., 16c; 1 lb., 24c; 3 lbs., 66c.**

EARLY VARIETIES

463 Little Marvel—18 inch—63 days to picking. The home gardener's favorite in the Middle West. Excellent quality and high yielding ability. This pea produces when many varieties fail. **Postpaid: Pkt., 10c; ½ lb., 19c; 1 lb., 33c; 3 lbs., 85c.**

459 American Wonder—12 inch—63 days to picking. A good reliable early variety. A favorite of many home gardeners for years. A very heavy bearer. **Postpaid: Pkt., 10c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c.**

457 Premium Gem—24 inch—66 days to picking. We think this is the best of the Gem Peas. Early, and with the fine sugar flavor usually found in later varieties. Reliable for the home garden. **Postpaid: Pkt., 10c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c.**

460 Thomas Laxton—30 inch—61 days to picking. A very popular home garden variety in the East and South. Fine for canning or market garden. Large and sweet flavored, an exceptional yielder. **Postpaid: Pkt., 10c; ½ lb., 19c; 1 lb., 29c; 3 lbs., 79c.**

478 Laxton Progress—15 inch—64 days to picking. A standard early variety for market and home gardens. Large podded, large seeded. A good variety for freezing or home canning. **Postpaid: Pkt., 10c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c.**

476 Dwarf Grey Sugar or Edible Pod. Grows 2 to 2½ feet tall—65 days. A sweet, tender, and delicious edible podded variety, that is very productive and wilt resistant. Small, smooth, sweet flavored. **Postpaid: Pkt., 10c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c.**

MID-SEASON VARIETIES

468 Everbearing—28 inch—75 days. A long bearing, large seeded variety for home and market gardens. Wilt resistant and hardy, with a superior flavor. A very popular mid-season variety. **Postpaid: Pkt., 10c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c.**

465 Fillbasket or Potlatch—26 inch—80 days. An excellent variety for home and market garden. Unusually large seed, with delicious flavor. Very tender. **Postpaid: Pkt., 10c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c.**

473 Stratagem—28 inch—79 days. A very productive, large podded, large seeded pea of excellent flavor. A home garden variety. **Postpaid: Pkt., 10c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c.**

471 Tall Telephone or Alderman. A climbing or pole pea, grows to 5 foot. Ready for table use in 74 days. A handsome large podded variety. Excellent for home and market gardens. Wilt resistant. Pods contain 8 to 10 large peas of highest quality. The best tall pea. **Postpaid: Pkt., 10c; ½ lb., 22c; 1 lb., 38c; 3 lbs., \$1.00.**

474 White Eyed Marrowfat—5 foot—80 days. A leading variety for dry use. Very good for pea soup. Large, round, creamy white seed of delicious flavor. Wilt resistant and very productive. **Postpaid: ½ lb., 17c; 1 lb., 30c; 3 lbs., 80c.** Write for prices on larger quantities.

Pea Culture

Plant as early as anything in garden—light freezing does not hurt Peas. In the South plant two crops—early spring and fall; in the north make successive plantings about one week apart. Peas will grow on poorer soils than most crops. Smooth varieties are hardiest, wrinkled varieties of finest quality. Plant about 1 inch apart, 3 inches deep. 1 pound will drill 50 feet of row. You can double row peas about 8 inches apart spacing between double rows about 36 inches.

Berry's Best 4

An all season pea collection. Plant these 4 outstanding varieties on the same day and have a succession of peas for table and canning. They will mature in the order listed.

Pea

LETTUCE CRISP, HEALTHFUL AND DELICIOUS ALL THE TIME

Lettuce Culture

Plant as soon as ground can be worked, light frosts do not harm this crop. Some gardeners have good success with lettuce seeded in the late fall just before the ground freezes. Sow seed sparingly, usually lettuce is seeded too heavy. In leaf varieties plants should be thinned to 4 or 5 inches. Heading varieties should be 1 foot apart. Rows should be 12 to 24 inches apart. This is a cool weather plant and will grow best in the early spring or fall. Start heading varieties in a coldframe or hotbed and set out as early as possible. A packet of seed will plant 50 feet or more.

LOOSE LEAF VARIETIES

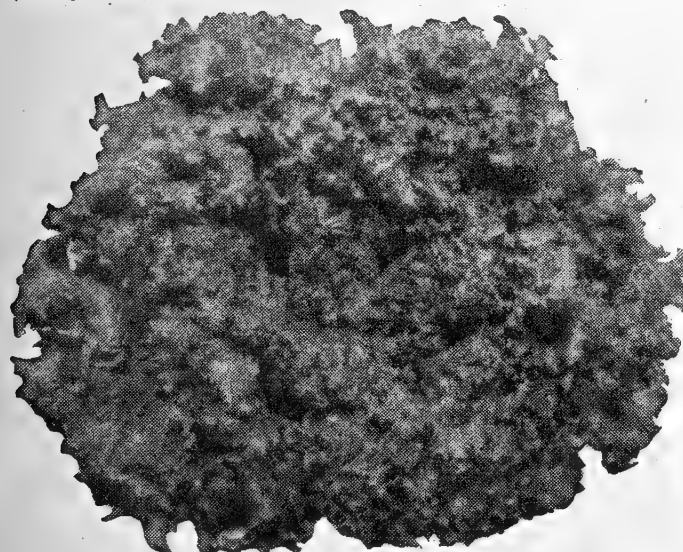

329 Early Prizehead or Brown Leaf—40 days. In our trials this variety has proved most satisfactory. As early as other leaf varieties. Prizehead remains crisp and tender longer than others. Plant at least one row and see the difference. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.**

326 Black Seeded Simpson—46 days. Most popular light green variety. Very good for forcing. A heavy producer of large curled leaves. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.**

327 Early Curled Simpson—45 days. A widely used home garden variety. Excellent flavored, curly, crisp, and tender leaves. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.**

330 Chicken Lettuce. A hardy tall growing, non-heading, dark green variety. Producing the largest amount of leaves of any lettuce. Ideal for poultry and rabbit feed. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.**

328 Grand Rapids—40 days. Excellent for greenhouse forcing and early planting outside. Superior quality with beautiful appearance. Light green, heavily fringed leaves. (Picture below.) **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.**

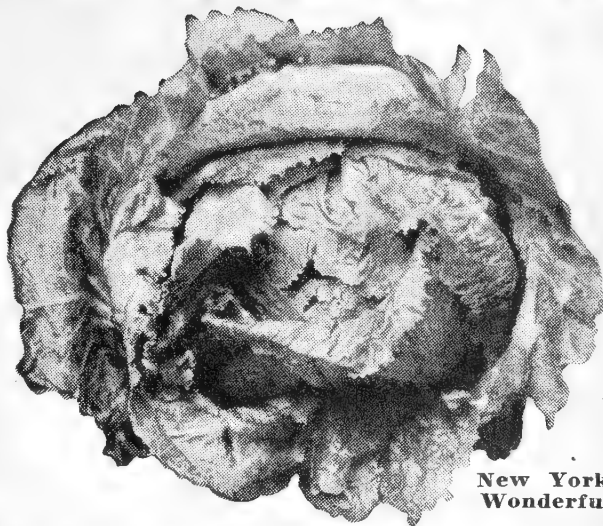

Grand Rapids Lettuce

ENDIVE

315 Green Curled Endive—96 days. A delicious variety with finely curled compact heart. Very desirable for salads. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.**

317 Broad Leaved Batavian or Full Heart—86 days. A medium large plant with a very compact, full heart. The leaves are broad and well blanchd. Handsome in appearance, superbly flavored. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.**

New York Wonderful

HEADING VARIETIES

335 Berry's New Bountiful—76 days. Something different in a head lettuce. This special selection will head when other varieties fail. Has the ability to resist tipburn and make heads in summer weather. The best for the middle west. A real home garden variety. **Postpaid: Pkt., 15c; V.G.B.P., 25c; oz., 33c; ¼ lb., 98c; ½ lb., \$1.75; 1 lb., \$3.25.**

332 Improved Hanson—80 days. An old favorite for home and market gardens. A sure heading, hardy type. Large, compact, tender, sweet heads. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00.**

333 Big Bostan—75 days. A popular butter-head variety for forcing and outside culture. Will not stand hot weather. A medium sized, compact head with creamy yellow heart. Leaves smooth glossy tinged with reddish brown. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00.**

336 Iceberg—84 days. A large late variety. Conical shaped heads—interior, white, sweet, and crisp. Outer leaves light green tinged with brown. A home garden variety. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00.**

337 New York Wonderful #12—77 days. Earlier than regular New York, but with all the good qualities of the older type. The outstanding shipping variety. Best for market gardens. Large solid heads, crisp and of excellent quality and fine flavor.

(Pictured above.) **Postpaid: Pkt., 5c; V.G.B.P., 20c; oz., 33c; ¼ lb., 92c; ½ lb., \$1.65; 1 lb., \$3.10.**

NEW "KALITE" BUG DUST

A Rotenone impregnated dust. Gives 4-way action. Kills chewing and sucking insects by contact, as a stomach poison, by leg paralysis and repels other insects that might attack plants.

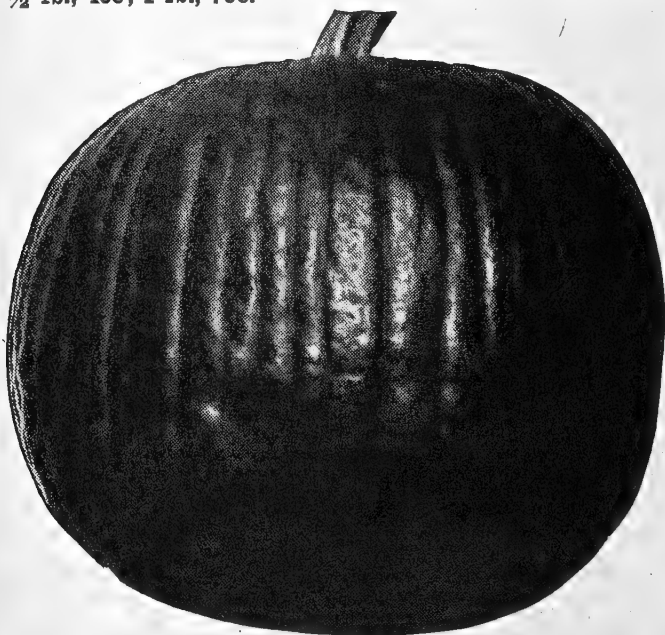

The economical package illustrated above makes possible a very low price. Provides a convenient, clean and efficient insect control. Permits dusting tops and underside of leaves with an even film of dust. Leaves no poison residue. Contains one pound. Cost only 35c, postpaid.

LARGER YIELDS-BETTER QUALITY

2 V.G.B.P. of Pumpkin is enough for average needs. They will plant 30 hills in between the Corn or will drill 100 feet of row. Plant shallow when ground is quite warm. On peppers we recommend 2 V.G.B.P. for average family needs. Plant the same as Tomato. See page 51.

PUMPKIN

- 481 Mammoth Prize.** The largest of all Pumpkins. Valuable for stock feeding, but is also fine for pies. Flesh is thick of a beautiful bright yellow, fine grained, solid and tender. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.**
- 483 Sweet, or Sugar Pie.** Standard variety for pies. Flesh thick, dry and sweet, orange-yellow, and of superior quality. Fruits weigh 6 to 8 lbs., keep well. Will make pies that will melt in your mouth. **Postpaid: Pkt., 5c; V.G.B.P., 9c; oz., 12c; ¼ lb., 40c; ½ lb., 65c; 1 lb., \$1.00.**
- 485 Kentucky Field.** Used largely for canning. Grow large, flat, weigh 10 to 15 lbs. Flesh deep yellow, coarse, thick and nutritious, and of good flavor. Also used for stock feeding. **Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 10c; ¼ lb., 26c; ½ lb., 42c; 1 lb., 68c.**
- 486 Connecticut Field.** (Picture below.) The standard cornfield pumpkin. Fruits grow large, weigh 15 to 25 lbs. Smooth, hard, orange-red skin; flesh orange-yellow, thick, coarse, and sweet. Fine for pies, canning, or feeding to stock. **Postpaid: Pkt., 5c; V.G.B.P., 9c; oz., 12c; ¼ lb., 32c; ½ lb., 50c; 1 lb., 85c.**
- 484 Cushaw or Crookneck.** Very popular variety. Very large, often 2 ft. long, crookneck shape. Creamy white shell; flesh yellow, solid, sweet. Excellent for pies; used also for stock feeding. **Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 10c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 90c.**
- 487 Green Striped Cushaw.** Cream with dark green stripe. 16-20" long, weight 12-16 lbs. Yellow Flesh. **Postpaid: Pkt., 5c; V.G.B.P., 9c; oz., 12c; ¼ lb., 40c; ½ lb., 65c; 1 lb., \$1.00.**
- 489 Mixed.** A combination filling all practical purposes: for pies, local markets and stock feed. The boys will find just the right size for Hallowe'en too. **Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 10c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 70c.**

Connecticut Field Pumpkin

PEANUTS

Should be shelled before planting. Plant in rows 2½ to 3 ft. apart, 10 inches apart in the row. Cover one to two inches. A sandy soil is best.

- 621 New Mammoth Virginia.** Of upright growth. Large pods and kernels. Always yield less imperfect pods than any other variety. Vines good for stock. **Postpaid prices: ¼ lb., 15c; ½ lb., 25c; 1 lb., 40c; 3 lbs., \$1.00.**

PEPPERS

- 510 Sweet Mountain.** Plants very productive, growing upright, about 2 ft. tall. Fruits large, smooth, handsome. Green turning to rich red, when ripe. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 25c; ¼ lb., 82c; 1 lb., \$2.65.**
- 511 Large Bell or Bull Nose.** Plants small, erect, prolific, early. Large fruits bell shaped, deep green turning to scarlet, mild and sweet in flavor. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 25c; ¼ lb., 77c; 1 lb., \$2.40.**
- 515 Ruby King.** Excellent for home and market garden and shipping. Plants medium dwarf, erect, productive. Fruits dark green turning to ruby red. Flesh thick, mild and sweet. Used for mangoes. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 20c; ¼ lb., 65c; 1 lb., \$2.15.**
- 518 California Wonder.** One of the finest mild sweet flavored peppers, with thicker flesh than other varieties. Upright, prolific, vigorous grower. Very attractive, smooth, uniform and deep green. Excellent for shipping, home or market gardening. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 34c; ¼ lb., \$1.00; 1 lb., \$3.50.**
- 516 King of the North.** A sweet pepper like Ruby King but earlier. 65-70 days from time of setting out until fruit is ready to use. Plants 22-26" tall, erect, very heavy yielding, and hardy. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 32c; ¼ lb., 95c; 1 lb., \$3.10.**
- 509 Chinese Giant.** 80 days. An extremely large, sweet pepper for home and market garden. Plants are short and stocky. Fruits are deep green changing to deep scarlet. **Postpaid: Pkt., 10c; V.G.B.P., 25c; ¼ lb., \$1.25; 1 lb., \$4.00.**
- 520 Sunnybrook.** 73 days. A home garden variety with unusual flavor. Fruits are tomato shaped, smooth, with thick mild flesh. Deep green turning to deep red. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 30c; ¼ lb., 90c; 1 lb., \$3.00.**
- 514 Golden Queen.** 78 days. A large yellow variety with sweet and mild flavor. Resembles Ruby King in size and shape. A deep green turning to attractive yellow. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 32c; ¼ lb., 95c; 1 lb., \$3.10.**
- 517 Pimiento.** A good canning variety. Fruits heart shaped and very smooth; color dark green changing to crimson. Flesh thick, sweet and mild. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 20c; ¼ lb., 60c; 1 lb., \$2.00.**
- 512 Cayenne.** A favorite hot variety used largely for canning, pickles, and drying. Plants large and productive. Fruits long, tapering; deep green changing to brilliant red. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 25c; ¼ lb., 77c; 1 lb., \$2.40.**
- 519 Chili.** Used for canning and drying. Fruits long and tapering, deep green changing to bright scarlet; extremely hot. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 25c; ¼ lb., 77c; 1 lb., \$2.40.**

Ruby King Pepper

PARSNIPS

- 502 Improved Hollow Crown or Guernsey.** 95 days. Roots long, white and smooth; hollow crowned. Tender and of excellent flavor. A good keeper. Grows 10 to 12 inch roots. Many gardeners prefer to leave parsnips in the ground over winter. Freezing is not harmful to this vegetable and improves the flavor. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 20c; ¼ lb., 60c; ½ lb., 95c; 1 lb., \$1.65.**

Hollow Crown Parsnip

ALL TESTED AND GUARANTEED SEED

RADISHES

Radish can be planted several times at intervals in early spring and again in the fall. Plant several different varieties. One V.G.B.P. will drill 50 feet of row. Plant $\frac{1}{2}$ inch deep, 1 inch apart in row.

535 BERRY'S BEAT-EM-ALL RADISH—21 Days. Consistently this variety has been the quickest producer in our trials. For those first crisp tender radishes plant a row of Beat-Em-All. An all red, round root with short tops. A home garden special. Postpaid: Pkt., 15c; V.G.B.P., 20c; $\frac{1}{4}$ lb., 75c; $\frac{1}{2}$ lb., \$1.35; 1 lb., \$2.25.

526 CRIMSON GIANT—28 Days. The largest early radish. Will still be crisp and tender after growing to a huge size. We have had radishes two inches in diameter that were still sweet and crisp. The best all season radish in our trials. Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 12c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 60c; 1 lb., \$1.00.

525 SPARKLER OR SCARLET TURNIP WHITE TIP—26 Days. The best of the white tip radishes from our observation. This variety did exceptionally well in the trial garden in 1943. A very solid, tender, sweet, flavored radish second only to crimson giant in ability to withstand pithiness. A most attractive variety, the Scarlet Top contrasts with the white bottom producing a showy product. Very popular with market gardeners as well as home gardeners. Prepaid: Pkt., 5c; V.G.B.P., 8c; oz., 12c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 60c; 1 lb., \$1.00.

528 EARLY SCARLET TURNIP—25 Days. An early maturing variety. Roots small, round, with red skin. Flesh very white, mild and crisp. Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 55c; 1 lb., 90c.

538 IMPROVED SCARLET GLOBE—23 Days. Our seed is extra select. One of the best forcing varieties. Roots bright scarlet, globular, crisp, tender and of fine quality. Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 55c; 1 lb., 90c.

533 FRENCH BREAKFAST—25 Days. A popular variety for forcing or early outdoor planting. Gets hollow in warm weather. Medium sized, olive shaped. Scarlet with white tip. Postpaid: Pkt., 5c; V.G.B.P., 8c;

Icicle Radish

oz., 11c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 60c; 1 lb., \$1.00.

541 ICICLE—27 Days. The most popular white radish. Grows long and slender, free from side roots. Flesh clear white, brittle, mild flavored. Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 11c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 60c; 1 lb., \$1.00.

540 MIXED RADISHES. We offer a mixture of the best varieties of radishes. Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 50c; 1 lb., 90c.

542 CHINA ROSE WINTER—52 Days. Bright rose-red in color, 4 to 6 inches long, two inches in diameter, cylindrical shape. Flesh white, crisp, and mild flavored. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; $\frac{1}{4}$ lb., 50c; $\frac{1}{2}$ lb., 80c; 1 lb., \$1.50.

3 DELICIOUS SNAPPY RADISHES

The 3 best radishes for the home garden. Extra early, tender, snappy, delicious. Each one a superior variety. No. 540—36c value—only 25c, postpaid.

- 1 V.G.B.P. Berry's Beat-em-all
- 1 V.G.B.P. Crimson Giant
- 1 V.G.B.P. White Icicle

Sparkler
Radish

TURNIPS

1 V.G.B.P. will plant 50 feet of row. Drill seed about 2 inches apart—cover very lightly.

601 PURPLE TOP STRAP LEAF—46 Days. An early, very productive variety. One of the most extensive grown kinds for home or market gardens. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 50c; 1 lb., 90c.

607 PURPLE TOP WHITE GLOBE—57 Days. The most popular home and market garden variety. A good shipper. Very attractive appearance, fine in quality. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 50c; 1 lb., 90c.

606 SEVEN TOP—45 Days. Grown for the tops which are excellent for greens and stock grazing. The roots are fibrous and of poor quality. May be left standing in the open ground during the winter, except in the extremely northern states. Extensively cultivated in the South. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 50c; 1 lb., 90c.

604 SNOWBALL—75 Days. A late white variety grown largely in the South. Tops are large with cut leaves. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 75c; 1 lb., \$1.45.

603 SHOGIN—30 Days. The most popular foliage turnip. Grown for early greens and small roots. Tops 18 to 20 inches tall, erect, bright green, strap leaved. Roots round, white, tender and mild. The fastest grower of all. Postpaid: Pkt., 5c; V.G.B.P., 12c; oz., 18c; $\frac{1}{4}$ lb., 54c; $\frac{1}{2}$ lb., \$1.00; 1 lb., \$1.75.

609 COWHORN—70 Days. A stock feeding turnip. Roots 12 to 15 inches long, tapering. Flesh is sweet and tender. A good keeper. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.00; 5 lbs., \$4.50.

612 RUTABAGA, AMERICAN PURPLE TOP—90 Days. A dependable variety for home or market garden. Roots are large, round, yellow with purple top; flesh is light yellow, firm, sweet and tender. Postpaid: Pkt., 10c; V.G.B.P., 10c; oz., 15c; $\frac{1}{4}$ lb., 52c; $\frac{1}{2}$ lb., 95c; 1 lb., \$1.55.

HERBS

681 Anise. An annual grown for the seeds and leaves. Seeds used for flavoring cakes and cookies; leaves for garnishing. Pkt., 10c, postpaid.

682 Borage. An annual grown for its fuzzy leaves of cucumber flavor. A bee plant. Pkt., 10c, postpaid.

683 Caraway. A biennial grown for its seed. Used for spices and condiments. Pkt., 10c, postpaid.

685 Dill. An annual grown for seed and leaves which are used in pickles and for flavoring. Pkt., 5c; oz., 15c, postpaid.

686 Florence Fennel. Plant grows about 30 inches tall, with broad overlapping stalks similar to celery but forming

a flat-oval, bulb at the base of the stem. This bulb or "apple" is used as celery. It is sweet and anise flavored. Pkt., 10c, postpaid.

687 Sage. A perennial. Leaves are used for seasonings, medicines and soap perfumes. Pkt., 10c, postpaid.

688 Sweet Basil. An annual. Flower buds and leaves are used for seasoning. Pkt., 10c, postpaid.

693 Sweet Marjoram. An annual used in seasonings; yields a fragrant oil. Pkt., 10c, postpaid.

692 Summer Savory. An annual. Leaves are used in salads and dried for soups. Pkt., 10c, postpaid.

VEGETABLE FAVORITES OF THOUSANDS

WINTER SQUASH

Winter Squash, particularly yellow fleshed varieties, is an excellent source of Vitamin A. Squash is also easily kept in dry storage. A family should have 50 pounds a year. We recommend 1 V.G.B.P. of Summer Squash and 2 V.G.B.P. of winter varieties. Plant in hills summer types about 4 feet apart, winter about 8 feet apart. One V.G.B.P. will plant 25 hills.

The following five varieties of winter squash:

Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 70c; ½ lb., \$1.20; 1 lb., \$2.00, postpaid.

552 GOLDEN HUBBARD—100 Days. Earlier than improved Hubbard. Fruits 8 to 10 pounds with a hard warty orange skin. Thick, yellow, fine grained, dry flesh; excellent quality for canning and freezing. A good keeper.

554 IMPROVED HUBBARD—105 Days. Standard winter variety for home and market gardens. The best shipper. Our strain is very early. Dark bronze-green, rind hard and tough, slightly warted. Fruits weigh about 12 pounds, flesh very thick; orange-yellow, fine grained, sweet and dry.

555 BLUE HUBBARD—110 Days. Like Improved Hubbard but the color is a clear blue grey. Flesh is bright yellow, thick, fine grained, very dry and sweet. Splendid for pies. A good keeper.

556 BUTTER CUP—100 Days. A new introduction just the right size for baking. Grows exceptionally well in the Great Plains region. Of excellent quality, flavor is similar to sweet potatoes. Flesh dry, deep rich orange, texture and keeping qualities the best.

557 TABLE QUEEN OR DES MOINES—58 Days. Individual size squash. Desirable for home or market garden; also a good shipper. Fruits acorn-shaped, smooth, thin shelled, dark green. Six inches long, 3 inches diameter. Flesh light yellow, with sweet flavor. Makes splendid pies, bakes well.

SUMMER SQUASH

These three varieties: Pkt., 5c; V.G.B.P., 10c; oz., 15c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.

561 MAMMOTH WHITE BUSH SCALLOP—56 Days. A favorite with all our trade. An early maturing round flat squash, largest of the summer varieties. Fruit a clear white, and excellent for stewing.

553 GIANT GOLDEN STRAIGHT NECK—55 Days. A new variety selected from the crookneck. The straight neck permits easy packing and handling. Fruits 18 to 20 inches long, heavily warted, deep orange color. Thick and meaty flesh.

551—BLACK ZUCCHINI—60 Days. Fruits very nearly cylindrical, straight, smooth, dark green-black. Flesh greenish white at eating stage, very good flavor.

MAMMOTH SUNFLOWER. Has a high feeding value and is easily grown. V.G.B.P., 10c; ¼ lb., 15c; ½ lb., 25c; 1 lb., 40c.

SALSIFY

571 Mammoth Sandwich Island. Vegetable Oyster. An improved variety with roots 6 to 8 inches long, thick, tapering, smooth. Decided oyster-like flavor. Fine for soups, etc.

Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 50c; ¼ lb., \$1.50; ½ lb., \$2.75; 1 lb., \$5.00.

TOBACCO

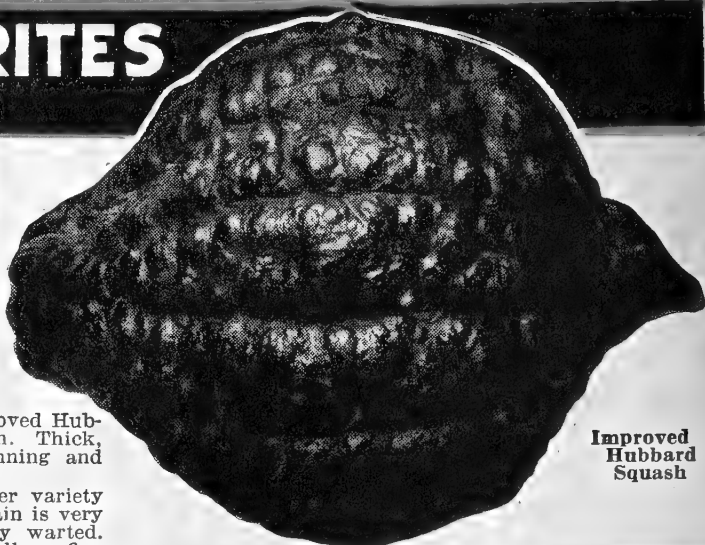

Postpaid price on each of the following four varieties: Pkt., 10c; oz., 40c; ¼ lb., \$1.25; 1 lb., \$4.00.

726 Connecticut Seed Leaf.

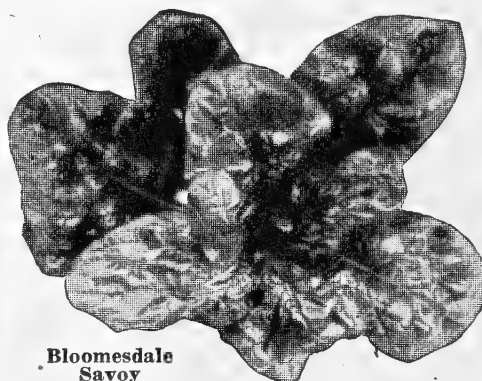

727 Havana. An early variety used largely for cigar wrappers on account of thinness, and fine quality.

728 White Burley. Very popular.

729 Judy's Pride. Broad attractive leaves. Easy to cure. Used for fillers and wrappers; smoking or chewing.

Improved
Hubbard
Squash

Bloomesdale
Savoy
Spinach

SPINACH

581 NEW ZEALAND. It thrives in hot, dry weather, and almost any soil. May be cut throughout the summer, but can not stand frost. Leaves small, broad and pointed, while plants are large and spreading. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.

585 NOBLE GIANT. Easy to wash. Leaves medium thick, green, very large, broad and smooth, with slight crumpling. Very good quality. The best of the large smooth leaved type. A long standing variety. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 13c; ¼ lb., 40c; ½ lb., 65c; 1 lb., \$1.15.

583. BLOOMESDALE SAVOY. An early variety. Popular for local and long distance markets, for canning, and home use. A long keeper after cutting. Leaves medium size, crumpled, glossy dark green. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 12c; ¼ lb., 33c; ½ lb., 55c; 1 lb., 90c.

582 LONG STANDING. A quick growing, long bearing variety for mid-summer use. Plants grow low and spreading, with pointed dark green leaves. Very crumpled. May be seeded in spring or fall. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 13c; ¼ lb., 40c; ½ lb., 65c; 1 lb., \$1.15.

MISCELLANEOUS

690 Kale, Dwarf Green Curled Scotch—55 Days. A member of the cabbage family, used for greens. Leaves large and crimped. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 65c; ½ lb., \$1.15; 1 lb., \$2.00.

691 Kale, Tall Green Curled Scotch—60 Days. Similar to the dwarf variety but grows larger. Very tender after first frosts. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 65c; ½ lb., \$1.15; 1 lb., \$2.00.

720 Okra, Long Green Poddied—55 Days. Plants dwarf and very productive. Valuable for soups and stews. Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 10c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.00.

721 Okra, White Velvet—60 Days. Early, prolific, with creamy white pods. Meaty, tender, smooth, very attractive. Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 10c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.00.

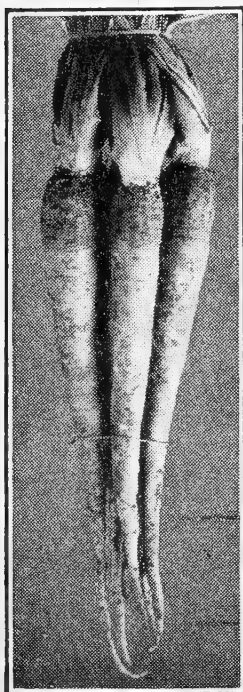

706 Broccoli, Italian Green Sprouting—70 Days. Forms large head consisting of a cluster of small heads. Both heads and stems are cooked and served like cauliflower but is easier to raise and has more delicate flavor. Postpaid: Pkt., 10c; V.G.B.P., 18c; oz., 30c; ¼ lb., 90c.

705 Collards, Georgia. A good substitute for cabbage which succeeds on poor soil, grown especially in the South. Can be boiled like cabbage or used as cole slaw. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.

695 Kohlrabi, White Vienna—62 Days. Dwarf variety. Excellent for home and market garden. Bulbs 2 to 3 inches in diameter, globular, flesh white and tender. Postpaid: Pkt., 10c; V.G.B.P., 25c; oz., 40c; ¼ lb., \$1.25.

495 Parsley, Moss Curled—70 Days. A compact plant with dark green finely cut and curled leaves. Very desirable for garnishing and decorating. Prepaid: Pkt., 10c; oz., 15c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.

496 Parsley, Hamburg Rooted—90 Days. Forms thick, fleshy, edible roots, 8 to 10 inches long, used for flavoring, like celery or celeriac. Prepaid: Pkt., 10c; oz., 15c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.

FOR BACKGROUND and TALL BORDERS

This group of plants has been selected for hardiness, and easy culture. Most of these varieties will do well on most soils, and under a wide range of climatic conditions.

1125 Balsam (Lady Slipper). (A.) A double flowered tall variety with large showy flowers in crimson, rose, scarlet, and white. Pkt., 10c.

1172 Castor Oil Bean Mixed. (A.) Beautiful ornamental foliage adapted for border backgrounds and screen plantings. Tall and easy to grow. Pkt., 10c.

1188 Chinese Woolflower. (A.) Large globular woolly flower heads of bright red. Plants grow 2 to 3 feet; bloom continuously. Pkt., 10c.

1200 Cosmos Single Mixed. (A.) An extra early type in all shades of lavender, pink and red. Pkt., 10c.

1118 Cup and Saucer (Campanula). (P.) Grows about 2 ft. tall. Flowers bell-shaped. Pkt., 10c.

1178 Dusty Miller (Centuria). (P.) Silvery foliage plant used for background plantings. Pkt., 10c.

1240 Four O'Clock. (A.) This old-fashioned flower bears profusely flowers of white, yellow, crimson and pink. Use it for hedges, for foundation plantings, and large beds for public places. Pkt., 10c.

1225 Foxglove (Digitalis). (P.) Does well in cool, shady locations. For gardens and shrubby borders. Spires of blossoms 3 to 5 ft. high. Pkt., 10c.

1265 Hollyhock, Berry's Prize. (P.) Single, ruffled, and double mixed. Easy to grow, looks well anywhere. Pkt., 10c.

1270 Job's Tears. (A.) Curious ornamental grass, cornlike leaves. Seed used for beads. Pkt. 10c.

1120 Joseph's Coat (Amaranthus). (A.) Mottled leaves of red, yellow, and green. A beautiful foliage plant. Easy to grow. Pkt., 10c.

Single Early Cosmos

ROCK GARDENS BORDERS & EDGINGS

We have carefully selected a group of annuals and perennials best suited for planting rock-gardens, borders, and edgings. These plants range in height from 2 inches to one foot. These smaller plants take much less garden space than other varieties.

1514 Perennials for Rock Gardens. A mixture of low growing plants that will start early and bloom throughout the growing season. They grow from the old roots each spring, save replanting every year. Pkt., 15c.

1320 Annuals for Rock Gardens. A carefully prepared mixture of low growing, many colored, free flowering annuals which will supply color in your rock garden all summer. Pkt., 10c.

1110 Ageratum, Blue Bedding. (A.) Blooms profusely. Splendid for pot culture, rock gardens, and bedding. Pkt., 10c.

1112 Alyssum, Violet Queen. (A.) A beautiful shade of violet. Does not fade in hot weather. Pkt. 10c.

1129 Butterfly Flower, Dwarf. (A.) A fine mixture of popular shades. Plants 6" tall, free flowering. Pkt., 10c.

1115 Carpet of Snow (Alyssum). (A.) 2-3" high. A solid mass of white all summer. Pkt., 10c.

1282 Flax, Scarlet (Linum). (A.) Flowers brilliant red. Pkt., 10c.

1295 Marigold, Miniature Mixed. (A.) 9". A delightful mixture. Pkt., 10c.

1301 Nasturtium, Lilliput Mixed. (A.) 9". single mixed in a wide range of hybrid colors. Pkt. 10c.

1327 Pansy, Giant Mixed. (A.) Beautiful range of colors. Pkt., 15c.

1387 Pansy, Viola Mixed. (A.) Small flowered, quaint faces. Pkt., 10c.

1317 Petunia, General Dodds. (A.) A blood red. Large flowers. Pkt., 10c.

1324 Petunia, White King. (A.) Large pure white blossoms. Pkt., 10c.

1322 Petunia, Blue Bee. (A.) A large flowered true blue. Pkt., 10c.

1323 Petunia, Rose of Heaven. (A.) (Nana compacta) rose pink. Pkt., 10c.

1325 Petunia, Howard Star. (A.) Purple with white star. Pkt., 10c.

1316 Phlox (Drummondii) Mixed. (A.) 1 ft. Large early blooming. Will last until frost. Pkt., 10c.

1310 Portulaca (Moss Rose). (A.) Single. Dainty little flowers which thrive on poor soil, bloom even in hottest weather. Pkt., 10c.

1311 Portulaca (Moss Rose). (A.) Double. Grow like single, but have double flowers. Pkt., 15c.

1355 Sweet Peas, Cupid Mixed. (A.) A 6 in. rock garden sweet pea with a good range of color. Pkt., 10c.

1370 Sweet William, Single. (P.) Mixed. 1 ft. Excellent for borders. Pkt., 10c.

1380 Verbena, Mixed. (A.) 1 ft. Will thrive anywhere. Many glorious colors in our mixture. Pkt., 10c.

1383 Verbena, Trailing Sand Pink. (A.) Sweet scented at night. Pkt., 10c.

1395 Zinnia, Trailing. (A.) (Sanvitalia.) 6". Double yellow flowers. Pkt., 10c.

Annuals for Window or Porch Box

Large Mixed Packet— 15c

A charming selection of quick growing annuals which will make a bright spot and interesting display. Includes both compact and trailing types with brilliant colors and long flowering season.

Bachelor's Button—Centaurea

VINES and CLIMBERS

Red, white, and blue morning glories are listed below. Order a packet of each, and cover that old fence or building with our colors.

1256 Ornamental Gourds Mixed. A mixture of many odd shapes and colors. The vines will grow on a fence or trellis. Postpaid: Pkt., 10c; oz., 15c.

1437 Bean, Scarlet Runner. (A.) 10 ft. Brilliant sprays of scarlet pea-shaped blossoms. The beans can be used for food. Pkt., 10c.

1415 Cardinal Climber. (A.) 25 ft. Attractive fern-like leaves. Cardinal-red flowers borne in clusters from mid-summer to frost. Pkt., 10c.

1430 Cypress Vine. (A.) 10 ft. Star-shaped white and scarlet blossoms. Beautiful feathery foliage. Pkt., 10c.

1450 Moonflower. (A.) 20 ft. Popular climber and very vigorous grower. Large overlapped leaves. Blooms in evening. Pkt., 10c.

1458 Morning Glory Scarlet-O'Hara. (A.) Red. As large and beautiful flowers as Heavenly Blue. Easy to grow. Pkt., 10c.

1457 Morning Glory Pearly Gates (A.) White. The newest of the grand early flowering varieties. Grows and blooms like Heavenly Blue and Scarlet O'Hara. A silver medal winner. Pkt., 10c.

1456 Morning Glory Heavenly Blue. (A.) Early blooming, vigorous. One of our most beautiful and popular flowers. Easy to grow. Exquisite blue color. Pkt., 10c.

1455 Morning Glory, Imperial Mixed. (A.) 20 ft. A rapid grower with many varicolored flowers. Early blooming. Pkt., 10c.

1335 Peas, Everlasting. (P.) Sometimes called perennial sweet peas. Not fragrant. Pkt., 10c.

TALL HEDGES for Screens

Will Grow to
4 ft. or Higher
See Description

See Page 73 for Low Prices on Tree Seedlings for Windbreaks. These taller, rapid growing varieties are best for screens to conceal undesirable buildings, alleys, unsightly situations next door, etc. Where room is available, they are excellent for mass plantings or as background for Shrub borders, etc.

No. 5508 HONEYSUCKLE—Bush. (12 to 15 ft.) One of the most attractive of the taller hedges. Perfectly hardy, vigorous grower—beautiful flowers followed by bright red berries. The ideal screen. Plant 2 to 3 ft. apart.
12 to 18 inch—10 for \$1.50; 25 for \$3.35.
18 to 24 inch—10 for \$2.00; 25 for \$4.65.

No. 5608 RUSSIAN MULBERRY. A very useful variety at unusually low cost. Quick growing and absolutely hardy. Useful for both hedge or screen as it can be kept pruned down to 4-5 ft. (when planted 15 to 18 inches apart), or allowed to grow to 12-16 ft. high (when planted 3-5 ft. apart).
12 to 18 inch—25 for \$1.00; 50 for \$1.75.
18 to 24 inch—25 for \$1.35; 50 for \$2.50.

No. 5618 RUSSIAN OLIVE. Another very useful, attractive yet inexpensive variety. When planted 15 to 18 inches apart, it makes a good tight, silvery grey hedge, kept pruned down to 4 to 6 ft. high. For effective screen, plant it 3 to 5 ft. apart and it will grow 15 to 18 ft. tall.
18 to 24 inch—25 for \$2.85; 50 for \$5.25.

TRIMMED and NATURAL LOW HEDGES

IMPORTANT. Your Hedge will never be tight, close to the ground unless you prune it severely immediately after planting. Always prune off at least 1/2 of the top branches. Smaller sizes should be left only about 4 to 6 inches taller than ground—larger sizes about 10 to 12 in.

No. 5506 PRIVET—AMOR RIVER NORTH. Most popular Hedge plant—Hardy Russian Privet. Dense, glossy green foliage on numerous upstanding branches. Can be kept pruned down to a thick Hedge only 2 feet high or will grow over 4 feet if not pruned.

12 to 18 inch—10 for \$1.75; 25 for \$3.65.

18 to 24 inch—10 for \$2.75; 25 for \$6.00.

No. 5505 BARBERRY—Green. A very compact, dense growing, thorny, protective Hedge. Can be kept pruned to 2 feet or allowed to grow to 4 feet. In Fall, the leaves turn red and bright red berries appear.

12 to 18 inch—10 for \$1.45; 25 for \$3.15.

18 to 24 inch—10 for \$1.65; 25 for \$3.65.

No. 5502 BARBERRY—Red. Like green but with brilliant red foliage when planted in full sun.

12 to 15 inch—5 for \$2.25; 10 for \$4.15.

15 to 18 inch—5 for \$2.60; 10 for \$4.75.

No. 5511 SPIREA V.H.—BRIDAL WREATH. One of the most beautiful Hedges—in the Spring, its graceful arching branches are a mass of lovely white bloom. Very hardy—grows to 4 to 6 ft. high. Prune very severely when planted but, after the first year, prune out only the dead wood.

12 to 18 inch—10 for \$1.50; 25 for \$3.35.

18 to 24 inch—10 for \$2.00; 25 for \$4.65.

No. 5507 CARAGANA. Best ornamental Hedge for severe northern climates. Strong, upright, growing thornless branches with dense foliage and yellow blossoms insure a beautiful hedge. Keep pruned from 3 to 6 feet or you may let it grow higher.

12 to 18 inch—10 for 65c; 25 for \$1.35.

18 to 24 inch—10 for 80c; 25 for \$1.75.

2 to 3 foot—10 for \$1.10; 25 for \$2.45.

The above varieties listed under Tall Hedges are also ideally suited for windbreak plantings because of their quick growth. On page 73 we have them priced in larger quantities that will save you money. Plant these in combination though with slower growing Evergreen Seedlings which will make a more permanent windbreak for you. Get our Free Evergreen Circular for full details.

BERRY'S GUARANTEE SATISFACTION AT MONEY SAVING PREPAID PRICES

We have always guaranteed satisfactory quality. See page 75. This year we can assure you of more. Because we don't use expensive illustrative color pictures and free gifts you may not care about we can save you real money on the best quality nursery stock that can be grown.

In comparing our prices remember they are all prepaid. In ordering you can save then at least 20% over other nurseries who may have just as low a price but ship collect.

VINES

Strong 2 Yr. Plants for Rapid Vigorous Growth For Trellis, Arbors, Porches, etc.

These 7 varieties, 40c each; 3 for \$1.10, postpaid

No. 5538—BOSTON IVY. Best clinging vine for brick, stone, cement or stucco.
No. 5540—HONEYSUCKLE—Scarlet Trumpet. A strong growing vine with bright red, trumpet-shaped flowers.

No. 5537—ORIENTAL BITTERSWEET. Better than the American because it produces many more lovely red berries for winter bouquets. A sex plant that requires cross-pollination—always plant from 4 to 6 nearby.

No. 5539—HONEYSUCKLE—Hall's. A very hardy, rapid growing vine covered with creamy white flowers in season. Fine for porch, arbor or fence. Best vine for ground cover in shady places, on steep banks or terraces.

No. 5531—CLEMATIS—Paniculata. The hardy, vigorous growing Clematis. Covered with fragrant flowers in late summer and fall.

No. 5542—WISTERIA—Purple. The most magnificent of all vines—lasting for generations and increasing in beauty each year. Long clusters of lilac flowers in summer. Requires some protection in severe climates.

No. 5541—TRUMPET VINE—The Old Favorite hardy Trumpet Vine. Vigorous growing, hardy vine is covered with larger trumpet shaped, scarlet flowers in summer.

Some Vines of Special Beauty

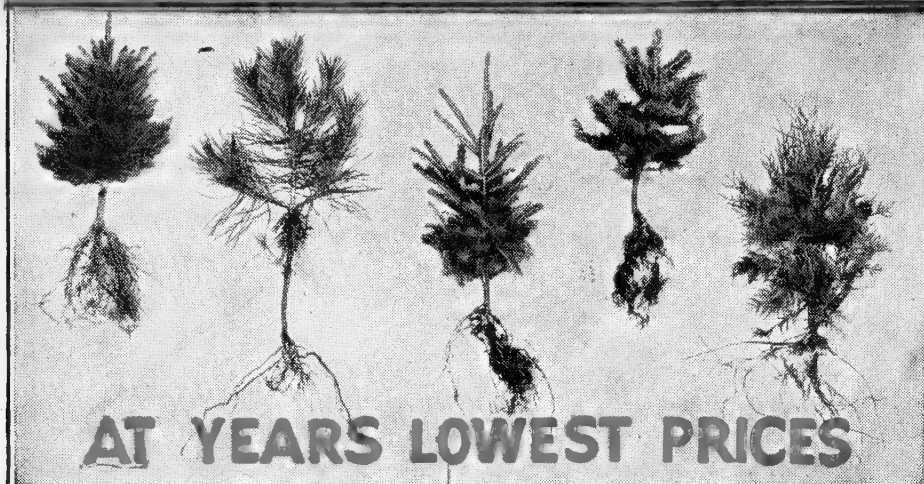

No. 5532—SILVER LACE VINE. The fastest growing, most beautiful hardy vine. Often grows 20 ft. per year. Glossy green foliage covered with snowy white flowers. Each, 55c; 3 for \$1.50.

No. 5526—CLEMATIS JACKMANI—Purple. A beautiful perennial vine with its mass of large, rich, purple bloom. Considered the most beautiful vine for trellis. Requires protection in severe climates. Each, 75c; 3 for \$2.10.

No. 5585—CLEMATIS—M. E. Andre. Lovely, Wine-red flowers completely cover the plant. One of the most beautiful of all the Clematis. Each, 75c; 3 for \$2.10.

No. 5525—HONEYSUCKLE—Gold Flame. New, everblooming Honeysuckle. Masses of deep scarlet trumpets lined with gold from early summer until frost. Attractive blue green foliage. Plants are vigorous, hardy and disease resistant. Each, 65c; 3 for \$1.75.

10 LOVELY ORNAMENTAL EVERGREENS

AT YEARS LOWEST PRICES

Black Hills Spruce Mugho Pine Colo. Blue Spruce Douglas Fir Am. Arbor Vitae

BERRY'S EVERGREEN BARGAIN of the YEAR—all 5 and 6 year old trees up to 1½ ft. size

This assortment of varieties makes an ideal ornamental evergreen grouping in the lawn or around the corners of your home. The Pines and Spruces also make your best windbreak plantings. Think of it,—you've paid \$3.00 or more for evergreens not much larger—while here you get them for less than 30c as long as supply lasts delivered to your door.

2 of each variety in size pictured above. Colorado Blue Spruce 8/12 inches; all others 1-1½ feet. Black Hills Spruce; Douglas Fir; Mugho Pine; and American Arbor Vitae—10—5/6 yr. old Transplants—a \$6.00 value—only \$2.98 on early orders as long as supply lasts.

SPECIAL EVERGREENS FOR HOME PLANTINGS

Large Evergreens for Windbreaks

This special offer of twice transplanted windbreak stock is our biggest value of the year. We make this offer only on American Arbor Vitae and Norway Spruce as these two Evergreens alone make a fine two row windbreak. These extra large trees that cost so little may be planted in their permanent location, the American Arbor Vitae should be your outside row and the trees 8-10 feet apart. On the inside the Norway Spruce may be planted 14-16 feet apart.

AMERICAN ARBOR VITAE. A very hardy rapid grower that thrives on heavy soils. Densely branched, bright green color, grows 40 to 50 feet.

NORWAY SPRUCE. A very hardy rapid grower, fine for windbreaks. This tree branches close to the ground and has a very dense deep green foliage. Grows 60 to 70 feet tall, and lives 50 to 60 years.

3 FOR \$1.75

A pyramidal type for the background, intermediate type such as Pfitzer or Savin Juniper at side and in front either Globe Arbor-Vitae or Mugho Pine. Start landscaping your home now by ordering this special introductory offer. No. 726—All 3—1 of each group 1-1½ ft. size—only \$1.75, postpaid.

Postpaid: YOUR CHOICE

10 of any one variety, \$0.90
2 of any one variety, 1.75
4 of any one variety, 2.75

PFITZER JUNIPER. Exceptionally beautiful, graceful and hardy in shade or sun. Spreading branches 3 to 4 feet at maturity. 12 to 15 inch size.

SAVIN JUNIPER. Hardy everywhere. Beautiful trailing type, fine for foreground or foundation groups. 12 to 15 inch size.

IRISH JUNIPER. An old well-known variety with bright green foliage. Grows 7 to 8 feet tall. 13 to 24 inch size.

GLOBE ARBOR VITAE. Charming little globe for the foreground giving delightful contrast to spreading Juniper. 10 to 12 inch size.

PYRAMIDAL ARBOR VITAE. Formal compact pyramidal type. Perfect for entrance, foundation or garden plantings. Can be kept clipped back to any desired height. 18 to 24 inch size.

NORWAY SPRUCE. Fastest growing spruce. Tall compact ornamental pyramid, well branched to ground. 15 to 18 inch size.

RED CEDAR. Hardy anywhere. Can be trimmed to any shape and used alone or in group plantings. The Dean of all Junipers. 15 to 18 inch size.

BLACK HILLS SPRUCE. Famed for its perfect symmetry. Extremely hardy. Great favorite for specimen planting on lawn. 15 to 18 inch size.

MUGHO PINE. Dwarf low growing pine used for doorway, foundation and cemetery plantings. Grows in a low compact bush. New growth looks like tiny candles at the end of each branch. An unusually hardy and attractive evergreen. 10 to 12 inch size.

40 SPECIAL EVERGREENS \$1.00

WINDBREAKS

at LOW COST

from SEEDLING TREES

A MONEY MAKING INVESTMENT

For just a few dollars you can now plant several hundred Evergreen and Forest Tree seedlings; to protect your home, farm buildings, and feed lots, from sweeping winds in winter and summer. Windbreaks from these seedlings will greatly increase crop production from the protection given, also production of your livestock. Nearly every farm has some waste land that will grow all the fence posts you need, all the wood you can burn, and at the same time, prevent soil erosion and provide shelters for grazing livestock. A fine investment needed on every farm at such low cost.

EVERGREEN SEEDLINGS

Evergreen seedlings should be planted in beds and cultivated like garden plants. Rows may be 18 to 24 inches apart with the Evergreens 10 to 15 inches apart in the row. Provide some shade for the first year. A covering of lath spaced about 1½ inches apart with slats running north and south is good. After about 2 years or when 18 to 24 inches high, transplant into permanent location. For further planting instructions and windbreak ideas ask for our **Free Circular on Evergreens** giving a full description of all varieties.

Berry's Evergreen seedlings are grown in northern Wisconsin. They are vigorous with a strong root system guaranteed to be hardy and adapted anywhere. We ship direct to you prepaid at proper planting time furnishing planting instructions and guaranteeing satisfaction.

25 each; Black Hills Spruce, Am. Arbor Vitae, Colo. Blue Spruce, Ponderosa Pine.

No. 722—all 100—4/6"—only \$2.00 postpaid.

TREE SEEDLINGS

These are more rapid growing than Evergreens so should be used in combination with Evergreens as they are not nearly so permanent as Evergreens.

Our tree seedlings are well rooted, hardy and vigorous. They are easy to start, planting instructions being furnished. We ship prepaid at proper planting time early in the Spring and guarantee satisfaction.

We suggest planting all sizes of tree seedlings in rows where it is convenient to cultivate them often the first 2 or 3 years—rows about 36 inches apart with the seedlings 12 to 24 inches apart in the row—they grow more bushy when planted 24 inches apart. After 2 years, when the trees are well rooted and about 5 feet tall, transplant into permanent location.

1 yr. No. 1.....40c		1.85	8.50

No. 6602—CACO. Red. The hardest red Grape. Vigorous grower, bearing young, heavily and regularly. Fruit is extra large, beautifully colored, sweet and juicy.

No. 6603—PORTLAND. White. Earliest of all Grapes! Large, white fruit with luscious, spicy flavor. Hardy and finest quality.

No. 6604—FREDONIA. Black. Destined to be America's favorite black Grape! Vigorous, productive and hardy. Large bunches of big juicy, deliciously flavored fruit—ripening 2 weeks earlier than Concord.

No. 6605—SHERIDAN. (An improved Concord). A promising late-keeping grape to extend the season of Concord. In many places under the same conditions as Concord, the plants have been found to be just as vigorous, healthy, hardy, and more productive. The bunches of Sheridan are larger and more compact; and the berries are firmer and as large as Concord; the flavor is sweeter and richer; the season is a week later and the grapes do not shell as readily.

No. 6600—GOLDEN MUSCAT. A new hardy Grape combining the extra high quality and distinctive flavor of the California Muscat Grape, with the hardiness of Concord. The bunches are large and well filled. Berries are large, sweet, meaty and juicy. Vines are vigorous, hardy, and heavy bearers after the second year. Recommended for home or commercial planting. Prepaid: 1 Yr. No. 1—\$1.00 each; 5 for \$4.85.

SAVE 15% to 20%

We are fair to every customer regardless of the amount of order. 100% value in the best nursery stock America can grow. Accurate grades, true descriptions and a fair and square deal always is guaranteed you. Order with safety at Berry's. Prices are lowest and quality highest so don't delay—act now. Remember our Prepaid Prices save you 15-20% over other nurseries.

HIGHEST QUALITY—LOWEST PRICES

FINEST QUALITY

Our enviable reputation is built on high quality at low prices—superior values. We have developed the largest business of its kind in the country, on this sound policy.

These same high standards maintain in our nursery department. Each and every item is carefully tested before Berry's will put their name behind it. You can order our Nursery Stock with full confidence that it is accurately and honestly described, that the quality is of the highest and the prices, the lowest.

Berry's guaranteed nursery stock is grown by experts, wherever possible in northern sections for extra-hardiness. Transplanted, pruned and root pruned to insure sturdy, well rooted, well branched plants that will thrive anywhere. Do not be misled by claims of superior quality—we offer high quality at very low prices.

LIBERAL GUARANTEE

Berry's guarantee their nursery stock to be exactly as represented and to be delivered to you in good planting condition. If not, we will replace it free of charge but you must notify us within 10 days after you receive it.

If any nursery stock is proven not true to name, we will, upon proper proof, replace all such stock or refund the exact amount paid, but, in no case, shall we be liable for any sum greater than the amount originally received for said nursery stock.

If any Berry's nursery stock fails to grow with proper care, we will replace it at half price IF you notify us within 90 days after you receive it.

PLANT THIS YEAR

Get your fruit from the tree and the vine. With canned goods short, and fresh fruits scarce, due to transportation difficulties, now is the time to insure your share of good things to eat. Plant now, harvest next year.

WHEN WE SHIP

In the spring, we study the weather reports and ship at the proper planting time in your locality. Don't be alarmed if your shipment is not received on the first warm day, for you may be sure your order is having careful attention.

When Spring opens up all over the central states, we are not always able to ship as promptly as we would like because of the manpower problem. As your order will be shipped as soon as possible, it is not necessary to write us. You may be sure that even in the rush season, your order will be received in time for successful planting.

Strawberries, cannas, dahlias, Peonies, Gladiolus, and Perennials are shipped separately and not included in the same package with Fruit, Shrubs, etc.

In the fall, we can supply all Nursery stock except Strawberries, Cannas, Dahlia, and Gladiolus. Most kinds of Nursery stock can be very successfully planted in the Fall, even in severe climates.

Berry's send you complete instructions for planting your nursery stock. These are included in the package. Read them carefully and you will succeed.

SAVE WITH SAFETY AT BERRY'S NEW PREPAID PRICES

STRAWBERRIES

FOR EVERY HOME GARDEN

SURE CROP

No. 4004—BLAKEMORE

New, early market berry. Extra vigorous grower, heavy bearer, very drouth resistant, healthy and good plant maker. Recommended for Northern States. Mild flavor, beautiful color, early maturity. For market or home.

No. 4005—SENATOR DUNLAP

Old reliable favorite for home or market. Strong, extra hardy grower—heaviest yielder of big, solid, red berries. Mid-season.

Above 2 varieties postpaid.

Postpaid: 25 for 75c; 50 for \$1.35; 100 for \$2.50.

No. 4013—EVERBEARING STRAWBERRY GARDEN—50 Gem and 50 Mastodon—100 for \$6.65, Prepaid.

EVERBEARING

"All Everbearers start fruiting 90 days after planting."

No. 4001—MASTODON

A well known variety which produces extra large fruit. The berries are not as well colored nor as fine flavored as Gem. Prepaid: 25 for \$2.25; 50 for \$4.15; 100 for \$7.75.

No. 4003—WAYZATA

Our nursery had a crop failure and can not secure true-to-name plants of this newer variety. Rather than substitute an inferior variety, we are not accepting orders for this variety. We expect to have Wayzata plants next year.

THORO-BREDS

No. 4006—FAIRFAX

A new variety that is making thousands of friends. It wins because of its greatly superior flavor and astonishing yields. Has produced over 5000 quarts per acre. Large firm berries. Bright red color. Excellent shipper.

No. 4007—PREMIER

Famous for flavor and huge crops in any soil or climate. Berry's plants are true early strain—heavy bearers, big red berries.

Above 2 varieties postpaid.

25 for \$1.05; 50 for \$1.95; 100 for \$3.75.

BERRY TREES of EXCEPTIONAL QUALITY

ALL NURSERY PRICES ARE PREPAID

Berry's give you 100% value and you're the judge. Every grade is described just as we guarantee it—find it. Honest descriptions—honest values. Remember this in comparing our quality with more colorful catalogs. The money we save you enables us to prepay our nursery stock shipments and save you up to 40%.

Quick crop, 5 to 7 ft. tall—1 1/2 to 1 inch diameter—extra heavily branched and well rooted. Plant this size for quicker crops—best results.

HOME ORCHARD SIZE. Strong 1 1/2 to 1 3/4 inch diameter—4 to 6 ft. tall. Very well branched and well rooted.

COMMERCIAL SIZE. Being lower priced, usually preferred for large Orchard planting. 3 to 5 ft. tall, 1 1/2 to 1 3/4 inch diameter. Extra value at Berry's low prices.

ECONOMY GRADE. In Peach Trees, we offer this smaller size—2 to 3 ft. tall, 1/2 inch caliper (diameter), lightly branched trees. Recommended for larger Orchards in warm climates.

PLUMS 2 YEARS \$1.20 EACH 3 to 5 Ft. POST PAID IN LOTS OF 12 OR MORE

PLANT PLUMS THIS YEAR / PICK FRUIT NEXT YEAR

Hardy plums are one of the easiest fruits to grow. Big crops of luscious fruit to eat or can the second year after planting. Under our Nutrition Program it is recommended the average family have at least 25 quarts per year. They are fine for canning or plum butter.

Plums are very low in price in comparison with other fruit trees. Get your order in early though as stocks are limited and choose at least one good pollinator (marked P) in planting two or more varieties.

EUROPEAN AND ASIATIC

These favorite varieties are not as hardy as American varieties so are especially suited for Central, Eastern and Southern states. They are exceptionally high in quality for eating or markets. Plant at least 2 of this group for proper cross-pollinization.

Grades Same as Apple.

No. 6510—BURBANK

The best commercial variety in mild climates. Fruit is extra large, free-stone, bright cherry red, very juicy, and deliciously flavored. Trees are vigorous growers and heavy bearers. Excellent for home orchard, too.

No. 6506—ITALIAN BLUE PRUNE

The old favorite Italian dark blue Prune plum, for commercial or home orchards. Juicy and very well flavored. Excellent for eating fresh or canning, but not used for jelly.

No. 6508—STANLEY PRUNE

The most profitable Plum for commercial or Home Orchards. Earliest Prune, insuring top prices. Hardest European variety. Consistent bearer of large, blue, richly full flavored fruit. Free-stone, subacid. Best for eating and canning.

No. 6500—SUPERIOR

All the qualities of the finest California Plums on an extra hardy tree that will quickly bear large crops in any climate. The huge dark red plums have juicy, full flavored, tender, yellow meat. The best of all Plums for eating fresh, for canning or for plum butter.

No. 6515—SAPA—P

Early, heavy bearer of rich purplish-black Plums of medium size. Extra hardy. Juicy. Good for jelly, preserves.

No. 6502—UNDERWOOD

Heavy bearer of large, red, juicy, full flavored plums, excellent quality. Early.

No. 6503—WANETA—P

The largest, most attractive and highest quality of the red Hardy American and Hybrid plums. Vigorous, extra hardy and big cropper. Mid-season.

No. 6505—GOLDEN MINNESOTA

The greatest of the new, extra hardy plums. The large fruit is golden yellow with red cheeks, juicy, and unusually fine flavored. Trees are vigorous, hardy everywhere, heavy bearers, with crops starting the second year.

No. 6501—RED WING

An unusually large, dull red Plum developed in Minnesota. Flesh is rich yellow, firm, juicy and sweet. The skin can be removed easily and the pit is so free that the plum may be sliced like a peach. A fine home orchard variety for dessert or home canning.

"BEST 10" Home Orchard

Selected by our customers and recommended by State Experiment Stations as being the 10 best varieties for the Home Orchard. Plenty of Apples, Cherries and Plums for eating, canning or jelly all season. See page 80 for description of varieties and sizes.
